Concepts of Value in European Material Culture, 1500-1900 Bert De Munck, Dries Lyna, 2016-03-09 In contemporary society it would seem self evident that people allow the market to determine the values of

products and services For everything from a loaf of bread to a work of art to a simple haircut value is expressed in monetary terms and seen as determined primarily by the objective interplay between supply and demand Yet this price mechanism is itself embedded in conventions and frames of reference which differed according to time place and product type Moreover the dominance of the conventions of utility maximising and calculative homo economicus is a relatively new phenomenon and one which directly correlates to the steady advent of capitalism in early modern Europe This volume brings together scholars with expertise in a variety of related fields including economic history the history of consumption and material culture art history and the history of collecting to explore changing concepts of value from the early modern period to the nineteenth century and present a new view on the advent of modern economic practices Jointly they fundamentally challenge traditional historical narratives about the rise of our contemporary market economy and consumer society

In Praise of Commercial Culture Tyler COWEN, Tyler Cowen, 2009-06-30 Does a market economy encourage or discourage music literature and the visual arts Do economic forces of supply and demand help or harm the pursuit of creativity This book seeks to redress the current intellectual and popular balance and to encourage a more favorable attitude toward the commercialization of culture that we associate with modernity Economist Tyler Cowen argues that the capitalist market economy is a vital but underappreciated institutional framework for supporting a plurality of co existing artistic visions providing a steady stream of new and satisfying creations supporting both high and low culture helping consumers and artists refine their tastes and paying homage to the past by capturing reproducing and disseminating it Contemporary culture Cowen argues is flourishing in its various manifestations including the visual arts literature music architecture and the cinema Successful high culture usually comes out of a healthy and prosperous popular culture Shakespeare and Mozart were highly popular in their own time Beethoven's later less accessible music was made possible in part by his early popularity Today consumer demand ensures that archival blues recordings a wide array of past and current symphonies and this week's Top 40 hit sit side by side in the music megastore High and low culture indeed complement each other Cowen's philosophy of cultural optimism stands in opposition to the many varieties of cultural pessimism found among conservatives neo conservatives the Frankfurt School and some versions of the political correctness and multiculturalist movements as well as historical figures including Rousseau and Plato He shows that even when contemporary culture is thriving it appears degenerate as evidenced by the widespread acceptance of pessimism He ends by considering the reasons why cultural pessimism has such a powerful hold on intellectuals and opinion makers

Wicked Intelligence Matthew C. Hunter, 2013-10-15 In late seventeenth century London the most provocative images were produced not by artists but by scientists Magnified fly eyes drawn with the aid of microscopes apparitions cast on laboratory walls by projection machines cut paper figures revealing the exact proportions of sea monsters all were created by members of the Royal Society of London the leading institutional platform of the early Scientific Revolution Wicked Intelligence reveals that these natural philosophers shaped Restoration London's emergent artistic cultures by forging collaborations with court

painters penning art theory and designing triumphs of baroque architecture such as St Paul's Cathedral Matthew C Hunter brings to life this archive of experimental philosophical visualization and the deft cunning that was required to manage such difficult research Offering an innovative approach to the scientific image making of the time he demonstrates how the Restoration project of synthesizing experimental images into scientific knowledge as practiced by Royal Society leaders Robert Hooke and Christopher Wren might be called wicked intelligence Hunter uses episodes involving specific visual practices for instance concocting a lethal amalgam of wax steel and sulfuric acid to produce an active model of a comet to explore how Hooke Wren and their colleagues devised representational modes that aided their experiments Ultimately Hunter argues the craft and craftiness of experimental visual practice both promoted and menaced the artistic traditions on which they drew turning the Royal Society projects into objects of suspicion in Enlightenment England The first book to use the physical evidence of Royal Society experiments to produce forensic evaluations of how scientific knowledge was generated *Wicked Intelligence* rethinks the parameters of visual art experimental philosophy and architecture at the cusp of Britain's imperial power and artistic efflorescence

Picasso and Truth T. J. Clark, 2023-10-17 A groundbreaking reassessment of Picasso by one of today's preeminent art historians Picasso and Truth offers a breathtaking and original new look at the most significant artist of the modern era From Pablo Picasso's early *The Blue Room* to the later *Guernica* eminent art historian T J Clark offers a striking reassessment of the artist's paintings from the 1920s and 1930s Why was the space of a room so basic to Picasso's worldview And what happened to his art when he began to feel that room space become too confined too little exposed to the catastrophes of the twentieth century Clark explores the role of space and the interior and the battle between intimacy and monstrosity in Picasso's art Based on the A W

Mellon Lectures in the Fine Arts delivered at the National Gallery of Art this volume remedies the biographical and idolatrous tendencies of most studies on Picasso reasserting the structure and substance of the artist's work With compelling insight Clark focuses on three central works the large scale *Guitar and Mandolin on a Table* 1924 *The Three Dancers* 1925 and *The Painter and His Model* 1927 and explores Picasso's answer to Nietzsche's belief that the age old commitment to truth was imploding in modern European culture Masterful in its historical contextualization Picasso and Truth rescues Picasso from the celebrity culture that trivializes his accomplishments and returns us to the tragic vision of his art humane and appalling naive and difficult in mourning for a lost nineteenth century yet utterly exposed to the hell of Europe between the wars Published in association with the Center for Advanced Study in the Visual Arts National Gallery of Art Washington DC Please note All images in this ebook are presented in black and white and have been reduced in size
