Kitab Bahriye:

Tunisia in the Kitab-i Bahriye by Piri Reis Piri Reis, Svatopluk Soucek, 1976 **The Sultan's Fleet** Christine Isom-Verhaaren, 2021-12-02 While the Ottoman Empire is most often recognized today as a land power for four centuries the seas of the Eastern Mediterranean were dominated by the Ottoman Navy Yet to date little is known about the seafarers who made up the sultans fleet the men whose naval mastery ensured that an empire from North Africa to Black Sea expanded and was protected allowing global trading networks to flourish in the face of piracy and the Sublime Porte's wars with the Italian city states and continental European powers In this book Christine Isom Verhaaren provides a history of the major events and engagements of the navy from its origins as the fleets of Anatolian Turkish beyliks to major turning points such as the Battle of Lepanto But the book also puts together a picture of the structure of the Ottoman navy as an institution revealing the personal stories of the North African corsairs and Greek sailors recruited as admirals Rich in detail drawn from a variety of sources the book provides a comprehensive account of the Ottoman Navy the forgotten contingent in the empire's period of supremacy from the 14th century to the 18th century **Geographical Knowledge and Imperial Culture in the Early Modern Ottoman Empire** Pinar Emiralioğlu, 2016-12-05 Exploring the reasons for a flurry of geographical works in the Ottoman Empire in the sixteenth century this study analyzes how cartographers travellers astrologers historians and naval captains promoted their vision of the world and the centrality of the Ottoman Empire in it It proposes a new case study for the interconnections among empires in the period demonstrating how the Ottoman Empire shared political cultural economic and even religious conceptual frameworks with contemporary and previous world empires *Medieval Islamic Civilization* Josef W. Meri, 2005-10-31 *Medieval Islamic Civilization* examines the socio cultural history of the regions where Islam took hold between the seventh and sixteenth century This important two volume work contains over 700 alphabetically arranged entries contributed and signed by international scholars and experts in fields such as Arabic languages Arabic literature architecture art history history history of science Islamic arts Islamic studies Middle Eastern studies Near Eastern studies politics religion Semitic studies theology and more This reference provides an exhaustive and vivid portrait of Islamic civilization including the many scientific artistic and religious developments as well as all aspects of daily life and culture For a full list of entries contributors and more visit www.routledge.com/middleages/Islamic *Medieval Islamic Civilization: A-K, index* Josef W. Meri, 2006 Publisher description [The Cambridge History of Turkey: Volume 2, The Ottoman Empire as a World Power, 1453-1603](#) Suraiya N. Faruqi, Kate Fleet, 2012-11-12 Volume 2 of *The Cambridge History of Turkey* examines the period from the conquest of Constantinople in 1453 to the accession of Ahmed I in 1603 During this period the Ottoman Empire moved into a new phase of expansion emerging in the sixteenth century as a dominant political player on the world scene With territory stretching around the Mediterranean from the Adriatic Sea to Morocco and from the Caucasus to the Caspian Sea the Ottomans reached the apogee of their military might in a period seen by many later Ottomans and

historians as a golden age in which the state was strong the sultan's might unquestionable and intellectual life and the arts flourishing In this volume leading scholars assess the considerable expansion of Ottoman power and effervescence of the Ottoman intellectual and cultural world They also investigate the challenges that faced the Ottoman state particularly in the later period as the empire experienced economic crises revolts and drawn out wars **Creating the Mediterranean** Tarek Kahlaoui, 2018-01-16 In *Creating the Mediterranean Maps and the Islamic Imagination* Tarek Kahlaoui treats the subject of the Islamic visual representations of the Mediterranean It tracks the history of the Islamic visualization of the sea from when geography was created by the Islamic state's bureaucrats of the tenth century C E located mainly in the central Islamic lands to the later men of the field specifically the sea captains from the fourteenth to the sixteenth centuries C E located in the western Islamic lands A narrative has emerged from this investigation in which the metamorphosis of the identity of the author or mapmaker seemed to be changing with the rest of the elements that constitute the identity of a map its reader or viewer its style and structure and its textual content **Other Routes** Tabish Khair, 2006 The collection includes pilgrimage accounts which describe a national circuit as in Lady Nijo's c 1280 or Sei Shonagon's c 990 accounts or move across vast regions to places of learning and pilgrimage or to a particular centre of religious cultural significance the early Chinese travellers to India in the fifth sixth and seventh centuries the Hajj pilgrimage of Ibn Jubayr in the 12th century Blyden's Africanist Christian pilgrimage to the Holy Land in the 19th century These pilgrimage accounts can also taper into other genres for instance while Ibn Battuta b 1304 set out to go to Mecca which he did he ended up travelling across 50 countries and dictating what is undoubtedly a travel book in a narrow generic sense rather than the account of a pilgrimage Other extracts range from the influential medieval travel geography of al Idrisi in the 11th century the global history **Trading Territories** Jerry Brotton, 2020-06-30 In this generously illustrated book Jerry Brotton documents the dramatic changes in the nature of geographical representation which took place during the sixteenth century explaining how much they convey about the transformation of European culture at the end of the early modern era He examines the age's fascination with maps charts and globes as both texts and artifacts that provided their owners with a promise of gain be it intellectual political or financial From the Middle Ages through most of the sixteenth century Brotton argues mapmakers deliberately exploited the partial often conflicting accounts of geographically distant territories to create imaginary worlds As long as the lands remained inaccessible these maps and globes were politically compelling They bolstered the authority of the imperial patrons who employed the geographers and integrated their creations into ever more grandiose rhetorics of expansion As the century progressed however geographers increasingly owed allegiance to the administrators of vast joint stock companies that sought to exploit faraway lands and required the systematic mapping of commercially strategic territories By the beginning of the seventeenth century maps had begun to serve instead as scientific guides defining objectively valid images of the world **Venice and the Islamic World, 828-1797** Institut du Monde Arabe (Paris), 2007-01-01 From 828 when

Venetian merchants carried home from Alexandria the stolen relics of St Mark to the fall of the Venetian Republic to Napoleon in 1797 the visual arts in Venice were dramatically influenced by Islamic art Because of its strategic location on the Mediterranean Venice had long imported objects from the Near East through channels of trade and it flourished during this particular period as a commercial political and diplomatic hub This monumental book examines Venice's rise as the bazaar of Europe and how and why the city absorbed artistic and cultural ideas that originated in the Islamic world Venice and the Islamic World 828 1797 features a wide range of fascinating images and objects including paintings and drawings by familiar Venetian artists such as Bellini Carpaccio and Tiepolo beautiful Persian and Ottoman miniatures and inlaid metalwork ceramics lacquer ware gilded and enameled glass textiles and carpets made in the Serene Republic and the Mamluk Ottoman and Safavid Empires Together these exquisite objects illuminate the ways Islamic art inspired Venetian artists while also highlighting Venice's own views toward its neighboring region Fascinating essays by distinguished scholars and conservators offer new historical and technical insights into this unique artistic relationship between East and West *Cultural*
