Bennett,2021-08-20 This book examines the history politics and economics of alternative energy Since the energy crisis of the 1970s governments around the world have subsidized and otherwise incentivized alternative forms of energy to reduce dependence on fossil fuels This search has taken on added urgency in the twenty first century as the specter of climate change has engendered ambitious state level renewable portfolio standards enhanced federal incentives and inspired 100% renewable electrical generation targets in such states as Vermont and Hawaii To save the planet from destruction wind solar and other renewable energy alternatives must replace fossil fuels But how did we get here and what is the cost After an in depth study of the Carter administration s synthetic fuels program the focus shifts to the two most prominent perhaps most promising and certainly most promoted and government subsidized green and renewable energies today wind and solar Because wind has made the most headway and drawn the most controversy it receives the most attention Although the primary focus is on the American experience with renewable energy

the policies and politics of renewables in Scotland Wales Denmark Spain and other European nations are also discussed Issues considered in the book include the nature and efficacy of renewable subsidies the employment of federal and state tax codes to encourage renewables the lobbies and interest groups that campaign for government support of renewables and the fierce battles over the siting of renewable facilities Unlike other works on this subject the book probes in depth the nature of the opposition to wind and solar both in the matter of siting and in their worthiness as recipients of substantial government assistance

*Belief and Misbelief Asymmetry on the Internet* Gérald Bronner, 2016-01-26 This book discusses the media beliefs the news the Internet etc but it should not be seen as yet another critique of the media system exploring with indignant fascination the idea of a machination against truth set up to serve a society of domination These kinds of theories whether they pertain to conspiracy theories or more subtly to a self styled critical way of thinking have always seemed to be the expression of a form of intellectual puerility This is not to say that attempts at manipulating opinions do not occur or that our world is free from compromised principles or indeed corruption far from it but none of this is the key issue In fact reality can somehow be even more unsettling than those myths however sophisticated they may be that envisage the media system hand in hand with industry science and so forth all in agreement so as to lead the people away from the truth It is more unsettling because the processes described in this book and that allow falsehood and dubiousness to take hold of the public sphere are boosted by the development of IT the workings of our minds and the very nature of democracy And finally it is more unsettling because we are all responsible for what is going to happen to us
