

# Exchange and Deception: A Feminist Perspective

Edited by C. Gerschlager & M. Mokre

# Exchange And Deception

**Kelly T. Tian, Bill Keep**

## **Exchange And Deception:**

Expanding the Economic Concept of Exchange Caroline Gerschlager, 2012-12-06 Exchange is a pervasive concept in everyday life affecting phenomena as diverse as interpersonal relationships and market transactions In addition economists have used the concept in a highly specific and clearly delineated way Against this background Expanding the Economic Concept of Exchange sets out to expand the concept of exchange by crossing the boundaries laid down by economists and by examining the function played by deceptions self deceptions and illusions The main motivation for expanding the concept of exchange was the realization that in the prototypical economic model deception is not taken into account Hence economists traditionally regard deception as some sort of irrationality as a flaw in an otherwise perfectly rational process Authors represented in this volume take a different approach examining deception as a constituent quality of exchange This is shown by the contributions drawing on recent developments in economic theory by those with an anthropological orientation as well as by a contribution referring specifically to Adam Smith An interrogation into deception is long overdue in economics This volume prepares the ground for and makes the first contributions to explicitly acknowledging deceptions self deceptions and illusions as fundamental dimensions allowing us as economists to further research and develop the concept of change A particular and perhaps unexpected focus of this volume lies on anthropology because economics can clearly benefit from integrating selected results on deception from outside its expanding domain It is primarily targeted at economists interested in institutional aspects of exchanges and social theory In addition the topic will find interested readers from anthropology cultural studies science studies philosophy

*Exchange and Deception: A Feminist Perspective* Caroline Gerschlager, Monika Mokre, 2002-08-31 This book aims at expanding and correcting malestream economic concepts of the exchange economy and its role in society by focusing on deception from a feminist economic perspective The main motivation for writing the book was the realization that the prototypical economic model of exchange is notable for the total absence of deception In standard economic models individuals are regarded as uncheatable Hence deception even if individuals have an interest in it cannot succeed By contrast the authors of this volume examine deception as the key to understanding the functioning of exchange by focusing on settings in which deception is successful in exchange The authors draw on Adam Smith's Theory of Moral Sentiments as a starting point for a discussion on feminist views and perspectives on exchange and deception This is supplemented by examinations of economic thought and traditional economic modelling within a feminist economic framework and by empirical insights into the situation of women

*Trust and Deception in Virtual Societies* Cristiano Castelfranchi, Yao-Hua Tan, 2013-03-09 One of the major problems in the development of virtual societies in particular in electronic commerce and computer mediated interactions in organizations is trust and deception This book provides analyses by various researchers of the different types of trust that are needed for various tasks such as facilitating on line collaboration building virtual communities and network organizations and even the design of effective and user

friendly human computer interfaces The book has a multi disciplinary character providing theoretical models of trust and deception empirical studies and practical solutions for creating trust in electronic commerce and multi agent systems

**Commutative Justice** Carl David Mildener, 2020-02-17 This book develops a liberal theory of justice in exchange It identifies the conditions that market exchanges need to fulfill to be just It also addresses head on a consequentialist challenge to existing theories of exchange namely that in light of new harms faced at the global level we need to consider the combined consequences of millions of market exchanges to reach a final judgment about whether some individual exchange is just The author argues that even if we accept this challenge the effect of it is minimal For different reasons normatively problematic collective market outcomes like externalities monopolies violations of the Lockean proviso inequality and commodification do not pose particular problems to the justice of market exchanges He outlines the various conditions a market exchange needs to fulfill to be considered just from a liberal background and in light of the new harms Ultimately he shows it is not the market which is to blame if we want to tackle issues like global warming or global economic injustice we should not blindly follow the intuition that we best restrain and regulate markets Commutative Justice is unique in its focus on justice in exchange rather than on end state distributive justice and the way in which it addresses the new harms we are facing today It will be of interest to researchers and advanced students in philosophy politics and economics who are working on questions of economic justice

The Adam Smith Review Vivienne Brown, 2006-10-31 The Adam Smith Review provides a unique forum for interdisciplinary debate on all aspects of Adam Smith's works his place in history and the significance of his writings for the modern world

Cooperative Agents N.J. Saam, B. Schmidt, 2013-06-29 Agent based modelling on a computer appears to have a special role to play in the development of social science It offers a means of discovering general and applicable social theory and grounding it in precise assumptions and derivations whilst addressing those elements of individual cognition that are central to human society However there are important questions to be asked and difficulties to overcome in achieving this potential What differentiates agent based modelling from traditional computer modelling Which model types should be used under which circumstances If it is appropriate to use a complex model how can it be validated Is social simulation research to adopt a realist epistemology or can it operate within a social constructionist framework What are the sociological concepts of norms and norm processing that could either be used for planned implementation or for identifying equivalents of social norms among co operative agents Can sustainability be achieved more easily in a hierarchical agent society than in a society of isolated agents What examples are there of hybrid forms of interaction between humans and artificial agents These are some of the sociological questions that are addressed

**Understanding Institutionalized Education** Roland Reichenbach, 2020-07-24 Currently the school as an institution is faced with a number of controversial expectations on behalf of society and politics in view of its significance effectivity and instrumentality Frequently applied tests and longitudinal studies should measure the performance level of our educational system constantly

but there is still an ongoing disagreement in terms of the organisation of schools and curricula This book opposes the monopolizing of the school arguing that it is irrelevant or guided by particular interests and recent tendencies that solely and primarily define the significance of school by its effectivity The text defends the school as a place that should enable young people to become sociable and as a place of self education In doing so it differentiates between pedagogical and extra pedagogical tasks of schools emphasises the importance of teachers as persons and stresses the contributions of curricula and education that are fundamental for social cohesion which are often not acknowledged in pedagogical theory The book's plea addresses student teachers and teachers of all subjects and school levels as well as everybody that is directly or indirectly affected by the transformation processes regarding this institution and who wants to engage in a pointedly critical discussion on current reforms

*The Primacy of Resistance* Marco Checchi, 2021-01-14 What is at the heart of political resistance Whilst traditional accounts often conceptualise it as a reaction to power this volume prioritising remarks by Michel Foucault invites us to think of resistance as primary The author proposes a strategic analysis that highlights how our efforts need to be redirected towards a horizon of creation and change Checchi first establishes a genealogy of two main trajectories of the history of our present the liberal subject of rights and the neoliberal ideas of human capital and bio financialisation The former emerges as a reactive closure of Etienne de la Boetie's discourse on human nature and natural companionship The other forecloses the creative potential of Autonomist Marxist conceptions of labour first elaborated by Mario Tronti The focus of this text then shifts towards contemporary openings Initially Checchi proposes an inverted reading of Jacques Rancière's concept of politics as interruption that resonates with Antonio Negri's emphasis on Baruch Spinoza's potential qua resistance Finally the author stages a virtual encounter between Gilles Deleuze's ontology of matter and Foucault's account of the primacy of resistance with which the text begins Through this series of explorations *The Primacy of Resistance* Power Opposition and Becoming traces a conceptual trajectory with and beyond Foucault by affirming the affinity between resistance and creation

**Encyclopedia of Deception** Timothy R. Levine, 2014-02-20 The Encyclopedia of Deception examines lying from multiple perspectives drawn from the disciplines of social psychology sociology history business political science cultural anthropology moral philosophy theology law family studies evolutionary biology philosophy and more From the little white lie to lying on a resume to the grandiose lies of presidents this two volume reference explores the phenomenon of lying in a multidisciplinary context to elucidate this common aspect of our daily lives Not only a cultural phenomenon historically lying is a frequent occurrence in our everyday lives Research shows that we are likely to lie or intentionally deceive others several times a day or in one out of every four conversations that lasts more than 10 minutes Key Features More than 360 authored by key figures in the field are organized A to Z in two volumes which are available in both print and electronic formats Entries are written in a clear and accessible style that invites readers to explore and reflect on the use of lying and self deception Each article concludes with cross references to related entries and further readings This

academic multi author reference work will serve as a general non technical resource for students and researchers within social and behavioral science programs who seek to better understand the historical role of lying and how it is employed in modern society     **Marcel Mauss** Wendy James,N. J. Allen,1998 Presents results of a September 1996 conference held at Oxford University re evaluating the importance of the writings and inspiration of Marcel Mauss the nephew and younger colleague of Emile Durkheim Explores not only the context of Mauss work and his influence on other writers but also the resonance of some of his key themes for the concerns of today s anthropology and sociology Papers are arranged in sections on the scholar and his time foundations of Maussian anthropology critiques of exchange and power and materiality body and history Annotation copyrighted by Book News Inc Portland OR     **The Retreat of Representation** Martha B.

Helfer,1996-03-28 Examines the notion of Darstellung representation in the critical discourse of German Idealism and Romanticism paying particular attention to Kant Fichte Novalis and Kleist     Customer Fraud and Business Responses Kelly T. Tian,Bill Keep,2001-12-30 From remarkably frank and credible responses to their comprehensive research questionnaire Tian and Keep provide a unique wide ranging catalogue of frauds that customers perpetrate on businesses and what marketers can do to combat it They were able to receive and analyze more than 250 written descriptions a 71% response rate of the acts that customers committed and the methods they used Instead of merely a checklist Tian and Keep obtained their data in the customers own words resulting in highly detailed and reliable insights into why customers did what they did They find that customer fraud has emerged as a form of guerilla warfare against companies that it is adapted to specific situations and that underlying customers motivation is a need to get even Ethics has little do with it In fact some respondents even asserted that they had an obligation to commit fraud they did it to retaliate against what they perceived as unethical acts that businesses committed against them The result is a rare documentation of the specifics of fraud how it threatens not only business but entire economies and the actions bold and subtle that marketers can take in self protective response Not only will corporate management particularly in marketing get detailed descriptions of their customers fraud strategies and tactics but they will also receive insights into where they are vulnerable and why Tian and Keep show that fraud has become so socially acceptable among middle class customers that they are willing to share their tactics strategies and secrets with their friends With this as their foundation the authors give practitioners an arsenal of detection and deterrence methods Equally important they provide ways to implement them without alienating their other blameless customers They also show marketers what they can do to reestablish trust in their marketing exchanges with customers and improve relationships in ways that will diminish if not fully eliminate the incidence of fraud For management generally as well as marketers in companies of all sizes and type Tian s and Keep s book is essential engrossing and useful reading     **Strategic Denial and Deception** James Wirtz,2017-09-29 Does foreign denial and deception threaten the interests of contemporary democracies Strategic denial and deception D Conditions Making for Success and Failure of D Conditions Making for Success and Failure

of D Conditions Making for Success and Failure of D Arms Control by Lynn M Hansen and Prescription Detecting Deception Practice Practitioners and Theory by Barton Whaley and Jeffrey Busby While there are previous books about celebrated D D cases from Troy to Pearl Harbor and D Day no work attempts to assess how these instruments o **Garner's Modern English Usage** Bryan A. Garner, 2022 Garner's Modern English Usage is one of the most influential style guides ever written for the English language With more than a thousand new entries 200 replacement entries and thoroughly updated usage data this fifth edition is fully abreast of the times and further establishes the author as the authority on effective writing

*Pascalian Meditations* Pierre Bourdieu, 2000 A brilliant example of Bourdieu's unique ability to link sociological theory historical information and philosophical thought **Stock Exchange Practices** United States. Congress. Senate. Committee on Banking and Currency, 1934 Rosin V. New York Stock Exchange, Inc, 1972 *The Palgrave Handbook of Deceptive Communication* Tony Docan-Morgan, 2019-04-29 Deception and truth telling weave through the fabric of nearly all human interactions and every communication context The Palgrave Handbook of Deceptive Communication unravels the topic of lying and deception in human communication offering an interdisciplinary and comprehensive examination of the field presenting original research and offering direction for future investigation and application Highly prominent and emerging deception scholars from around the world investigate the myriad forms of deceptive behavior cross cultural perspectives on deceit moral dimensions of deceptive communication theoretical approaches to the study of deception and strategies for detecting and deterring deceit Truth telling lies and the many grey areas in between are explored in the contexts of identity formation interpersonal relationships groups and organizations social and mass media marketing advertising law enforcement interrogations court politics and propaganda This handbook is designed for advanced undergraduate and graduate students academics researchers practitioners and anyone interested in the pervasive nature of truth deception and ethics in the modern world Honorable Business James R. Otteson, 2019-01-30 Business has a bad name for many people It is easy to point to unethical and damaging behavior by companies And it may seem straightforward to blame either individuals or more generally ruthless markets and amoral commercial society In *Honorable Business* James R. Otteson argues that business activity can be valuable in itself The primary purpose of honorable businesses is to create value for all parties They look for mutually voluntary and mutually beneficial transactions so that all sides of any exchange benefit leading to increasing prosperity not just for one person or for one group at the expense of others but simultaneously for everyone involved Done correctly honorable business is a positive sum activity that can enable flourishing for individuals and prosperity for society Otteson connects honorable business with the political economic and cultural institutions that contribute to a just and humane society He builds on Aristotle's conception of human beings as purposive creatures who are capable of constructing a plan for their lives that gives them a chance of achieving the highest good for humanity focusing on autonomy and accountability as well as good moral judgment This good judgment can enable us to answer the why of what

we do not just the how He also draws on Adam Smith s moral philosophy and political economy and argues that Smithian institutions have played a significant role in the remarkable increase in worldwide prosperity we have seen over the last two hundred years Otteson offers a pragmatic Code of Business Ethics linked to a specific conception of professionalism and defends this Code on the basis of a moral mandate to use one s limited resources of time talent and treasure to provide value for oneself only by simultaneously providing value to others The result is well articulated parameters within which business can be an acceptable perhaps even praiseworthy activity      **United States Code, 1994 Edition** United States,1995

## **Exchange And Deception** Book Review: Unveiling the Magic of Language

In a digital era where connections and knowledge reign supreme, the enchanting power of language has are more apparent than ever.
