Our Magnetic Earth Ronald T. Merrill, 2011-01-15 For the general public magnetism often seems more the province of new age quacks movie mad scientists and grade school teachers than an area of actual ongoing scientific inquiry But as Ronald T Merrill reveals in *Our Magnetic Earth* geomagnetism really is an enduring vibrant area of science one that offers answers to some of the biggest questions about our planet's past and maybe even its future In a clear and careful fashion he lays out the physics of geomagnetism and magnetic fields then goes on to explain how Earth's magnetic field provides crucial evidence for our understanding of continental drift and plate tectonics how and why animals ranging from bacteria to mammals sense and use the magnetic field how changes in climate over eons can be studied through variations in the magnetic field in rocks and much more Throughout Merrill peppers his scientific account with bizarre anecdotes and fascinating details from levitating pizzas to Moon missions to blackmailing KGB agents a reminder that real science can at times be stranger and more amusing than fiction A winning primer for anyone who has ever struggled with a compass or admired a ragged V of migrating geese *Our Magnetic Earth* demonstrates that education and entertainment need not be polar opposites

A New Heaven and a New Earth J. Richard Middleton, 2014-11-25 In recent years, more and more Christians have come to appreciate the Bible's teaching that the ultimate blessed hope for the believer is not an otherworldly heaven; instead, it is full-bodied participation in a new heaven and a new earth brought into fullness through the coming of God's kingdom. Drawing on the full sweep of the biblical narrative, J. Richard Middleton unpacks key Old Testament and New Testament texts to make a case for the new earth as the appropriate Christian hope. He suggests its ethical and ecclesial implications, exploring the difference a holistic eschatology can make for living in a broken world.

Trambu Donna Louise, 2004-11-06 What if your planet's first contact with Earth was a mistake and you were it? Trambu never meant to crash-land on Earth. He was only supposed to observe from afar. But one wrong move in his tiny Pinderbay spacemobile and suddenly he's face-first in a swirl of blue and green, helplessly spiraling toward an unknown world. Stranded, invisible, and very much alone, Trambu's first encounter with Earth is windy. Then he meets Katie, a curious Earthling who can't see his ship or his favorite color. Juddle. What begins as a clumsy introduction soon grows into a cross-planet friendship full of surprising discoveries. But when Trambu's home planet contacts him with a surprising offer: stay on Earth and become a Prodee, a teacher of his people, he must decide: go home or explore a new world filled with danger, pizza, invisible spaceships, and very strange Earth customs. Can one small alien learn enough about Earth to change the future of two planets?
