Local And Regional Systems Of Innovation:

Local and Regional Systems of Innovation John de la Mothe, Gilles Paquet, 2012-12-06 In an era of intense globalization the critical role of the region as a center for economic development has sometimes been overlooked Moreover innovation is increasingly being recognized as being a critical driver of economic growth and development However innovation is no longer being seen as a function of research and development nor is R D being seen as being sufficient for the creation of technology intensive industries and the valuable economic spillovers that result in high value added jobs and exports Indeed much more than ever before it is the combination of factors that contributes to innovation ranging over skills finance production user producer linkages the capacity of organizations to learn and multilayered government policies that make local regions the favorites of fortune Using an evolutionary economic perspective and drawing on a range of disciplines and accomplished scholars Local and Regional Systems of Innovation explores important issues at a conceptual methodological and comparative level concerning how successful locations actually construct their comparative advantage

Local and Regional Development Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andres Rodriguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue For localities and regions the challenge of enhancing prosperity improving wellbeing and increasing living standards has become acute for localities and regions formerly considered discrete parts of the developed and developing worlds Amid concern over the definitions and sustainability of development a spectre has emerged of deepened unevenness and sharpened inequalities in the development prospects for particular social groups and territories Local and Regional Development engages and addresses the key questions what are the principles and values that shape definitions and strategies of local and regional development What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development What are the main policy interventions and instruments How do localities and regions attempt to effect development in practice What kinds of local and regional development should we be pursuing This book addresses the fundamental issues of what kind of local and regional development and for whom frameworks of understanding and instruments and policies It outlines what a holistic progressive and sustainable local and regional development might constitute before reflecting on its limits and political renewal With the growing international importance of local and regional development this book is an essential student purchase illustrated throughout with maps figures and case studies from Asia Europe and Central and North America

Multinational Corporations and European Regional Systems of Innovation John Cantwell, Simona Iammarino, 2005-06-27 In globalising economies particularly those going through a process of economic integration such as those economies within the EU regions forge an increasing number of linkages with other locations within and across national borders This is largely carried out by the technological efforts of Multinational Corporations MNCs This book explores the regional dimension of Europe in terms of localised technological comparative advantages and the location of

innovative activities by MNCs Using an empirical analysis John Cantwell and Simona Iammarino cover such important themes as MNC technological activities and economic wealth MNCs and the regional systems of innovation in Italy UK Germany and France the geographical hierarchy across European national borders **Canada's Regional Innovation System** Jorge Niosi,2005-01-12 While aerospace and aircraft form two poles in Montreal and Toronto Ottawa is Canada's centre for semiconductor and telecommunication innovation Niosi explores how these regional configurations are shaped by national and provincial public policy incentives **Innovation and Regional Growth in the European Union** Riccardo Crescenzi,Andrés Rodríguez-Pose,2011-06-17 This book investigates the EU's regional growth dynamics and in particular the reasons why peripheral and socio economically disadvantaged areas have persistently failed to catch up with the rest of the Union It shows that the capability of the knowledge based growth model to deliver its expected benefits to these areas crucially depends on tackling a specific set of socio institutional factors which prevents innovation from being effectively translated into economic growth The book takes an eclectic approach to the territorial genesis of innovation and regional growth by combining different theoretical strands into one model of empirical analysis covering the whole EU 25 An in depth comparative analysis with the United States is also included providing significant insights into the distinctive features of the European process of innovation and its territorial determinants The evidence produced in the book is extensively applied to the analysis of EU development policies **Handbook of Regional Innovation and Growth** Philip Cooke,Bjørn Asheim,Ron Boschma,Ron Martin,Dafna Schwartz,Franz Tödtling,2011-01-01 Today economic growth is widely understood to be conditioned by productivity increases which are in turn profoundly affected by innovation This volume explores these key relationships between innovation and growth bringing together experts from both fields to compile a unique Handbook The Handbook considers innovation from fresh perspectives encompassing topics such as services innovation inward investment and innovation creative industry innovation and green innovation It is divided into seven sections dealing with regional innovation and growth theory dynamics evolution agglomeration innovation worlds innovation system institutions and innovation governance and policy This definitive compendium on regional innovation and growth will undoubtedly appeal to teachers students researchers and practitioners of innovation and growth dynamics worldwide **Regional Innovation Policy for Small+Medium Enterprises** Bjørn T. Asheim,Arne Isaksen,Claire Nauwelaers,Franz Tödtling,2003-08-26 A must read for academics and regional planners alike who wish to understand the workings of a regional innovation system The authors have given a fresh comprehensive and sound analysis which offers an excellent framework for regional innovation policy design Mikel Landabaso European Commission Brussels Belgium This book provides an extensive evaluation of the numerous policy instruments used by regional governments in Europe to promote innovation activity in Small and Medium sized Enterprises SMEs The instruments are compared and benchmarked in order to identify good practice in an effort to bridge the gap between the theory of regional innovation and real world policy implementation Rethinking Regional

Innovation and Change: Path Dependency or Regional Breakthrough Gerhard Fuchs, Philip Shapira, 2006-02-17 Rethinking Regional Innovation and Change brings together papers from leading international scholars in the field of regional development and policy. The contributors examine the interactions between path dependent developments, institutions and governance structures that influence regional innovation capacity. Up to date case studies present diverse theoretical perspectives from economics, political science, geography, planning and public policy. Taken as a whole, the volume offers a broad and up to date perspective on the inheritance aspect of an area's future. Without exception, the chapters are insightful, interesting and a pleasure to read. Let us hope that this excellent work will find its way to the desks of authorities in charge for regional policy. If anything, the book still urges policy makers to start from the simple piece of wisdom that regions tend to go from where they are coming. Paradoxically, it is from this very notion of path dependency that most regional breakthroughs can be expected. Gert Jan Hospers, *Regions* Volume 256, April 2005.

Technopolis Deog-Seong Oh, Fred Phillips, 2013-12-13 Six years of UNESCO World Technopolis Association workshops held at various world cities and attended by government officials and scholars from nearly all the world's countries have resulted in a uniquely complete collection of reports on science park and science city projects in most of those countries. These reports, of which a selected few form chapters in this book, allow readers to compare knowledge based development strategies, practices and successes across countries. The chapters illustrate varying levels of cooperation across government, industry and academic sectors in the respective projects and the reasons and philosophies underlying this variation and resulting differences in practices and results. *International Conference on Applications and Techniques in Cyber Security and Intelligence ATCI 2018* Jemal Abawajy, Kim-Kwang Raymond Choo, Rafiqul Islam, Zheng Xu, Mohammed Atiquzzaman, 2018-11-05 The book highlights innovative ideas, cutting edge findings and novel techniques, methods and applications touching on all aspects of technology and intelligence in smart city management and services. Above all, it explores developments and applications that are of practical use and value for Cyber Intelligence related methods which are frequently used in the context of city management and services.

Regional Innovation Systems - An Analysis of Innovation Policy Instruments Michael Bison, 2007-02-01 Inhaltsangabe Abstract Innovation is essential for the competitiveness of companies within the globalised knowledge economy. In the actual situation of high unemployment rates in most western countries, public economy support works thereby actively on the improvement of innovation activity conditions. The regional level is for this attempt the most interesting spatial entity because of its high significance in global economic mechanisms. The questions motivating this master thesis are: how regional innovation policy can improve a regional innovation system and which of the possible policy instruments the most effective ones are to combat unemployment. Innovations are the new combination of recent or established knowledge whose implementation had a noticeable effect on the performance of the organisation it was implemented in. This includes product, process, organisational and people innovations. Innovations are not anymore an individual effort but a process which involves many actors and

institutions The basis for the exploration of how to support the development and implementation of these innovations is the regional innovation system approach It divides the innovation process into phases and their linkages and allows identifying analytically the evolved actors and the weaknesses of the innovation process The analysis of innovation policy instruments assigns each weakness within the innovation process an instrument which is explained and analysed in detail The examined instruments are competence centres start up centres science parks networks regional knowledge management and diffusion agencies Each instrument's function and its main characteristics get described together with a best practice example which leads to a conclusion on its effects on innovation and employment The result of the analysis is that competence centres start up centres and science parks are central instruments and have the highest potential for employment effects Networks regional knowledge management and diffusion agencies are more supporting measures that improve the performance of the first three For the success of all instruments their combination with each other and the utilisation of synergies and dependencies between them is essential A holistic concept including all instruments is the most effective way to support regional innovation processes These findings get transferred to the case study region Bonn where as an example for an

Informal Sector Innovations Mammo Muchie, Saradindu Bhaduri, Angathevar Baskaran, Fayaz Ahmad Sheikh, 2017-10-02 It is well documented that the space of informal economic activity is rising across the globe This rise has been particularly significant in the least developed and developing countries especially after the onset of neo liberal policies and withdrawal of welfare state There has also been a shift in academic thinking on informal sector with attempts being made to understand the contribution of informal sector in generating employment and economic growth rather than focusing solely on exploitative labour conditions in these economic activities Indeed with the retreat of welfare state and the introduction of contract labour in the formal sector many issues related to occupational hazards and improper labour conditions do not remain unique to the informal sectors of the economy particularly in less developed countries This volume addresses a specific concern the issue of knowledge generation and innovative activities which lies at the core of sustained competitive advantage of these activities The chapters in this book were originally published in the African Journal of Science Technology Innovation and Development

Regional Innovation, Knowledge and Global Change Zoltan Acs, 2013-12-19 First Published in 1999 The process of globalization is shaped and reinforced by a rapidly changing knowledge environment As economies become less constrained national frontiers they become more geographically specialized Thus important elements of the innovation process tend to become regional rather than national In this new environment large corporations are weakening their links with their home country spreading their innovation activities to source different regional systems of innovation Regional networks of firms are creating new forms of learning and production The aim of this book is to broaden both conceptually and empirically the national systems of innovation approach developed by Lundvall Freeman Nelson and others While recognizing the creative nature of economic adjustment in a turbulent world and the highly uneven distribution of economic growth the national

systems approach lacks a mechanism by which to understand innovation when realistic unit of analysis is no longer the nation state Written by leading scholars in the field this book provides a ground breaking examination of sub regional systems of innovation in an interconnected global economy **Hungarian Spaces and Places** Györgyi Barta,2005

Enacting Regional Dynamics and Entrepreneurship Bengt Johannisson,Åsa Lindholm Dahlstrand,2013-09-13 In present digital times the focus is on globalization and the dynamics and complexities that it creates However in spite of being dominated by technology the world remains populated by human beings practising a localized everyday life This contrast should challenge every researcher who is concerned with business and societal development and how that is contingent upon the institutional and cultural national context In this book Swedish researchers reflect upon entrepreneurship as a possible mediator between local and global economic and social concerns Using as a point of departure the tensions between a functional footloose rationale and a territorial rationale tied to place the authors provide different aspects on regional development in a globalised world A shared concern is the importance of recognizing the many appearances of entrepreneurship that brings it beyond being an innovative force in the market The book thus presents different strategies and tactics for pursuing localized economic development and it also critically reviews adopted public support programmes and measures of the local business climate The conclusive message is that only by bridging the functional and territorial views will it be possible to sustain and possibly enhance economic and social life in local places as well as in our shared world This book was originally published as a special issue of European Planning Studies **Strategic Science in the Public**

Kinder,Jeff Kinder,2007-01-01 The past twenty years have seen considerable shifts and struggles in government science that is in the way the state funds supports regulates conducts and uses scientific and technological activity Focusing on federal labs and agencies Strategic Science in the Public Interest explores how these labs have been located within and often buried by the larger commercially focussed federal innovation agenda G Bruce Doern and Jeffrey S Kinder examine four labs whose mandates deal with the Alberta oil sands environmental technologies wildlife research and mining and metals respectively The authors use these cases to explain why a better middle level approach to analysis is needed for strategic public interest centred government science They illustrate the importance of understanding the variety as well as the similarity of federal science and technology labs and agencies and of instituting policies that reflect this diversity The growing importance of Related Science Activities RSA is also explored as well as the core trade offs between commercial and public goods science in their mandates and their internal capacities *Applied Social Science*

Research in a Regional Knowledge System Hans Christian Garmann Johnsen,Elisabet S. Hauge,May-Linda Magnussen,Richard Ennals,2016-10-04 With the changing economic environment the Editors question what impact this will have on applied researchers around the world What can we learn from their cases What can one region learn from another With increased pressure on researchers to achieve academic reputation how does this fit with the demands for greater

practical applicability For them applied research is seen as a vital part of the infrastructure for economic and social development in the region and beyond **Growth Cultures** Philip Cooke,2013-08-21 This groundbreaking book is the first comparative analysis of the relative strengths of global bioregions An excellent empirically based study it is a must read for those in the areas of technology and society science policy and economic geography Mobility nodes as innovation hubs Manfred Schrenk,2008 ,
