Management Aptitude of Entrepreneurs Dan J. Knutson, 2014-01-14 First Published in 2000 The basic problems investigated in this book arose from the author's speculation that many individuals who have what it takes to be an entrepreneur may simply not have what it takes to be an effective manager In fact some of the characteristics that are essential to the entrepreneurial drive may be detrimental to the development of solid management skills This may be one reason that so many entrepreneurs fail in business Certain elements in their personality make up may actually prevent them from being or even becoming good managers The overall objective of the study was to learn if there is a significant relationship between entrepreneurs and professional managers in terms of their basic aptitudes toward managing The research was carried out by examining a number of the most important underpinning psychosocial aspects that have been demonstrated as valid predictors of management performance **Geopolitics** Bert Chapman, 2011-04-07 This concise introduction to the growth and evolution of geopolitics as a discipline includes biographical information on its leading

historical and contemporary practitioners and detailed analysis of its literature An important book on a topic that has been neglected for too long Geopolitics A Guide to the Issues will provide readers with an enhanced understanding of how geography influences personal national and international economics politics and security The work begins with the history of geopolitics from the late 19th century to the present then discusses the intellectual renaissance the discipline is experiencing today due to the prevalence of international security threats involving territorial airborne space based and waterborne possession and acquisition The book emphasizes current and emerging international geopolitical trends examining how the U S and other countries including Australia Brazil China India and Russia are integrating geopolitics into national security planning It profiles international geopolitical scholars and their work and it analyzes emerging academic military and governmental literature including gray literature and social networking technologies such as blogs and Twitter
