Shaping the College Curriculum Lisa R. Lattuca, Joan S. Stark, 2009-08-17 Shaping the College Curriculum focuses on curriculum development as an important decision making process in colleges and universities The authors define curriculum as an academic plan developed in a historical social and political context They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs By exploring the interaction of these elements in context they use the academic plan model to

clarify the processes of course and program planning enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning This revised edition continues to stress research based educational practices The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions All chapters have been updated with recent research findings relevant to curriculum leadership accreditation assessment and the influence of academic fields while two new chapters focus directly on learning research and its implications for instructional practice A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are engaged in extensive program improvements Streamlined yet still comprehensive and detailed this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning designing delivering evaluating and studying curricula in higher education This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will The book brings coherence and intention to what is typically an unstructured haphazard and only partially rational process guided more by beliefs than by empirically grounded substantive information Lattuca and Stark present their material in ways that are accessible and applicable across planning levels course program department and institution local settings and academic disciplines It s an admirable and informative marriage of scholarship and practice and an insightful guide to both Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book Patrick T Terenzini distinguished professor and senior scientist Center for the Study of Higher Education The Pennsylvania State University

Creating Interdisciplinary Campus Cultures Julie Thompson Klein, 2010-01-11 Praise for *Creating Interdisciplinary Campus Cultures* Klein s analysis shows convincingly that from research in the sciences to new graduate level programs and departments to new designs for general education interdisciplinarity is now prevalent throughout American colleges and universities Klein documents trends traces historical patterns and precedents and provides practical advice Going directly to the heart of our institutional realities she focuses attention on some of the more challenging aspects of bringing together ambitious goals for interdisciplinary vitality with institutional budgetary and governance systems A singular strength of this book then is the practical advice it provides about such nitty gritty issues as program review faculty development tenure and promotion hiring and the political economy of interdisciplinarity We know that readers everywhere will find this book simultaneously richly illuminating and intensively useful from the foreword by Carol Geary Schneider president Association of American Colleges and Universities Klein reveals how universities can move beyond glib rhetoric about being interdisciplinary toward pervasive full interdisciplinarity Institutions that heed her call for restructured intellectual environments are most likely to thrive in the new millennium William H Newell professor Interdisciplinary Studies Miami

University and executive director Association for Integrative Studies In true interdisciplinary fashion Julie Klein integrates a tremendous amount of material into this book to tell the story of interdisciplinarity across the sciences social sciences and humanities And she does so both from the theoretical perspective of understanding interdisciplinarity and from the practical vantage of doing interdisciplinarity This book is a must read for faculty and administrators thinking about how to maximize the opportunities and minimize the challenges of interdisciplinary programming on their campuses Diana Rhoten director Knowledge Institutions Program and director Digital Media and Learning Project Social Science Research Counsel **A Sense of Belonging** Hilton Scott,2022-03-08 This book takes an interdisciplinary approach to a societal challenge that both affects and is affected by the church in multi racial multi cultural and otherwise pluralistic communities In certain contexts around the world there are pertinent examples of the struggles that come with learning to live together in the midst of diversity and plurality such as the post apartheid Republic of South Africa However these more often than not racial and cultural struggles could be eased by developing worship services that are more relevant and inclusive This in turn should instil a sense of belief and a way of inclusive thinking culminating in more inclusive living The approach developed in this book stems from the aphorism *lex orandi lex credendi lex con vivendi* or as we pray so we believe so we live together

Undisciplining Knowledge Harvey J. Graff,2015-08-01 The first critical history of interdisciplinary efforts and movements in the modern university Interdisciplinarity or the interrelationships among distinct fields disciplines or branches of knowledge in pursuit of new answers to pressing problems is one of the most contested topics in higher education today Some see it as a way to break down the silos of academic departments and foster creative interchange while others view it as a destructive force that will diminish academic quality and destroy the university as we know it In Undisciplining Knowledge acclaimed scholar Harvey J Graff presents readers with the first comparative and critical history of interdisciplinary initiatives in the modern university Arranged chronologically the book tells the engaging story of how various academic fields both embraced and fought off efforts to share knowledge with other scholars It is a story of myths exaggerations and misunderstandings on all sides Touching on a wide variety of

disciplines including genetic biology sociology the humanities communications social relations operations research cognitive science materials science nanotechnology cultural studies literacy studies and biosciences the book examines the ideals theories and practices of interdisciplinarity through comparative case studies Graff interweaves this narrative with a social institutional and intellectual history of interdisciplinary efforts over the 140 years of the modern university focusing on both its implementation and evolution while exploring substantial differences in definitions goals institutional locations and modes of organization across different areas of focus Scholars across the disciplines specialists in higher education administrators and interested readers will find the book s multiple perspectives and practical advice on building and operating and avoiding fallacies and errors in interdisciplinary research and education invaluable Professional Discourse across Medicine, Law, and Other Disciplines Girolamo Tessuto, Richard Ashcroft, Vijay K. Bhatia, 2023-04-03 This volume provides a stage for an extensive exploration of the interface between medicine law and other disciplines or professions It offers the reader opportunities to understand how this integrative interactive interdisciplinary process can be examined through the lenses of language discourse and communication Contributions cover cross wise issues raised by paradigmatic cases of bioethics and law nursing ethics and law pharmacy ethics and law bioethics and religion risk management and ethics social inclusion and bioethics and environmental ethics *Innovative Assessment in Higher Education* Cordelia Bryan, Karen Clegg, 2006-09-27 Throughout higher education assessment is changing driven by increased class size changing curricula and the need to support students better At the same time assessment regulations and external quality assurance demands are constraining assessment options driven by worries about standards reliability and plagiarism Innovative Assessment in Higher Education explores the difficulty of changing assessment in sometimes unhelpful contexts Topics discussed include problems with traditional assessment methods rationales behind different kinds of innovation in assessment complex assessment contexts in which teachers attempt to innovate innovation in assessment within a range of academic settings theoretical and empirical support for innovations within higher education More than a how to do it manual this book offers a unique mix of useful pragmatism and scholarship A vital resource for higher education teachers and their educational advisors it provides a fundamental analysis of the role and purpose of assessment and how change can be managed without compromising standards **STEM, Theatre Arts, and Interdisciplinary Integrative Learning** Nancy Kindelan, 2022-09-30 This book responds to challenging questions about curricular realignment especially how a more porous approach to higher education reduces the impact of a siloed curriculum lessens the tendency toward the fragmentation of knowledge allows for the development of cross disciplinary explorations and promotes new approaches to knowledge and creativity through interdisciplinary integrative learning This volume demonstrates how combining two seemingly disparate cultures helps undergraduate students develop creative mindsets needed for addressing challenging open ended questions complex social issues and non routine problem solving In doing so this book aims to stimulate discussions about integrative interdisciplinary

education between STEM and other fields of performance and performance technologies that have been either overlooked or underdeveloped

Towards Fairer Geo-Spiritual Ecosystems S. Sergio Saleem Scatolini, 2024-11-26 This edited book looks at society education language and spirituality through international multicultural and critical lenses As the elite now eye the colonisation of biology and outer space we must surmount narratives subservient to privilege and power which explains the book s decolonial agenda The rise of AI and biotechnologies has opened the door to a future where the place of humanity and human intelligence in the universe will be understood and experienced differently Evolution shall move beyond natural human intelligence and biology If we want more inclusive fair and sustainable futures we must articulate new narratives and spiritualities that can harmonise science technology and religious wisdom But to re evaluate the human self and society and their intersection with the non human world we must recognise and neutralise the underlying currents of

privilege and power in education language and religion
