Object-oriented Programming with C++ Anita C. Millspaugh,1999 The trend in programming design is moving towards an object oriented approach This is due to many influences in the evolution of software and hardware As many systems become graphically interfaced and the demand for easier to use software increases the program complexity expands dramatically A solution to the complexity of programs is to develop them using an approach resembling the real life relationship of objects The traditional structured approach to programming is limited through its treatment of data and actions as distinct entities By dealing with data and instructions as interwoven items the ability to develop reusable code is enhanced Object oriented programming in C requires an understanding of encapsulation of data classes polymorphism overloading and inheritance of classes **Computers for Beginners Using Windows 98** Cia Training Ltd Staff,2002-07

Making Nonprofits Work Paul C. Light,2011-04-01 The nonprofit sector has never been under greater pressure to prove itself With missions expanding and funding never more competitive the sector suffers from a general impression that it is less efficient and more wasteful than its government and private competitors Its funders be they governments charitable foundations or individual givers have never seemed so insistent about economy and results while its clients be they communities or individuals have never been more demanding about efficiency and responsiveness How the nonprofit sector does its work is becoming almost as important to funders and clients as what the sector actually delivers by way of goods and services The problem is that there is virtually no agreement on just how nonprofits can improve Unlike the federal government the nonprofit sector is still at the beginning of its reform journey and its networks of consultants management associations and scholars are only beginning to develop the research base to know what reforms might work under what conditions In Making Nonprofits Work Paul C Light charts the current trends of management reform in the nonprofit sector and assesses the climate for reform at the local and national levels Light examines the four popular philosophies or tides being advocated scientific management liberation management war on waste and watchful eye offering examples and caveats from a portfolio of recent experience Drawing on confidential interviews with leaders in nonprofit management reform a detailed search of Internet sources and a survey of state associations of nonprofit organizations Light s findings suggest that the nonprofit sector has a remarkable opportunity to prevent the excesses and fadism that have

dominated reform efforts in government and the private sector He cautions leaders in the nonprofit sector to recognize the limits of various reform models to set priorities carefully and to limit investments of reform energy PC Mag ,1997-06-10
