*Money and the Governance of Punishment* Patricia Cabana,2017-06-26 Money is the most frequently means used in the legal system to punish and regulate Monetary penalties outnumber all other sanctions delivered by criminal justice in many jurisdictions imprisonment included More people pay fines than go to prison and in some jurisdictions many of those in prison are there because of failure to pay their fines Therefore it is surprising how little has been written in the Anglophone academic world about the nature of money sanctions and their specific characteristics as legal sanctions In many ways legal innovations related to money sanctions have been poorly understood This book argues that they are a direct consequence of the changing meaning of money Considering the meaninglessness of modern money the book aims to examine the history of changing conceptions in how fines have been conceived and used Using a set of interpretative techniques sensitive to how money and freedom are perceived the genealogy of the penal fine is presented as a story of constant reformulation in response to shifting political pressures and changes in intellectual developments that influenced ideological commitments of legislators and practitioners This book is multi disciplinary and will appeal to those engaged with criminology sociology and philosophy of punishment socio legal studies and criminal law

**Psychology and Law** Andreas Kapardis,2003 This book is the authoritative work for students and professionals in psychology and law

**The Nature of Expertise** Michelene T.H. Chi,Robert Glaser,Marshall J. Farr,2014-01-02 Due largely to developments made in artificial intelligence and cognitive psychology during the past two decades expertise has become an important subject for scholarly investigations The Nature of Expertise displays the variety of domains and human activities to which the study of expertise has been applied and reflects growing attention on learning and the acquisition of expertise Applying approaches influenced by such disciplines as cognitive psychology artificial intelligence and cognitive science the contributors discuss those conditions that enhance and those that limit the development of high levels of cognitive skill

**The Criminological Foundations of Penal Policy** Lucia Zedner,Andrew Ashworth,2003 The Criminological Foundations of Penal Policy brings together leading international criminologists to examine the link between the fruits of criminological research and the development of criminal justice policy This volume includes comparative discussions of the United States Germany Australia England and Wales It is divided into four parts Part 1 discusses the theoretical issues surrounding the relationship between public policy and the discipline of criminology Part 2 consists of three essays exploring historical aspects of that relationship Part 3 then examines three distinct areas of penal policy sentencing policing and parole as case studies of the influence of

research upon the development of policy Finally in Part 4 which is explicitly devoted to international comparisons there is a consideration of the factors that distinguish research projects that do influence criminal justice policy from those that appear not to The Criminological Foundations of Penal Policy is a volume in honour of Roger Hood Professor of Criminology and Director of the Centre for Criminological Research in the University of Oxford Decisions to Imprison Rasmus H. Wandall, 2016-05-13 Rasmus Wandall uses quantitative and qualitative methods from studies carried out in Denmark to address the formal and informal norms and ideologies that are used to generate decisions to imprison Focusing on the operations of the courtroom participants his work investigates how court decision making is organized to allow the sentencing procedure to be open to more than its formal legal framework while at the same time keeping the sentencing within the boundaries of law and legal validity The author uses the theory of law's operational closure developed by Niklas Luhmann The theory provides an advantageous point of departure to capture the close and subtle interactions between law's need for validity and for contextual openness in every legal operation including court decision making

**Key Issues in Criminology** Roger G. Hood, 1970 A Child's Guide to Crime Allan Johnston Nixon, 1974 **Policing the Rural Crisis** Russell Hogg, Kerry Carrington, 2006 There is a growing sense of crisis in rural ways of life which manifests itself in economic decline depopulation depleted environments and a crisis of rural identities Crime is one potent marker of crisis the more so as it spoils the image of healthy cohesive community The social reaction it elicits the policing of this other rural is also a guide to the dimensions of crisis The social sciences have witnessed a renewed international interest in the study of other rurals the neglected invisible or excluded aspects of country life This book brings a fresh approach to the study of crime that challenges the urban centric assumptions of much western criminology and sociology It explores rural crime and social reactions to it in relation to processes and patterns of community formation and change in rural Australia including the social economic cultural and political forces shaping the history structure and everyday life of rural communities Policing the Rural Crisis is based on five years of extensive original empirical research in rural and regional Australia It draws on ideas and debates in contemporary social theory across several disciplines making the analysis relevant to the study of crime and social change elsewhere
