

GOD'S UTILITY FUNCTION

Richard Dawkins

Chapter from River Out of Eden

My clerical correspondent of the previous chapter found faith through a wasp. Charles Darwin lost his with the help of another: "I cannot persuade myself," Darwin wrote, "that a beneficent and omnipotent God would have designedly created the Ichneumonidae with the express intention of their feeding within the living bodies of Caterpillars." Actually Darwin's gradual loss of faith, which he downplayed for fear of upsetting his devout wife Emma, had more complex causes. His reference to the Ichneumonidae was aphoristic. The macabre habits to which he referred are shared by their cousins the digger wasps, whom we met in the previous chapter. A female digger wasp not only lays her egg in a caterpillar (or grasshopper or bee) so that her larva can feed on it but, according to Fabre and others, she carefully guides her sting into each ganglion of the prey's central nervous system, so as to paralyze it but not kill it. This way, the meat keeps fresh. It is not known whether the paralysis acts as a general anesthetic, or if it is like curare in just freezing the victim's ability to move. If the latter, the prey might be aware of being eaten alive from inside but unable to move a muscle to do anything about it. This sounds savagely cruel but, as we shall see, nature is not cruel, only pitilessly indifferent. This is one of the hardest lessons for humans to learn. We cannot admit that things might be neither good nor evil, neither cruel nor kind, but simply callous-indifferent to all suffering, lacking all purpose.

Gods Utility Function:

God's Utility Function Richard Dawkins, 1995-12-22 **The Question of God** Michael Palmer, 2001 This invaluable text introduces the six great arguments for the existence of God It requires no specialist knowledge of philosophy and includes a wealth of primary sources from classic and contemporary texts **God's Good Earth** Jon Garvey, 2019-01-14 God's world was created very good Genesis chapter 1 tells us and in this book Jon Garvey rediscovers the truth known to the Church for its first 1500 years but largely forgotten now that the fall of mankind did not lessen that goodness The natural creation does not require any apologies or excuses but rather celebration and praise The author's re-examination of the scriptural evidence the writings of two millennia of Christian theologians and the physical evidence of the world itself lead to the conclusion that we both as Christians and as modern Westerners have badly misunderstood our world Restoring a truer vision of the goodness of the present creation can transform our own lives sharpen the ministry of the church to the world of both people and nature and give us a better understanding of what God always intended to bring about through Christ in the age to come **River Out of Eden** Richard Dawkins, 2008-08-04 How did the replication bomb we call life begin and where in the world or rather in the universe is it heading Writing with characteristic wit and an ability to clarify complex phenomena the New York Times described his style as the sort of science writing that makes the reader feel like a genius Richard Dawkins confronts this ancient mystery **Oracles of Science** Karl Giberson, Mariano Artigas, 2009-02-27 Oracles of Science examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don't reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic **God Is!** A. Arthur Pinno, 2011 GOD IS why evolution isn't demonstrates how the nature character of GOD is the death knell to the modern mythology of evolution as it is to all human mythologies There is much confusion among Christians and the general public regarding creation and evolution and what each implies about the nature of GOD This book by A Arthur

Pinno seeks to bring Biblical clarity to many of the questions that people have in this area Does the universe testify to the glory of GOD Is GOD s signature found in every cell GOD vs Nothing Where do you think everything came from Are humans mutated apes How does dinosaur blood reveal a young earth How does the relativity of time impact the age of the universe Is evolution a massive worldwide conspiracy of scientists Is theistic evolution a bridge between Christianity and science What are the basic assumptions of evolution What are the fruits of the evolutionary tree Were Adam and Eve real people What did JESUS believe about creation and the flood Who is GOD and how can anyone actually know Him Could a GOD of love create hell A Arthur Pinno is the director of Ends of the Earth Courier for CHRIST a ministry dedicated to sharing the grace and truth of CHRIST in word and deed in Canada Russia India Burundi and other ends of the earth where GOD leads He has been a pastor for over twenty five years serving in both Canada and the United States For the past six years he has also served as president of the Association of Free Lutheran Congregations Canada He and his wife Dorothy have been blessed with four children and presently live in Vernon British Columbia Canada

The Customization of Science S. Fuller,M. Stenmark,U. Zackariasson,2014-07-23 This collection explores whether and how religious and secular worldviews and political ideologies held by scientists citizens decision makers and politicians influence science as practiced and understood today Contributors explore the social and scientific repercussions of customizing science to fit the needs and interests of various groups

Transhumanism Andrew Pilsch,2017-08-15 Transhumanism posits that humanity is on the verge of rapid evolutionary change as a result of emerging technologies and increased global consciousness However this insight is dismissed as a naive and controversial reframing of posthumanist thought having also been vilified as the most dangerous idea in the world by Francis Fukuyama In this book Andrew Pilsch counters these critiques arguing instead that transhumanism s utopian rhetoric actively imagines radical new futures for the species and its habitat Pilsch situates contemporary transhumanism within the longer history of a rhetorical mode he calls evolutionary futurism that unifies diverse texts philosophies and theories of science and technology that anticipate a radical explosion in humanity s cognitive physical and cultural potentialities By conceptualizing transhumanism as a rhetoric as opposed to an obscure group of fringe figures he explores the intersection of three major paradigms shaping contemporary Western intellectual life cybernetics evolutionary biology and spiritualism In analyzing this collision his work traces the belief in a digital evolutionary and collective future through a broad range of texts written by theologians and mystics biologists and computer scientists political philosophers and economic thinkers conceptual artists and Golden Age science fiction writers Unearthing the long history of evolutionary futurism Pilsch concludes allows us to more clearly see the novel contributions that transhumanism offers for escaping our current geopolitical bind by inspiring radical utopian thought

What Is God? Thomas B. Sheridan,2014-12-24 An eminent psychologist and engineer presents a provocative analysis of the concept of God through the lens of scientific inquiry This is a study of the concept of God not from the perspective of any religious tradition but as a pervasive social phenomenon that has

prevailed through the ages An expert in engineering and applied psychology author Thomas B Sheridan offers unique perspective on the subject In *What Is God* he asks whether the concept of God can be modeled in denotative language much as modeling in science medicine and modern professions in contrast to connotative language e g myth metaphor art and music Sheridan adopts the assumption of model based reality as currently prevalent in physics and some branches of philosophy That criterion means an entity can be called real for public discourse purposes only to the extent that a credible model can be made of what the entity is or how it works as opposed to the private reality of thoughts perceptions or dreams What follows is a truly provocative and enlightening through experiment with far reaching implications It is rare to see the ultimate question of God as prime mover examined as a problem open to rigorous scientific inquiry Thomas Sheridan has now done it with admirable clarity Edward O Wilson Pulitzer Prize winning author of *The Meaning of Human Existence* **The Big Argument** John F. Ashton, Michael Westacott, 2006 Today some of the world's best minds in a variety of disciplines grapple with whether there is any real purpose to our lives Yet not only do many scientists believe in the God who created us with purpose they also understand that what we do in the here and now has consequences in the next life John Ashton has compiled a group of essayists who specialize in fields such as archaeology astronomy biblical scholarship and more The result is a fascinating exploration of an age old question sure to intrigue believers and skeptics alike **Nature Alive** Adam Scarfe, 2018-04-18 This volume pays homage to Alfred North Whitehead's 1861-1947 profound lecture and essay entitled *Nature Alive* which was one of his most mature expressions of his process relational metaphysics a holistic conceptual framework that renders vivid the dynamic character of the natural world and the intrinsic purposiveness selective agency and creativity of living organisms Inspired by but not beholden to Whitehead's process metaphysical lens the contributors to this volume bring a multiplicity of philosophical orientations to the table in challenging the mechanistic and reductionistic neo Darwinian paradigm that is still dominant today in the life sciences Mechanistic neo Darwinism views nature and living organisms as machines namely as networks of externally related and linear causal switches dials levers pulleys and gears that are at the ready for technological and biotechnological manipulation Seeking a conceptual framework and a language that are more adequate to the study of the natural world and of living creatures than the mechanistic orientation the contributors to this volume explore several of the New Frontiers of Biology which are areas of biology whose findings to some extent go beyond the explanatory confines of the Modern Synthesis of natural selection and genetics Most notably emergence theory the theory of organic selection epigenetics homeostasis chronobiology and autopoiesis research can provide us with key insights that can assist us in explaining how living agents emerged including the evolutionary origins of mentality consciousness and mind Moreover attention to the New Frontiers of Biology can serve to re-enchant our understanding of the natural world and to prevent ecological devastation through a restoration to objectivity of notions such as intrinsic purposiveness selective agency creativity and intrinsic value *Acts of God and Man* Michael Powers, 2014-01-01 Much has

been written about the ups and downs of financial markets from the lure of prosperity to the despair of crises Yet a more fundamental and pernicious source of uncertainty exists in today's world the traditional insurance risks of earthquakes storms terrorist attacks and other disasters Insightfully exploring these acts of God and man Michael R Powers guides readers through the methods available for identifying and measuring such risks financing their consequences and forecasting their future behavior within the limits of science A distinctive characteristic of earthquakes hurricanes bombings and other insurance risks is that they impact the values of stocks bonds commodities and other market based financial products while remaining largely unaffected by or aloof from the behavior of markets Quantifying such risks given limited data is difficult yet crucial for achieving the financing objectives of insurance Powers begins with a discussion of how risk impacts our lives health and possessions and proceeds to introduce the statistical techniques necessary for analyzing these uncertainties He then considers the experience of risk from the perspectives of both policyholders and insurance companies and compares their respective responses The risks inherent in the private insurance industry lead naturally to a discussion of the government's role as both market regulator and potential insurer of last resort Following a thoughtful and balanced analysis of these issues Powers concludes with an interdisciplinary investigation into the nature of uncertainty incorporating ideas from physics philosophy and game theory to assess science's limitations in predicting the ramifications of risk The Political Economy of Theocracy R. Wintrobe, M. Ferrero, 2009-03-30 This book consists of essays by leading scholars in economics and political science which try to deepen our understanding of how theocratic regimes behave by providing up to date empirical surveys by leading scholars of the economic performance of Iran and of Muslim countries in general and by looking at the behavior of historical theocracies *Natural Law and Contemporary Public Policy* David Forte, 1998-08-01 Rooted in Western classical and medieval philosophies the natural law movement of the last few decades seeks to rediscover fundamental moral truths In this book prominent thinkers demonstrate how natural law can be used to resolve a wide range of complex social political and constitutional issues by addressing controversial subjects that include the family taxation war racial discrimination medical technology and sexuality This volume will be of value to those working in philosophy political science and legal theory as well as to policy analysts legislators and judges *Examining God's Utility Function: why Nature Knows how to Manage Renewable Resources But Humans Might Not* A. P. Gutierrez, Uri Regev, David Zilberman, 1998 *Valley of the Gods* Alexandra Wolfe, 2017-01-10 A Wall Street Journal columnist for Weekend Confidential explores the hubris and ambition of Silicon Valley innovators who are changing the world tracing the stories of three upstarts who left promising college educations in favor of developing billion dollar ideas NoveList **God: The Failed Hypothesis** Victor J. Stenger, 2010-08-05 Throughout history arguments for and against the existence of God have been largely confined to philosophy and theology while science has sat on the sidelines Despite the fact that science has revolutionized every aspect of human life and greatly clarified our understanding of the world somehow the notion has arisen that it has nothing to say

about the possibility of a supreme being which much of humanity worships as the source of all reality This book contends that if God exists some evidence for this existence should be detectable by scientific means especially considering the central role that God is alleged to play in the operation of the universe and the lives of humans Treating the traditional God concept as conventionally presented in the Judeo Christian and Islamic traditions like any other scientific hypothesis physicist Stenger examines all of the claims made for God s existence He considers the latest Intelligent Design arguments as evidence of God s influence in biology He looks at human behavior for evidence of immaterial souls and the possible effects of prayer He discusses the findings of physics and astronomy in weighing the suggestions that the universe is the work of a creator and that humans are God s special creation After evaluating all the scientific evidence Stenger concludes that beyond a reasonable doubt the universe and life appear exactly as we might expect if there were no God This paperback edition of the New York Times bestselling hardcover edition contains a new foreword by Christopher Hitchens and a postscript by the author in which he responds to reviewers criticisms of the original edition

Adam Smith and the Invisible Hand of God Brendan Long,2022-12-01 This book contributes to the new view reading of Adam Smith providing a historically and contextually rich interpretation of Smith s thought Smith built a moral philosophy on the foundations of a natural theology of human sociality Examination of his life relationship with David Hume and use of divine names shows that he retained a progressive form of Christian theism The book interrogates the metaphor of the invisible hand and highlights the importance of the religious dimension of Adam Smith s thought for his moral philosophy his jurisprudence and his economics It reflects on the contemporary relevance of a theological reading of Smith and lays the ground for further inquiry between economic and religious perspectives

Creation, Sin, Covenant, and Salvation, 2nd Edition Edward P. Meadors,2024-05-16 Creation Sin Covenant and Salvation is a primer for biblical theology that is accessible to lay readers of all ages This is the ideal book for those seeking a short accessible synopsis of the Christian worldview Sprinkled with anecdotes and illustrations the book eases readers into a succinct yet comprehensive discussion of biblical thought The final chapter explains the authority practical value and intended purpose of Scripture Meadors inspires readers to think critically about the real life believability of the Christian faith especially its intellectual coherence In keeping with biblical theology the book affirms the continuity of biblical revelation from beginning to end before consummating in the resurrection of the dead and God s restoration of all creation
