

KEEP IT SPICY

This may seem counter intuitive but eating spicy food causes you to sweat without raising your body temperature. Sweating is your body's way to cool down quickly. This is the reason why so many desert cultures have such spicy food.

H₂O THERAPY

Keep a few bottles of water in the refrigerator. Drink water frequently on hot days. As you lose water due to dehydration, your body temperature rises. By replacing those lost fluids you'll stay nice and cool.

A LIGHT SPRAY

Keep a spray bottle filled with ice water in the fridge. When you come inside from the hot heat, you can spray your face with the cold water. It is a portable, personal sprinkler.

COOL COMPRESS

Using cold compresses on the body's pressure points can keep you cool. Fill a pot with water and ice. Dip a washcloth into the pot and place it on the back of your neck or forehead. You will feel your body cool down instantly.

LAY OFF THE SAUCE

Drinks that have alcohol and high concentrations of caffeine can cause you to dehydrate faster. No matter how refreshing that ice coffee or cold beer may look, stay away from them during heat waves.

SHOWER POWER

Sometimes, the toughest time during a heat wave is at night. The best way to sleep through a heat wave is to take an ice-cold shower before bed.

KEEP COOL

15 WAYS TO BEAT SUMMER HEAT

Those dog days of summer seem to last forever. With temperatures and electric bills rising, we look at ways to keep cool while saving a few extra dollars. Use these tips and tricks to have the coolest summer ever.

THINK COOL THOUGHTS

When confronted with 100-degree temperatures that could melt the plastic in a playground, it's best to let your thoughts drift to cold places. Picture icebergs, igloos, polar bears, and snowberms.

ORDER OUT

Whatever you do, do not turn on your oven. Cooking with an oven will heat up the house. Instead, take this opportunity to have a barbecue, make a microwave meal or order in from your favorite restaurant.

COOL CLOTHES

Desert cultures have employed loose fitting, light clothing for centuries to stay cool in the scorching heat. So, stay cool with light colored, loose-fitting cotton clothing. Also, it never hurts to throw on a cool pair of shades to complete the look.

SHUT DOWN

Closing curtains or blinds (ideally with sun-deflecting white on the window side) can reduce the amount of heat that passes into your home by as much as 45 percent. So draw the blinds during the hottest part of the day (noon to 4 p.m.).

A GOOD SOAK

Important pressure points that will help your whole body stay cool during a heat wave are the soles of your feet. Fill a basin with water and ice cubes, pull up a chair, and then dip your feet in.

MINTY FRESH

Use menthol products to cool your skin. Use lotion with peppermint, peppermint soap, or powders with mint. Mint refreshes the skin and leaves a nice cooling sensation.

POPSICLE EFFECT

A helpful and tasty tip to stay cool is eating cold foods. Stock your freezer with your favorite ice pops or ice cream, and have one when you are getting a little too warm.

TINY BITES

Eating large protein-filled meals causes your metabolism to increase your body temperature. To avoid this, eat smaller meals four times a day. It will keep you cool and is healthier in the long run.

WHITE IT OUT

Desperate times call for desperate measures. Painting your roof white or a light color can actually deflect heat and cool down your entire house. No need for air conditioning.
