Technological and Social Dimensions of the Green Revolution

Pratyusha Basu, Bruce Scholten, 2014-10-14 Rising concerns about agricultural productivity and food security in rapidly changing economic and environmental contexts have led to renewed interest in agricultural development But the extent to which new policies and programs will enable socially just and environmentally sustainable futures for rural communities remains a matter of intense debate This book contributes to such debates by critically examining the intersection of agricultural histories heterogeneous social contexts and new technological developments in rural communities across the Global South It shows how experiences of the previous Green Revolution can inform new agricultural programs and enable equitable and participatory development in rural places Through close engagement with rural communities this book ensures that rural voices become part of the debate on agricultural development and suggests pathways for building on the gains of the Green Revolution without necessarily repeating its problematic social technological and environmental aspects This book was published as a special issue of the International Journal of Agricultural Sustainability

The Routledge Handbook of Place Tim Edensor, Ares Kalandides, Uma Kothari, 2020-05-26 The handbook presents a compendium of the diverse and growing approaches to place from leading authors as well as less widely known scholars providing a comprehensive yet cutting edge overview of theories concepts and creative engagements with place that resonate with contemporary concerns and debates The volume moves away from purely western based conceptions and discussions about place to include perspectives from across the world It includes an introductory chapter which outlines key definitions draws out influential historical and contemporary approaches to the theorisation of place and sketches out the structure of the book explaining the logic of the seven clearly themed sections Each section begins with a short introductory essay that provides identifying key ideas and contextualises the essays that follow The original and distinctive contributions from both new and leading

authorities from across the discipline provide a wide rich and comprehensive collection that chimes with current critical thinking in geography The book captures the dynamism and multiplicity of current geographical thinking about place by including both state of the art in depth critical overviews of theoretical approaches to place and new explorations and cases that chart a framework for future research It charts the multiple ways in which place might be conceived situated and practised This unique comprehensive and rich collection will be an essential resource for undergraduate and graduate teaching for experienced academics across a wide range of disciplines and for policymakers and place marketers It will provide an invaluable and up to date guide to current thinking across the range of disciplines such as Geography Sociology and Politics and interdisciplinary fields such as Urban Studies Environmental Studies and Planning

Natural Resource Endowment and the Fallacy of Development in Cameroon Lotsmart Fonjong, 2019-11-06 Cameroon is rich in petroleum minerals tropical forests wildlife water systems fertile lands and much more Paradoxically however most citizens live in abject poverty and without jobs potable water electricity good healthcare and roads This book is a thoughtful interrogation of some of the structural factors driving persistent poverty in Cameroon in the midst of natural resource abundance It engages in a multidimensional critical analysis of the impact of natural resources on basic development

indicators and concludes that good resource governance and sound management are the missing link. Natural resources alone will not create socio economic prosperity void of good management with a clear development vision and strategy in Cameroon. The book assembles a wide diversity of analysis, views, perspectives and recommendations from economists, development experts, social and political scientists on Cameroon's current development inertia. What emerges in the end is a coherent interdisciplinary analysis of the natural resource development paradox as it plays out in an African setting. Theories and good practices from Africa and beyond are systematically applied to identify and critique present policy and management approaches while providing alternative options that can unlock Cameroon's natural resource wealth for national prosperity.

Releasing the Commons Ash Amin, Philip Howell, 2016-04-28 This book moves beyond seeing the commons in the past tense, an entity passed over from the public into the private, to reimagine the commons as a process, a contest of force, a reconstitution and a site of convening practices. It highlights new spaces of gathering opening up such as the digital commons and new practices of being in common such as community economies and solidarity networks. The commons is seen as a contested domain of the collective and as a changing way of being in common with the balance poised in the tensile play between political economy and social innovation. The book focuses on the possibility of recovering a future in which more can be held by the many, focusing on three concepts: nation and nature as a commons, publics and rights, and bodies concerning the management of lives and livelihoods. Across these three passage points, the book finds evidence of a commons under attack but also defended in fragile though promising ways. With contributions from leading scholars, this thought-provoking book will be of great interest to students and scholars in geography, environmental studies, politics, anthropology and cultural studies.

Participatory Planning in the Caribbean: Lessons from Practice Robert Potter, Jonathan Pugh, 2018-05-08 This title was first published in 2003. Until recently, planning and development in the Caribbean have been top-down, centre-out and expert-led. For a few years now, though, the region has bowed to the global trend and has experimented with participatory planning methods. Participatory planning is heralded by much of the development community as the most appropriate alternative strategy to the traditional approaches. In this volume, a range of experts drawn from the Caribbean, the United Kingdom and the United States review the current achievements and future prospects for genuinely participative planning in the Caribbean region at the beginning of the 21st Century. Bringing together a wide range of case studies from both the insular Caribbean as well as mainland Central and South America, the book examines issues such as protected area planning, sustainable development, councils, gender and development, inner city redevelopment and community empowerment.
