Geography Lesson Allan Sekula, Joy Silverman, Los Angeles Contemporary Exhibitions (LACE), 1986 A Companion to American Art John Davis, Jennifer A. Greenhill, Jason D. LaFountain, 2015-01-23 A Companion to American Art presents 35 newly commissioned essays by leading scholars that explore the methodology historiography and current state of the field of American art history Features contributions from a balance of established and emerging scholars art and architectural historians and other specialists Includes several paired essays to emphasize dialogue and debate between scholars on important contemporary issues in American art history Examines topics such as the methodological stakes in the writing of American art history changing ideas about what constitutes Americanness and the relationship of art to public culture Offers a fascinating portrait of the evolution and current state of the field of American art history and suggests future directions of scholarship **The Bomb in the Wilderness** John O'Brian, 2020-10-01 Photographs link the nuclear past and nuclear present shaping the public's perception of events What can they reveal about Canada's nuclear footprint The Bomb in the Wilderness contends that photography is central to how we have represented interpreted and remembered nuclear activities since 1945 During the Second World War Canada was a member of the Manhattan Project the consortium that developed the atomic bombs dropped on Hiroshima and Nagasaki in 1945 The impact and global reach of Canada's nuclear programs has been felt ever since But do photographs alert viewers to nuclear threat numb them to its dangers or by some strange calculus accomplish both John O'Brian's wide ranging and personal account of the nuclear era presents and discusses more than a hundred photographs ranging from military images to the atomic ephemera of consumer culture We need this fascinating analysis to ensure that we do not look away **Cultural Pedagogy** David Trend, 1992-04-20 In recent years debates over culture and education have entered the public consciousness as never before Politicians bureaucrats and scholars have credited these endeavors with the capacity to influence matters ranging from public morality to national productivity Trend examines points at which art and learning intersect in both traditional and nontraditional settings and offers a variety of alternatives for the construction of a new cultural pedagogy He argues that we need to redefine concepts like art literature and education to integrate them more fully into our lives On one hand Trend uses a critical approach to examine how cultural work and pedagogy intersect within a range of discourses such as Marxist feminist deconstructionist and postcolonial Yet on the other he focuses on the use of specific examples of cultural practice within and outside the classroom to emphasize the importance of action as well as philosophy to bring about social change Trend provides a theoretical overview of the ideological battles over texts and their discursive contexts and then analyzes how cultural education has evolved in such settings as the school the university and the community He concludes with a discussion of pedagogy and democracy which suggests a range of possible resolutions **Industries of Architecture** Katie Lloyd Thomas, Tilo Amhoff, Nick Beech, 2015-11-06 At a time when the technologies and techniques of producing the built environment are undergoing

significant change this book makes central architecture's relationship to industry Contributors turn to historical and theoretical questions as well as to key contemporary developments taking a humanities approach to the Industries of Architecture that will be of interest to practitioners and industry professionals as much as to academic researchers teachers and students How has modern architecture responded to mass production How do we understand the necessarily social nature of production in the architectural office and on the building site And how is architecture entwined within wider fields of production and reproduction finance capital the spaces of regulation and management techniques What are the particular effects of techniques and technologies and above all their inter relations on those who labour in architecture the buildings they produce and the discursive frameworks we mobilise to understand them

The Cultural Work of Photography in Canada Carol Payne, Andrea Kunard, 2011-08-31 The Cultural Work of Photography in Canada is an in depth study on the use of photographic imagery in Canada from the late nineteenth century to the present This volume of fourteen essays provides a thought provoking discussion of the role photography has played in representing Canadian identities In essays that draw on a diversity of photographic forms from the snapshot and advertising image to works of photographic art contributors present a variety of critical approaches to photography studies examining themes ranging from photography's part in the formation of the geographic imaginary to Aboriginal self identity and notions of citizenship The volume explores the work of photographs as tools of self and collective expression while rejecting any claim to a definitive singular telling of photography's history Reflecting the rich interdisciplinarity of contemporary photography studies The Cultural Work of Photography in Canada is essential reading for anyone interested in Canadian visual culture Contributors include Sarah Bassnett University of Western Ontario Lynne Bell University of Saskatchewan Jill Delaney Library and Archives Canada Robert Evans Carleton University Sherry Farrell Racette University of Manitoba Blake Fitzpatrick Toronto Metropolitan University Vincent Lavoie Universit du Qu bec Montr al John O Brian University of British Columbia James Opp Carleton University Joan M Schwartz Queen's University Sarah Stacy Library and Archives Canada Jeffrey Thomas Ottawa and Carol Williams Trent University University of Lethbridge

Disturbed Ecologies Darcy White, Julia Peck, Chris Goldie, 2023-03-03 The imaginaries of northern landscape have not remained static in the era of ecological crisis but play a pivotal function within the geopolitics of visual representation Such imaginaries can sanction those dominant discourses that frame environmental catastrophe as the consequence of undifferentiated human activity but it is argued they also have the capacity to represent a complexity and heterogeneity frequently absent from this broad discursive field The contributors to this volume engage with the practice curation and utilization of photography and other lens based media to examine the critical role of visual culture in shaping and interrogating conceptions of environmental catastrophe

Beyond Wilderness John O'Brian, Peter White, 2017-12-30 The great purpose of landscape art is to make us at home in our own country was the nationalist maxim motivating the Group of Seven's artistic project The empty landscape paintings of the Group played a significant role in the nationalization of

nature in Canada particularly in the development of ideas about northernness wilderness and identity In *Beyond Wilderness* contributors pick up where the Group of Seven left off They demonstrate that since the 1960s a growing body of both art and critical writing has looked beyond wilderness to re imagine landscape in a world of vastly altered political technological and environmental circumstances By emphasizing social relationships changing identity politics and issues of colonial power and dispossession contemporary artists have produced landscape art that explores what was absent in the work of their predecessors *Beyond Wilderness* expands the public understanding of Canadian landscape representation tracing debates about the place of landscape in Canadian art and the national imagination through the twentieth century to the present Critical writings from both contemporary and historically significant curators historians feminists media theorists and cultural critics and exactly reproduced artworks by contemporary and historical artists are brought together in productive dialogue *Beyond Wilderness* explains why landscape art in Canada had to be reinvented and what forms the reinvention took Contributors include Benedict Anderson Cornell Grant Arnold Vancouver Art Gallery Rebecca Belmore Jody Berland York Eleanor Bond Concordia Jonathan Bordo Trent Douglas Cole Marlene Creates Marcia Crosby Malaspina Greg Curnoe Ann Davis Nickle Arts Museum Leslie Dawn Lethbridge Shawna Dempsey Christos Dikeakos Peter Doig Rosemary Donegan OCAD Stan Douglas Paterson Ewen Robert Fones Northrop Frye Robert Fulford General Idea Rodney Graham Reesa Greenberg Gu Xiong British Columbia Cole Harris British Columbia Richard William Hill Middlesex Robert Houle Andrew Hunter Waterloo Lynda Jessup Queen s Zacharias Kunuk Igloolik Isuma Productions Johanne Lamoureux Montr al Robert Linsley Waterloo Barry Lord Lord Cultural Resources Marshall McLuhan Mike MacDonald Liz Magor ECIAD Lorri Millan Gerta Moray Guelph Roald Nasgaard Florida State N E Thing Company Carol Payne Carleton Edward Poitras Dennis Reid Art Gallery of Ontario Michel Saulnier Nancy Shaw Simon Fraser Johanne Sloan Concordia Michael Snow Robert Stacey David Thauberger Loretta Todd Esther Tr panier Qu bec Dot Tuer OCAD Christopher Varley Jeff Wall Paul H Walton McMaster Mel Watkins Toronto Scott Watson British Columbia Anne Whitelaw Alberta Joyce Wieland Jin me Yoon Simon Fraser Lawrence Paul Yuxweluptun and Joyce Zemans York

Coal Cultures Derrick Price, 2020-08-19 Coal is the commodity that powered the technologies that made the modern world It also brought about unique communities marked by a high degree of social solidarity and self help Mining was central to working class life drawing rural populations into industrial labour but it often took place in picturesque landscapes so that its black spoil heaps became a central symbol of the degradation of pastoral life by the demands of an extractive industry Throughout Europe and the USA photographers have pictured the characteristic landscapes of the industry and continue to do so as strip mining devastates huge areas of land Not only landscape photography but also documentary portraiture photojournalism and art photography have been used in order to portray mines and miners This book presents three interlinked strands of investigation The first is the way in which the production of coal created paradigmatic communities grounded in particular landscapes The second concerns the role of photography in

exploring delineating and critiquing mining communities This in turn involves an examination of the aesthetic and social characteristics of a number of genres of photography Lastly it considers the growth and decline of these sites the geographic shift of the industry to other places and the re presentation of traditional localities through the lens of the heritage industry and industrial tourism Ground Sea Hilde Van Gelder,2021-09-15 Imagine a world in which each individual has a fundamental right to be reborn This idle dream haunts Hilde Van Gelder s associative travelogue that takes Allan Sekula s sequence *Deep Six* *Passer au bleu* 1996 1998 as a touchstone for a dialogue with more recent artworks zooming in on the borderscape near the Channel Tunnel such as those by Sylvain George and Bruno Serralongue Combining ethnography visual materials political philosophy cultural geography and critical analysis *Ground Sea* proceeds through an innovative methodological approach Inspired by the meandering writings of W G Sebald Javier Mar as and Roland Barthes Van Gelder develops a style both interdisciplinary and personal Resolutely opting for an aquatic perspective *Ground Sea* offers a powerful meditation on the indifference of an increasingly divided European Union with regard to considerable numbers of persons on the move who find themselves stranded close to Calais The contested Strait of Dover becomes a microcosm where our present global challenges of migration climate change human rights and neoliberal surveillance technology converge Read more on the book s dedicated website www.groundsea.be *Tactical Media* Rita Raley,2009 Tactical media describes interventionist media art practices that engage and critique the dominant political and economic order Rather than taking to the streets and staging spectacular protests the practitioners of tactical media engage in an aesthetic politics of disruption intervention and education In *Tactical Media* Rita Raley provides a critical exploration of the new media art activism that has emerged out of and in direct response to postindustrialism and neoliberal globalization **Cultures of Uneven and Combined Development** ,2019-07-08 *Cultures of Uneven and Combined Development* seeks to explore and develop Leon Trotsky s concept of uneven and combined development In particular it aims to adapt the political and historical analysis which originated in Trotsky s Russia for use within the contemporary field of world literature As such it draws together the work of scholars from both the field of international relations and the field of literature and the arts This collection will therefore be of particular interest to anyone who is interested in new ways of understanding world literary texts or interested in new ways of applying Trotsky s revolutionary politics to the contemporary world order Contributors Alexander Anievas Gail Day James Christie Kamran Matin Kerem Nisancioglu Luke Cooper Michael Niblett Neil Davidson Nesrin Degirmencioglu Robert Spencer Steve Edwards Lost Days, Endless Nights Andrew Witt,2025-01-14 A critical study and artist s book on the history of photography and film from Los Angeles *Lost Days Endless Nights* tells a history from below an account of the lives of the forgotten and dispossessed of Los Angeles the unemployed the precariously employed the evicted the alienated the unhoused the anxious the exhausted Through an analysis of abandoned archival works experimental films and other projects Andrew Witt offers an expansive account of the artists who have lived or worked in Los Angeles delving

into the region's history and geography highlighting its racial gender and class conflicts Presented as a series of nine case studies Witt explores how artists as diverse as Agnès Varda Dana Lixenberg Allan Sekula Catherine Opie John Divola Gregory Halpern Paul Sepuya and Guadalupe Rosales have reimagined and reshaped our understanding of contemporary Los Angeles The book features portraits of those who struggle and attempt to get by in the city dock workers students bus riders petty criminals office workers immigrants queer and trans activists Set against the landscape of economic turmoil and environmental crises that shadowed the 1970s Witt highlights the urgent need for a historical perspective of cultural retrieval and counternarrative Extending into the present *Lost Days Endless Nights* advocates for an approach that actively embraces the works and projects that have been overlooked and evicted from the historical imaginary *Formulations* Andrew Witt, 2022-01-11 An investigation of mathematics as it was drawn encoded imagined and interpreted by architects on the eve of digitization in the mid twentieth century In *Formulations* Andrew Witt examines the visual methodological and cultural intersections between architecture and mathematics The linkages Witt explores involve not the mystic transcendence of numbers invoked throughout architectural history but rather architecture's encounters with a range of calculational systems techniques that architects inventively retooled for design Witt offers a catalog of mid twentieth century practices of mathematical drawing and calculation in design that preceded and anticipated digitization as well as an account of the formal compendia that became a cultural currency shared between modern mathematicians and modern architects Witt presents a series of extensively illustrated biographies of method episodes that chart the myriad ways in which mathematics particularly the mathematical notion of modeling and drawing was spliced into the creative practice of design These include early drawing machines that mechanized curvature the incorporation of geometric maquettes theorems made flesh into the toolbox of design the virtualization of buildings and landscapes through surveyed triangulation and photogrammetry formal and functional topology stereoscopic drawing the economic implications of cubic matrices and a strange synthesis of the technological mineral and biological crystallographic design Trained in both architecture and mathematics Witt uses mathematics as a lens through which to understand the relationship between architecture and a much broader set of sciences and visual techniques Through an intercultural exchange with other disciplines he argues architecture adapted not only the shapes and surfaces of mathematics but also its values and epistemic ideals *13 Essays on Photography* Raymonde April, Canadian Museum of Contemporary Photography, 1990 Depository Library Program

Facing America Shirley Samuels, 2004-03-25 *Facing America* Iconography and the Civil War investigates and explains the changing face of America during the Civil War To conjure a face for the nation author Shirley Samuels also explores the body of the nation imagined both physically and metaphorically arguing that the Civil War marks a dramatic shift from identifying the American nation as feminine to identifying it as masculine Expressions of such a change appear in the allegorical configurations of nineteenth century American novels poetry cartoons and political rhetoric Because of the visibility of war's

assaults on the male body masculine vulnerability became such a dominant facet of national life that it practically obliterated the visibility of other vulnerable bodies The simultaneous advent of photography and the Civil War in the nineteenth century may be as influential as the conjoined rise of the novel and the middle class in the eighteenth century Both advents herald a changed understanding of how a transformative media can promote new cultural and national identities Bodies immobilized because of war's practices of wounding and death are also bodies made static for the camera's gaze The look of shock on the faces of soldiers photographed in order to display their wounds emphasizes the new technology of war literally embodied in the impact of new imploding bullets on vulnerable flesh Such images mark both the context for and a counterpoint to the look of Walt Whitman as he bends over soldiers in their hospital beds They also provide a way to interpret the languishing male heroes of novels such as August Evans's *Macaria* 1864 a southern elegy for the sundering of the nation This book crucially shows how visual iconography affects the shift in postbellum gendered and racialized identifications of the nation

the body presents an engagement with a range of social concerns from the processes of racialization to the vagaries of fashion and performance art enacted as surgery on the body Individual sections cover issues such as the body and social dis order bodies and identities bodily norms bodies in health and dis ease bodies and technologies Containing an extensive critical introduction contributions from key figures such as Butler Sedgwick Martin Scheper Huges Haraway and Gilroy and a series of introductions summarizing each section this Reader offers students a valuable practical guide and a thorough grounding in the fascinating topic of the body
