Inside and outside the classroom children of all ages spend time interacting with their peers Through these early interactions children make sense of the world and co construct their childhood culture while simultaneously engaging in interactional activities which provide the stepping stones for discursive social and cognitive development This collection brings together an international team of researchers to document how children s peer talk can contribute to their socialization and demonstrates that if we are to understand how children learn in everyday interactions we must take into account peer group cultures talk and activities This book will be of interest to students and researchers in the fields of language acquisition sociolinguistics pragmatics and discourse analysis and related disciplines It examines naturally occurring talk of children aged from three to twelve years from a range of language communities and includes ten studies documenting children s interactions and a comprehensive overview of relevant research *Oversight Hearing on Preschool Education* United States. Congress. House. Committee on Education and Labor. Subcommittee on Human Resources, 1986 *Rethinking Egocentric Speech* Karen Junefelt, 2007 Egocentric speech has been an important notion in the development of language and thought since Piaget 1923 published his book *Le langage et la pens e chez l enfant* Eng *The Language and Thought of the Child* and Vygotsky 1934 published his book *Myshlenie i rech* Eng *Thought and Language* Their hypotheses about the development of thought and language have provided the theoretical basis for scholarly work during the last 80 years However their hypotheses about egocentric speech have seldom been questioned In this book the author will question their hypotheses using the same material that in her own research has led her to reorganise her thinking about egocentric speech data from a blind child The source material that informs the book is a longitudinal case study of a blind child that extended over eight years of time In order to closely investigate egocentric speech in this book data from only two video recordings will be analysed from three perspectives Piaget Vygotsky and Bakhtin Voloshinov Coming from these analyses finally the author presents a new hypothesis on egocentric speech and its developmental significance for inner speech or thought
