

Theory, Ideal Theory and the Theory of Ideals

The recent prominence of the ideal/non-ideal debate is largely due to the fact that it offers a vocabulary in which to diagnose what many see as a key problem of political theory: its relative unwillingness to provide solutions to urgent problems facing people here and now; or for people as they are rather than as they should be. The primary aim of this article is to offer an improved understanding of the territory that the ideal/non-ideal debate relates to.

Keywords: ideal theory; non-ideal theory; feasibility; institutional design

Our primary aim is to offer an improved understanding of the territory that the ideal/non-ideal debate relates to, in part by re-describing that territory in terms of the aims of theorising rather than the specific properties of particular theories, and in part by introducing a further category which we shall term *the theory of ideals*. In overview, we argue that the ideal/non-ideal distinction operates only within a sub-region of the territory occupied by normative political theory, and that it both misses important parts of what is at stake in normative theorising and presents too sharp a contrast. We develop the role of the theory of ideals and argue that the territory associated with the ideal/non-ideal distinction is better viewed in terms of a multidimensional continuum ranging over a number of variables. This last point explains, in our view, the proliferation of attempts to distinguish between ideal and non-ideal theory: there is no single, categorical and useful distinction to be found and what we see is a multiplicity of different ideas and debates which sit within a multidimensional terrain.

The main body of this essay is arranged in four further sections. The second section discusses various formulations of the ideal/non-ideal distinction. In the third section, we then sketch the theory of ideals and broach the general question of feasibility. With these elements in place, the fourth section directly addresses the question of the relationship between ideal and non-ideal theory and, specifically, the question of whether ideal theory is a prerequisite for non-ideal theory. Our answer here will be that it is not, but that it can act as a useful constraint on the prescriptions of non-ideal theory. Finally, we offer a summary of the key steps in the argument.

The Ideal/Non-ideal Distinction

While there seems to be widespread acceptance that the distinction between ideal theory and non-ideal theory is both useful and appropriate, there is little agreement on how exactly to specify it.¹ We identify four broad approaches to this problem of specification, with the distinction concerning:

- (1) full compliance and non-full compliance;
- (2) idealisation and abstraction;
