Beiser,2018-10-04 This book is the first complete intellectual biography of Hermann Cohen 1842 1918 and the only work to cover all his major philosophical and Jewish writings Frederick C Beiser pays special attention to all phases of Cohen s intellectual development its breaks and its continuities throughout seven decades The guiding goal behind Cohen s intellectual career he argues was the development of a radical rationalism one committed to defending the rights of unending enquiry and unlimited criticism Cohen s philosophy was therefore an attempt to defend and revive the Enlightenment belief in the authority of reason his critical idealism an attempt to justify this belief and to establish a purely rational worldview According to this interpretation Cohen s thought is resolutely opposed to any form of irrationalism or mysticism because these would impose arbitrary and artificial limits on criticism and enquiry It is therefore critical of those interpretations which see Cohen s philosophy as a species of proto existentialism Rosenzweig or Jewish mysticism Adelman and K hnke Hermann Cohen An Intellectual Biography attempts to unify the two sides of Cohen s thought his philosophy and his Judaism Maintaining that Cohen s Judaism was not a limit to his radical rationalism but a consistent development of it Beiser contends that his religion was one of reason He concludes that most critical interpretations have failed to appreciate the philosophical depth and sophistication of his Judaism a religion which committed the believer to the unending search for truth and the striving to achieve the cosmopolitan ideals of reason *Invention, Innovation and U.S. Federal Laboratories* Albert N. Link,2020-11-27 This book is about inventions and innovation in U S Federal Laboratories The inventions discussed are defined by the technology transfer mechanism known by the term invention disclosures and are innovations that are the output of the technology transfer process The demonstrated positive relationships in the book s model are the groundwork for suggesting not only a rethinking of the extant empirical research within the context of a knowledge production function but also a refocusing of U S technology policy in support of technology transfer from Federal Laboratories
