Madigan Peercy, 2018-08-16 Self Study in Teacher Education Practices S STEP contribute to teacher education in culturally and linguistically diverse communities and contexts The chapters reflect the scholarly inquiry of teacher educators dedicated to investigating and improving their practice      Self-Study in Physical Education Teacher Education Alan Ovens, Tim

Fletcher, 2014-05-22 In this in depth examination of self study as a research methodology an international selection of

physical education scholars share their ideas and experiences and consider the value of self study as a vector for highlighting the emerging conflicts dilemmas and debates currently developing in teaching and teacher education pedagogies A vital new addition to Springer s series Self Study of Teacher Education Practices the volume is divided into three sections assessing the significance of the approach itself offering detailed subject relevant case studies and exploring the nuances and controversies attending the evolution of the methodology The contributors show how self study enables reflexivity in pedagogical practice a notable lacuna in current critical research and at the same time they make the technique accessible to scholars of physical education wanting a practicable introduction to the subject The analysis also explores the implications of applying self study to pedagogy itself to the curriculum and to human movement and educational practice more generally By embracing more organic emergent notions of research practice and learning the book achieves a broader and more inclusive survey of pedagogical work in physical education teacher education that fully acknowledges the complexities of the field

**Self-Studies of Science Teacher Education Practices** Shawn M. Bullock, Tom Russell, 2012-03-21 Part of a vital Springer series on self study practices in teaching and teacher education this collection offers a range of contributions to the topic that embody the reflections of science teacher educators who have applied self study methodology to their own professional development The material recognizes the paradox that lies between classroom science and the education of science teachers the disciplines of science are often perceived as a quest for right answers an unintentional by product of the classroom focus on right answers in student assessment in science In contrast the profession of teaching has few right answers and frequently involves the management of conflicting tensions A dilemma thus arises in science teacher education of how to shift perspectives among student teachers from reductionist to more inclusive attitudes that are open to the mercurial realities of teaching The self studies presented here are unique fresh and stimulating They include the input of a beginning science teacher as well as science teacher educators from a range of backgrounds and varying levels of experience In addition the volume presents a truly international perspective on the issues with authors hailing from five countries Providing analysis at the leading edge of education theory this collection will make fascinating reading for those teaching science as well as those teaching science teachers
