Powell,2012-02-02 China which is fast on its way to becoming the most powerful economic force in the world has four unique characteristics that distinguish it from other countries in Asia 1 The proportion of aging population is growing faster than that of Japan the country previously recognized as having the fastest rate and much faster than nations in western Europe 2 An early arrival of an aging population before modernization has fully taken place with social policy implications It is certain that China will face a severely aged population before it has sufficient time and resources to establish an adequate social security and service system for older people 3 There will be fluctuations in the total dependency ratio The Chinese government estimates are that the country will reach a higher dependent burden earlier in the twenty first century than was previously forecast 4 The government s fertility policy single child per family and its implementation has a strong influence on the aging process Fewer children are being born but with more elderly people a conflict arises between the objectives to limit population increase and yet maintain a balanced age structure Peng and Guo 2001 The intersection of these fourfold factors means that the increased aging population is giving rise to serious concerns among Chinese social policy makers There is a chronic lack of good resource materials that attempt to make sense of social policy in its relationship to examining the problems and possibilities of human aging grounded in an analysis of economic of social policy in China and impact on rural and urban spaces Such analysis of China will be covered by conceptual theoretical and empirical approaches The book will also discuss substantive topics of housing community care family care pensions and mental health The book brings together a truly world class array of researchers to provide discussions of critical implications of aging social policy and the economic impact in China

Based on interviews with domestic workers their employers their social advocates and government officials this book examines the economic and social security of domestic workers and provides information about their precarious working conditions that could be improved through public policy It also explores women s agency and activism and the current role of NGOs and trade unions in labour protection *Live Working Or Die Fighting* Paul Mason,2010 This is micro historical writing at its best Walden Bello author of *Dilemmas of Domination* Brilliant Ken Loach The stories in this book come to life through the voices of remarkable individuals child laborers in Dickensian England visionary women on Parisian barricades gun toting railway strikers in America s Wild West and beer swilling German metalworkers who tried to stop World War I It is a story of urban slums self help cooperatives choirs and brass bands free love and self education by candlelight And as the author shows in the developing industrial economies of the world it is still with us *Live Working or Die Fighting* celebrates a common history of defiance idealism and self sacrifice one as alive and active today as it was two hundred years ago It is a unique and inspirational book Paul Mason is an award winning journalist who reports regularly on labor rights and social justice stories as economics editor for BBC World News America and BBC Newsnight In addition to *Live Working or Die Fighting* which was shortlisted as a 2007 Guardian First Book Award Mason is the author of *Meltdown The End of the Age of Greed* Verso Books
