Model Driven Engineering Languages and Systems Dorina C. Petriu, Nicolas Rouquette, Øystein Haugen, 2010-09-21 The MODELS series of conferences is the premier venue for the exchange of innovative technical ideas and experiences focusing on a very important new technical discipline model driven software and systems engineering The expansion of this discipline is a direct consequence of the increasing significance and success of model based methods in practice Numerous efforts resulted in the invention of concepts languages and tools for the definition analysis transformation and verification of domain specific modeling languages and general purpose modeling language standards as well as their use for software and systems engineering MODELS 2010 the 13th edition of the conference series took place in Oslo Norway October 3-8, 2010 along with numerous satellite workshops symposia and tutorials The conference was fortunate to have three prominent keynote speakers Ole Lehrmann Madsen Aarhus University Denmark Edward A Lee UC Berkeley USA and Pamela Zave AT T Laboratories USA To provide a broader forum for reporting on scientific progress as well as on experience stemming from practical applications of model based methods the 2010 conference accepted submissions in two distinct tracks Foundations and Applications The primary objective of the first track is to present new research results dedicated to advancing the state of the art of the discipline whereas the second aims to provide a realistic and verifiable picture of the current state the practice of model based engineering so that the broader community could be better informed of the capabilities and successes of this relatively young discipline This volume contains the final version of the papers accepted for presentation at the conference from both tracks

Engineering Methods in the Service-Oriented Context Jolita Ralyté, Isabelle Mirbel, Rébecca Deneckère, 2011-03-29 This book constitutes the refereed proceedings of the 4th IFIP WG 8.1 Working Conference on Method Engineering ME 2011 held in Paris France in April 2011 The 13 revised full papers and 6 short papers presented together with the abstracts of two keynote talks were carefully reviewed and selected from 30 submissions The papers are organized in topical sections on situated method engineering method engineering foundations customized methods tools for

method engineering new trends to build methods and method engineering services Systems Analysis and Design: Techniques, Methodologies, Approaches, and Architecture Roger Chiang, Keng Siau, Bill C. Hardgrave, 2017-07-05 For the last two decades IS researchers have conducted empirical studies leading to better understanding of the impact of Systems Analysis and Design methods in business managerial and cultural contexts SA D research has established a balanced focus not only on technical issues but also on organizational and social issues in the information society This volume presents the very latest state of the art research by well known figures in the field The chapters are grouped into three categories techniques methodologies and approaches *Towards a Service-Based Internet* Petri Mähönen, Klaus Pohl, Thierry Priol, 2008-12-11 Today it is almost impossible to remember what life was like with no computer no mobile phone and no Internet for accessing information performing transactions or exchanging emails and data New technology is bringing wave after wave of new benefits to daily life organisations are doing business with each other via the Internet people are filing in tax declarations online and booking their next vacation through the Internet In general we are all progressively increasing and dependent on software and services running on computers connecting mobile phones and other devices and exchanging information on the Internet People like to shop around and exercise choice So do businesses and public administrations Today they can buy a complete software package that best suits their needs even though they may never use some of the tools it offers or other desirable tools are not available In the future they may no longer have to compromise on choice Alternative approaches like Software as a Service and Computing Resources as a Service are emerging Software is provided on line as a service when and where it is needed and the same for computing resources needed to run software Such an approach allows individuals and organisations to tap into and effectively harness the immense wealth of information knowledge and analytical resources when they need them paying only for what they use Customers are bound to benefit when there is a sufficiently rich choice of services
