Intelligent Education Intelligent education, namely educational informatization, refers to the process of comprehensively and deeply using modern information technology to promote educational reform and development in the field of Education.

educational management educational teaching and educational scientific research. Its technical characteristics are digitization, networking, intelligence, and multimedia. Its basic characteristics are openness, sharing, interaction, cooperation, and ubiquitous. Promote educational modernization with educational informatization and change the traditional mode with information technology. Education itself is providing services, creating an environment for users and providing resources. It is an industry where people deal with each other, so the attribute of service is inevitable.

Informed Transitions Kenneth J. Burhanna, 2013-02-07 How can libraries and librarians across the educational continuum work together to support student transitions from high school to college utilizing free or low cost resources? This book supplies the answers. *Informed Transitions: Libraries Supporting the High School to College Transition* identifies the ways in which libraries and librarians can work together and create valuable resources that help students transition successfully to college despite the challenges of increasing demand and diminishing resources. The book is organized into three sections: background, expectations, and skills; conversations and collaborations; and programs and resources. Section 1 establishes a foundational understanding of the libraries' role in supporting college transitions. Section 2 shares model conversations that move this work forward, stressing its collaborative nature. The third section highlights some well-established programs and resources that effectively support high school to college transitions. Practical information is provided throughout, pinpointing what high school students need to know to smoothly transition to college, spotlighting the expectations of college professors, and discussing audience-specific methods of working with students at the high school and college levels.
