The Evolution of Conceptual Modeling Roland Kaschek,Lois M.L. Delcambre,2011-02-04 Conceptual modeling represents a recent approach to creating knowledge It has emerged in response to the computer revolution which started in the middle of the 20th century Computers in the meantime have become a major knowledge media Conceptual modeling provides an answer to the difficulties experienced throughout the development of computer applications and aims at creating effective reasonably priced and sharable knowledge about using computers in business Moreover it has become evident that conceptual modeling has the potential to exceed the boundaries of business and computer usage This state of the art survey originates from the International Seminar on the Evolution of Conceptual Modeling held in Dagstuhl Castle Germany in April 2008 The major objective of this seminar was to look into conceptual modeling from a historical perspective with a view towards the future of conceptual modeling and to achieve a better understanding of conceptual modeling issues in several different domains of discourse going beyond individual modeling projects The book contains 14 chapters These were carefully selected during two rounds of reviewing and improvement from 26 presentations at the seminar and are preceded by a detailed preface providing general insights into the field of conceptual

modeling that are not necessarily discussed in any of the chapters but nevertheless aid in conceptualizing the inner structure and coherence of the field The chapters are grouped into the following three thematic sections the evolution of conceptual modeling techniques the extension of conceptual modeling to a service oriented peer to peer or Web context and new directions for conceptual modeling

Perspectives on Business Modelling Anders G. Nilsson, Christofer Tolis, Christer Nellborn, 2012-12-06 How can established models and methods be employed for the understanding and change of organisations One of the key issues presented in this book is bridging the communication gap between business leaders and IT experts in companies and public services This is facilitated by combining different models for the development of corporate strategies business processes and information support The leading idea behind this book is to present different perspectives on business modelling based on established theories and practical experiences The book offers advanced knowledge and relevant information on the key issues in business modelling for today's organisations
