An Annotated Timeline of Operations Research Saul I. Gass, Arjang A. Assad, 2007-02-15 An Annotated Timeline of Operations Research An Informal History recounts the evolution of Operations Research OR as a new science the science of decision making Arising from the urgent operational issues of World War II the philosophy and methodology of OR has permeated the resolution of decision problems in business industry and government The Timeline chronicles the history of OR in the form of self contained expository entries Each entry presents a concise explanation of the events and people under discussion and provides key sources where further relevant information can be obtained In addition books and papers that have influenced the development of OR or helped to educate the first generations of OR academics and practitioners are cited throughout the book Starting in 1564 with seminal ideas that form the precursors of OR the Timeline traces the key ideas and events of OR through 2004 The Timeline should interest anyone involved in OR researchers practitioners academics and especially students who wish to learn how OR came into being Further the scope and expository style of the Timeline should make it of value to the general reader interested in the development of science and technology in the last half of the twentieth century

Evaluation for an Equitable Society Stewart I. Donaldson, Robert Picciotto, 2016-04-01 Governments and organizations of all shapes and sizes espouse values of equity and social justice Yet there are many examples of unfair social arrangements and employment conditions dysfunctional government practices and growing income inequality in both developed and developing countries worldwide The profession and transdiscipline of evaluation is well equipped to address issues of inequality and social injustice but until recently has been much more focused on primary stakeholder and donor satisfaction being as useful as possible to funders of interventions and evaluations and accountability concerns The authors in this volume challenge the field of evaluation to become more concerned about using evaluation to develop more equitable organizations governments and societies Leading evaluation theorists and practitioners including Michael Scriven Jennifer Greene Thomas Schwandt Emily Gates Sandra Mathison Karen Kirkhart Saville Kushner Lois Ellin Datta Ernest House Robert Stake Patricia Rogers Robert Picciotto and Stewart Donaldson provide a range of visions for how evaluation can play a much larger role in facilitating social justice across the globe Evaluation for an Equitable Society will be of great interest to evaluation practitioners students and scholars It will be of interest to those teaching and taking introductory evaluation courses as well as advanced courses focused on improving evaluation theory and practice

Systems Approaches to Making Change: A Practical Guide Martin Reynolds, Sue Holwell (Retired), 2020-02-18 The five approaches outlined in this book offers the systems thinking practitioner a range of interchangeable tools for pro actively making systemic improvements amidst complex situations of change and uncertainty Practitioners from all professional domains are increasingly confronted with incidences of systemic failure yet poorly equipped with appropriate tools and know how for understanding such failure and the making of systemic improvement In

our fragile Anthropocene world where systems change is often invoked as the rallying call for purposeful alternative action this book provides a toolkit to help constructively make systems that can change situations for the better Systems Approaches offers an excellent introduction for those seeking to understand systems thinking and to enact systems thinking in practice The book helps practitioners from all professions to better understand inter relationships engage with multiple perspectives and reflect on boundary judgements that can inhibit or enhance improved purposeful change After an editorial introduction to these systems thinking in practice capabilities successive chapters illustrate five systems approaches each chosen for having a rigorous though adaptable framework and a robust long pedigree of application in complex situations Each chapter illustrates what the approach is about followed by invaluable tips and insights from experience regarding how the tools might be practiced Amongst updates from originating authors for this 2nd edition each approach has an accompanying postscript on some developments since the 1st edition Human Benefit through the Diffusion of Information Systems Design Science Research Jan Pries-Heje, John J. Venable, Deborah Bunker, Nancy L. Russo, Janice I. DeGross, 2010-03-10 This book constitutes the proceedings of the 2010 Joint International Working Conference of the International Federation for Information Processing Working Groups 8.2 and 8.6 Both working groups are part of IFIP Technical Committee 8 the technical committee addressing the field of Information Systems IFIP WG 8.2 the International Information Systems and Organizations was established in 1977 IFIP WG 8.6 Diffusion Transfer and Implementation of Information Technology was established in 1994 In accordance with their respective themes both IFIP WG 8.2 and IFIP WG 8.6 have long had an interest in the human impact of information systems In December 1998 they held a joint working conference in Helsinki Finland on the theme Information Systems Current Issues and Future Challenges The two working groups joint interest in and collaboration on research concerning the human side of IS is continued and extended through this joint working conference held on the campus of Curtin University of Technology from March 30 to April 1 2010 in Perth Western Australia This conference Human Benefit Through the Diffusion of Information Systems Design Science Research combines the traditional themes of the two working groups with the growing interest within the IS research field in the area of design science research *Finding Wholeness Through the Science of Connecting* Victor MacGill, 2025-01-30 Drawing on the author's decades of experience in social work this book introduces readers to a systems approach to reconnecting in a complex disconnected world applying the Dynamics of Life model The systems sciences allow us to explore how we connect and disconnect which can help us find ourselves again Through his Dynamics of Life model Victor MacGill presents this science in a simple understandable way so that practitioners can build their skills and learn methods to apply with clients The beginning of the book introduces theoretical concepts such as complex adaptive systems living systems and 4e cognition The second half introduces tools for how to manage conflict and to reconnect and rebuild relationships with ourselves individuals family and community The book is a manual for reconnecting ourselves to ourselves others and the world to

realise our greater potential An essential resource in a disconnected and fragmented world this book is for anyone in the helping professions including counsellors psychologists social workers and coaches and so forth *Analytical Models For Decision-Making* Sanderson, Colin, Gruen, Reinhold, 2006-03-01 Health care systems are complex and as a result it is often unclear what the effects of changes in policy or service provision might be At the same time resources for health care tend to be in short supply which means that public health practitioners have to make difficult decisions This book describes the quantitative and qualitative methods that can help decision makers to structure and clarify difficult problems and to explore the implications of pursuing different options The accompanying CD ROM provides the opportunity to try out some of the proposed solutions The book examines Models and decision making in health care Methods for clarifying complex decisions Models for service planning and resource allocation Modelling for evaluating changes in systems Reading Critically at University Mike Metcalfe, 2006-04-18 Have you ever been asked to critique an article book or past project and wondered what exactly was meant by critique This book provides 13 different ways of undertaking a critique It will help you to confidently use these critique methods to develop your own methods Each chapter contains sample passages example critiques and explanations of underlying theory to help you to consolidate your understanding and skills Reading Critically at University will support undergraduate and postgraduate students across the social sciences as they master different critique methods It will also be an excellent resource for all undergraduate study skills modules SAGE Study Skills are essential study guides for students of all levels From how to write great essays and succeeding at university to writing your undergraduate dissertation and doing postgraduate research SAGE Study Skills help you get the best from your time at university Visit the SAGE Study Skills hub for tips resources and videos on study success *Performance-Oriented Architecture* Michael Hensel, 2013-05-20 Architecture is on the brink It is a discipline in crisis Over the last two decades architectural debate has diversified to the point of fragmentation and exhaustion What is called for is an overarching argument or set of criteria on which to approach the design and construction of the built environment Here the internationally renowned architect and educator Michael Hensel advocates an entirely different way of thinking about architecture By favouring a new focus on performance he rejects longstanding conventions in design and the built environment This not only bridges the gap between academia and practice but even more significantly the treatment of form and function in design It also has a far reaching impact on knowledge production and development placing an important emphasis on design research in architecture and the value of an interdisciplinary approach Though performance first evolved as a concept in the humanities in the 1940s and 1950s it has never previously been systematically applied in architecture in an inclusive manner Here Michael Hensel offers Performance Orientated Architecture as an integrative approach to architectural design the built environment and questions of sustainability He highlights how core concepts and specific traits such as climate material performance and settlement patterns can put architecture in the service of the natural environment A wide range of examples are cited to support his

argument from traditional sustainable buildings such as the Kahju Bridge in Isfahan and the Topkap Palace in Istanbul to more contemporary works by Cloud 9 Foreign Office Architects Steven Holl and OCEAN

sustainable built environments **Organizations as Complex Systems** Maurice Yolles, 2006-09-01 Managing the Complex is an ambitious title and it would be an audacious one if we were not to begin with a frank admission to date few to none of us have a skill set which includes managing the complex We try various things we write about others and we wonder about still others When a tool perspective or technique comes along which seems to evoke success we emulate it probe it and recoil at the all too often admission that it was situation and context which afforded success its opportunity and not some quality intrinsic to the tool perspective or technique Indeed if the study of complexity has done anything for managers and for those who espouse managerial theory it is in providing a scientific foundation for the notion that context matters Those who preach abstract ideas have then to reconcile themselves to the notion that situation and embodiment matters Those who believe in strong causality and determinism are left to wrestle with the role of chance uncertainty and chaos Those who prefer to argue that men move history are confronted with the role of environment and affordances while those who argue the reverse are left to contend with charisma irrationality of crowds and the strange qualities we know as emotions A series on complex systems has less ambitious goals to contend with than this Such a series can deal with classifications and categories and speak of noise as if it were not the central focus of the problem Managing the complex is about managing noise or perhaps we should say it is about dealing with accepting making room for and learning from noise The articles in this volume and in volumes to come will each be considered as noise by some and as gems by others but we hope that practicing managers and academics alike will find plenty of fuel to drive their personal explorations into understanding and perhaps even managing the complex *Applied Systems Thinking for Health Systems Research: a Methodological Handbook* Don de Savigny, Karl Blanchet, Taghreed Adam, 2017-09-16 Patient safety in health systems has become more and more important as a theme in health research and so it is not surprising to see a growing interest in applying systems thinking to healthcare However there is a difficulty health systems are very complex and constantly adapting to respond to core drivers and fit needs How do you apply systems thinking in this situation and what methods are available National health authorities international donors and research practitioners need to know the how to of conducting health systems research from a systems thinking perspective This book will fill this gap and provide a range of tools that give clear guidance of ways to carry out systems thinking in health These methodologies include System dynamics and causal loops Network analysis Outcome mapping Soft systems methodology Written by an international team of experts in health research this handbook will be essential reading for those working in or researching public health health policy health systems global health service improvement and innovation in practice Information Systems Development Jaroslav Pokorny, Vaclav Repa, Karel Richta, Wita Wojtkowski, Henry Linger, Chris Barry, Michael Lang, 2011-09-02 Information Systems Development Business Systems and Services Modeling and Development is the collected proceedings of the 19th International Conference on Information Systems Development held in Prague Czech Republic August 25 27 2010 It follows in the tradition of previous conferences in the series in exploring

the connections between industry research and education These proceedings represent ongoing reflections within the academic community on established information systems topics and emerging concepts approaches and ideas It is hoped that the papers herein contribute towards disseminating research and improving practice *Education Management and Management Science* Dawei Zheng,2015-07-28 This proceedings volume contains selected papers presented at the 2014 International Conference on Education Management and Management Science ICEMMS 2014 held August 7 8 2014 in Tianjin China The objective of ICEMMS2014 is to provide a platform for researchers engineers academicians as well as industrial professionals from all over the wo Systems Thinkers Magnus Ramage,Karen Shipp,2020-02-19 This book presents a biographical history of the field of systems thinking by examining the life and work of thirty of its major thinkers It discusses each thinker s key contributions the way this contribution was expressed in practice and the relationship between their life and ideas This discussion is supported by an extract from the thinker s own writing to give a flavour of their work and to give readers a sense of which thinkers are most relevant to their own interests
