Infant Previewing Predicting And Sharing Interpersonal Outcome:

Infant Previewing Paul V. Trad, 2012-12-06 *Infant Previewing Predicting and Sharing Interpersonal Outcome* examines the developmental processes of the first two years of life from an innovative perspective that may dramatically alter the way health care professionals view and predict their perceptions of developmental phenomena. The volume introduces the concept of previewing a developmental principle that organizes our understanding of how infants and caregivers share experience during the first few years of life. Previewing is manifested by virtually all caregivers and is designed to provide the caregiver-infant dyad with insight into imminent maturational trends and with the motivation for continuing on the development journey with a sense of mastery and control. The book not only launches the theory underlying the concept of previewing but it also offers guidelines for using previewing to enhance the relationship between infant and caregiver. Various applications of previewing as a means of fostering the infant's predictive abilities as a catalyst for differentiating and coordinating developmental functions and as a principle for motivating interpersonal communication are analyzed.

The Motherhood Constellation Daniel N. Stern, 2020-06-16 This book explores the nature of parent-infant psychotherapies, therapies that are a major segment of the rapidly growing sprawling field of infant mental health. It examines the different elements that make up the parent-infant clinical system.

Narcissism and the Interpersonal Self John F. Finkelstein, Alan L. Grey, 1993 This study discusses narcissism and problems of the self from the perspective of psychoanalysis. The contributors define the major differences between the interpersonal viewpoint and other schools of psychoanalysis in terms of both diagnosis and treatment.

Emerging Topics on Father Attachment Lisa A. Newland, Harry S. Freeman, Diana D. Coyl, 2014-01-02 This book is the first of its kind to focus specifically on children's attachment to fathers and explores the connections among fathering, family dynamics, and attachment relationships. It includes theoretical, methodological, and research reports written by an interdisciplinary group of researchers from around the globe. The purpose of this book is to familiarize the reader with the conceptualization, measurement, and provisions of the attachment bond between children and their fathers from infancy through young adulthood and across diverse individual, family, community, and cultural systems. Recent empirical findings suggest that new methods of measuring child-father attachment are warranted and that attachment to fathers may be unique from but complementary to attachment to mothers. These findings also suggest that attachment to fathers uniquely predicts children's healthy developmental outcomes and these findings are robust across various contexts but these predictive relationships are best understood within context. This book provides a summary of current scholarly knowledge of fathering and attachment and describes future directions to be explored by professionals, policy makers, and practitioners within family services, education, and social work settings. It is also of interest to the general public. This book was published as a special issue of *Early Child Development and Care*.
