**Information Structure Theoretical And Empirical Aspects Language Context And Cognition:**
    **Sociobiological Bases of Information Structure** Viviana Masia,2017-11-16 The book tackles the sociobiological bases of Information Structure IS inquiring both its evidential and neurobiological underpinnings in human communication Its purpose is to delve into the epistemic and neurocognitive rationales behind the realization of informational hierarchies in a sentence The book zooms in on an interplay that between IS and evidentiality that has never been explored in IS studies and seeks to recast IS phenomena in an epistemological perspective The neurocognitive approaches discussed propose neurophysiological investigations on IS processing both with ERP and ERS vs ERD measurements In its overall structure and general purposes the book is conceived for interested scholars working in the fields of linguistics neuropragmatics experimental psychology philosophy of language and cognitive sciences in general and it adds some further contribution to ongoing psycholinguistic and neurolinguistic experimental research on the processing of topic focus and presupposition assertion dichotomies     **Perspectives on Historical Syntax** Carlotta Viti,2015-04-15 This volume discusses topics of historical syntax from different theoretical perspectives ranging from Indo European studies to generative grammar functionalism and typology It examines mechanisms of syntactic change such as reanalysis analogy grammaticalization independent drift and language contact as well as procedures of syntactic reconstruction More than one factor is considered to explain a syntactic phenomenon since it is maintained that an accurate account of multiple causations of both structural and social nature is to be preferred to considerations of economy Special attention is given to the relationship between principles of syntactic theory and a search for data reliability through the methods of corpus linguistics Data are drawn from a variety of languages including Hittite Vedic Ancient Greek Latin Romance Germanic Baltic Slavic Austroasiatic Gulf of Guinea creoles The book may be therefore of interest for specialists of these languages in addition to scholars and advanced students of syntax and historical linguistics     **'Subordination' versus 'Coordination' in Sentence and Text** Cathrine Fabricius-Hansen,Wiebke Ramm,2008-05-21 The papers collected in this volume including a comprehensive introduction investigate semantic and discourse related aspects of subordination and coordination in particular the relationship between subordination coordination at the sentence level and subordination coordination or hierarchical non hierarchical organization at the discourse level The contributions in part I are concerned with central theoretical questions part II consists of corpus based cross linguistic studies of clause combining and discourse structure involving at least two of the languages English German Dutch French and Norwegian part III contains papers addressing specific predominantly semantic topics relating to German English or French and the papers in part IV approach the topic of subordination coordination and rhetorical relations from a diachronic Old Indic and Early Germanic perspective The book aims to contribute to a better understanding of information packaging on the sentence and text level related within a particular language as well as cross linguistically
    **The Discourse Potential of Underspecified Structures** Anita Steube,2008-11-03 The volume demonstrates the

interdependence of man s language capacity and his other conceptual capacities This enables linguistic structures to be minimalised and for extra linguistic domains to provide much of the interpretations of sound and meaning Underspecification is demonstrated in the word formation of Indo European Late Archaic Chinese and modern Khmer on the word and sentence levels by the event structures of German and in the information structure predominantly of languages with the so called free word order German Slavic languages Arabic compared with English and the tone language Hausa The volume is noteworthy due to the close cooperation between theoretical and experimental research Within grammar it has especially strengthened prosodic research and the syntax phonology interrelations and their interpretations and it has helped to create data bases for the relations within texts and to evaluate the findings     Modeling and Using Context Henning Christiansen,Isidora Stojanovic,George A. Papadopoulos,2015-12-14 This book constitutes the proceedings of the 9th International and Interdisciplinary Conference on Modeling and Using Context CONTEXT 2015 held in Larnaca Cyprus in November 2015 The 33 full papers and 13 short papers presented were carefully reviewed and selected from 91 submissions The main theme of CONTEXT 2015 was Back to the roots focusing on the importance of interdisciplinary cooperations and studies of the phenomenon Context context modeling and context comprehension are central topics in linguistics philosophy sociology artificial intelligence computer science art law organizational sciences cognitive science psychology etc and are also essential for the effectiveness of modern complex and distributed software systems CONTEXT 2015 embedded also a Doctoral Symposium and three workshops Smart University 3 0 CATI Context Awareness and Tactile Design for Mobile Interaction and SHAPES 3 0 The Shape of Things     Focus and Background in Romance Languages Andreas Dufter,Daniel Jacob,2009-06-18 Focus background structure has taken center stage in much current theorizing about sentence prosody syntax and semantics However both the inventory of focus expressions found cross linguistically and the interpretive consequences associated with each of these continue to be insufficiently described This volume aims at providing new observations on the availability and the use of focus markings in Romance languages In doing so it documents the plurality of research on focus in Spanish Portuguese French Italian and Romanian Topics covered include constituent fronting and clefting the position of subjects and focus particles clitic doubling of objects and information packaging in complex sentences In addition some contributions explore focus background structure from acquisitional and diachronic angles while others adopt a comparative perspective studying differences between individual Romance and Germanic languages Therefore this volume is of interest to a broad audience within linguistics including syntacticians semanticists and historical linguists **Information Structure** Anita Steube,2004 The first volume of the series is devoted to the subjects information structure and contrast The working hypothesis is that apart from the use of lexical indication the expression of contrast vs correction is primarily carried by the intonation contour as a means for indicating scope and focus in negating constructions The papers in this volume proceed from the premise that the information structure is preformed conceptually and on articulation in the

dynamic context is then portioned and linearized mapped onto the syntactic representation via the semantic representation and finally realized intonationally The findings are partly based on neurolinguistic and psycholinguistic experiments

**Interfaces and Interface Conditions** Andreas Späth,2012-02-14 The volume contains articles that focus on the interface between linguistic and conceptual knowledge The issues addressed in the volume include the preconditions of every level of the language system that are required for the transformation of linguistic information into conceptual representations In accordance with Chomsky s Minimalist language model the language system is embedded into the performative systems where language is a part of the cognitive competence of human beings i e system of articulation and perception A P and the conceptual intentional system C I During the formation of linguistic structures every performative system obtains well formed representations as its input information The articles of the volume show how interface conditions determine the linguistic representations on each level of the linguistic system Interface conditions result in requirements for the ordering of linguistic elements The syntactic transformation achieves a point where the linguistic structure formation branches to two distinct representational levels Both levels deliver instructions for the systems of performance A P and C I Linearization takes place on the syntactic surface of a sentence The linearization of linguistic elements is manifest at the derivational point of Spell out and also on the level of the phonological form PF This means that on the one hand linearization is relevant to the phonetic aspect of linguistic expressions and on the other hand the interpretation of linguistic utterances is based on hierarchical structures On the level of Logical Form LF all operations apply which don t have any influence on the linear order in overt syntax In addition they affect the generation of hierarchical structures The structure obtained on LF is the representational format of the semantic form of a sentence *Linguistic Supertypes* Per Durst-Andersen,2011-02-28 The book offers a completely new view of language and of languages such as Russian Chinese Bulgarian Georgian Danish and English by dividing them into three supertypes on the basis of a step by step examination of their relationship to perception and cognition their representation of situations and their use in oral and written discourse The dynamic processing of visual stimuli involves three stages input experience intake understanding and outcome a combination The very choice among three modalities of existence gives a language a certain voice either the voice of reality based on situations the speaker s voice involving experiences or the hearer s voice grounded on information This makes grammar a prime index all symbols are static and impotent and need a vehicle i e grammar which can bring them to the proper point of reference Language is shown to be a living organism with a determinant category aspect mood or tense which conquers territory from other potential competitors trying to create harmony between verbal and nominal categories It is demonstrated that the communication processes are different in the three supertypes although in all three cases the speaker must choose between a public and a private voice before the grammar is put into use *The Manipulative Disguise of Truth* Viviana Masia,2021-05-15 Becoming effective hunters of manipulative communicative moves is far from an easy capacity to develop This book aims at offering a

guide to the most dangerous traps of deceptive language as triggered by implicit communication strategies such as presupposition implicature topicalization and vague expressions A look at different contexts of language use highlights some of the most remarkable implications of using indirect speech and of how it affects the correct comprehension of a message Within the remit of communication and pragmatics studies this work marks an advancement in the direction of delving into the linguistic manifestations of manipulative discourse its most common contexts of use and the educational paths that can be undertaken to master it in everyday interactions *Language* George Melville Bolling,Bernard Bloch,2006 **The Architecture of Focus** Valéria Molnár,Susanne Winkler,2011-12-22 This collection investigates the architecture of focus in linguistic theory from different theoretical perspectives Research on focus and information structure in the last four decades has shown that the phenomenon of focus is highly complex the theoretical approaches manifold and the data highly sensitive The main emphasis has been placed on the integration of the notion of focus in generative grammar In recent years however the approaches to focus and information structure underwent a radical change in perspective The theoretical concept of focus its related terms and phenomena became the object of research Along with it the research questions shifted instead of locating focus in the architecture of grammar linguists investigate the architecture of focus itself The central underlying idea of this collection is to document this change in perspective with the aim of isolating essential keystones and research areas in both the theoretical and empirical domain The book is structured accordingly Following the introduction there are four main sections The general section discusses the theoretical foundations of focus within grammar The second section hosts papers which investigate the representation of focus and topic at the syntax pragmatics interface The third section discusses the phonological representation of focus and its relation to meaning The papers of the final section investigate different types of focus constructions in a variety languages The collection of papers on the architecture of focus its interpretation and representation mirror the establishment of the focus research field *Syntax–Semantics Interface* Eva Hajičová,2018-03-01 The volume SYNTAX SEMANTICS INTERFACE is a collection of selected studies written by Eva Haji ov and published between the years 1973 and 2014 The contributions are based on the theoretical framework of the Functional Generative Description as proposed by Petr Sgall in early sixties and developed further by him and his followers since then Thematically the volume reflects the author s research contributions to four main domains i the specification of the underlying deep sentence structure analyzed in terms of dependency relations ii the information structure of the sentence topic focus articulation and its relation to the specification of presupposition and negation and to other related phenomena iii building of a scheme of annotated corpus of Czech to serve among other things for verification of linguistic theoretical claims and iv some fundamental aspects of discourse structure namely the notion of the hiearachy of elements in the stock of knowledge shared by the speaker and the hearer All the papers except for one have been originally published in English and in they pay due respect to a comparison of the author s original findings with the currrent state of the art of linguistic theory at home

and abroad     *Discourse and Knowledge* Teun A. van Dijk,2014-07-17 Both discourse and knowledge are fundamental concepts but they are often treated separately The first book to adopt a multidisciplinary approach to studying the relationship between these concepts Discourse and Knowledge introduces the new field of epistemic discourse analysis and uses a wide range of examples to illustrate the theory     **Processing Syntax and Morphology** Ina Bornkessel-Schlesewsky,Matthias Schlesewsky,2009-09-03 This book reviews interdisciplinary work on the mental processing of syntax and morphology It focuses on the fundamental questions at the centre of this research for example whether language processing proceeds in a serial or a parallel manner which areas of the brain support the processing of syntactic and morphological information whether there are neurophysiological correlates of language processing and the degree to which neurolinguistic findings on syntactic andmorphological processing are consistent with theoretical conceptions of syntax and morphology The authors describe the outcomes of methods in neurophysiology for example functional magnetic resonance imaging behavioural psycholinguistics and neuropsychological lesion studies and provide briefintroductions to the methods themselves They extend basic findings at the word and sentence level by considering how the mental processing of syntax and morphology relates to prosody discourse semantics and world knowledge They have divided the work into four parts concerned with word structure sentence structure processing syntax and morphology at the interfaces and a comparison of different models of syntactic and morphological processing in the neurophysiological domain The book isdirected at graduate students and researchers in theoretical linguistics psycho and neurolinguistics neurophysiology and psychology
