The Concept of Enterprise Architecture from Theory to Practice Tiko Iyamu, 2023-12-06 Even though the field of enterprise architecture EA has matured many organisations still struggle with its development and implementation particularly those organisations involved in continuous transformational cycles and subjected to different environmental trends This book is intended to assist organisations in getting a grip on the factors influencing EA implementation and gaining a deeper understanding of why things happen the way they do in the practice of EA It is a comprehensive and definitive resource that is useful to both business professionals and academics The book presents an approach for the development implementation or institutionalisation of EA that is independent of any method or other architecture frameworks It can be applied directly using a realistic selection of organizational variables The approach has two distinctive features that support EA even in complex environments From both technical and non technical perspectives it identifies influencing factors and how they manifest in the practice of EA in an organization It offers linear and practical mechanisms for developing and implementing EA to fortify the practice of the concept in an organisation This approach represents a significant contribution to EA Starting with descriptions for EA the book offers deepened models and frameworks for the development and implementation of EA at the domain level It also covers factors upon which a model is built for the institutionalisation of the concept Additionally the book discusses the implications of EA for sponsors architects and other stakeholders responsible for EA development implementation and institutionalisation

Business Information Technology Geoffrey Elliott, Susan Starkings, 1998 An understanding of the role and contribution of IT in business decision making is an increasingly high profile part of business education This text offers a modern treatment of the subject anticipating a growing trend in business syllabuses away from big functional information systems towards development of end user information systems for decision making at the managerial and strategic level of a business organization

Legal Knowledge and Information Systems M.-F. Moens, P. Spyns, 2005-11-29 Currently several artificial intelligence technologies are growing increasingly mature including computational modeling of reasoning natural language processing information retrieval information extraction machine learning electronic agents and reasoning with uncertainty Their integration in and adaptation to legal knowledge and information systems needs to be studied Parallel to this development e government applications are gradually gaining ground among local national European and international institutions More than 25 years of research in the field of legal knowledge and information systems has resulted in many models for legal knowledge

representation and reasoning However authors and reviewers rightly remarked that there are still some essential questions to be solved First there is a need for the integration and harmonization of the models Secondly there is the difficult problem of knowledge acquisition in a domain that is in constant evolution If one wants to realize a fruitful marriage between artificial intelligence and e government the aid of technologies that automatically extract knowledge from natural language and from other forms of human communication and perception is needed
