Intelligent Decision Support Systems for Smart City Applications Loveleen Gaur,Vernika Agarwal,Prasenjit Chatterjee,2022-12-05 INTELLIGENT DECISION SUPPORT SYSTEMS FOR SMART CITY APPLICATIONS This book provides smart city frameworks to address new difficulties by adding new features and allowing the city environment to react to collected data and information to increase the efficiency and sustainability of services for inhabitants Making a smart city is an emerging strategy to mitigate the problems generated by urban population growth and rapid urbanization This book aims to provide a better understanding of the concept of smart cities and the application of an intelligent decision support system Based on the analysis of existing information there are eight critical factors of smart city initiatives management and organization technology governance policy context people and communities economy built infrastructure and natural

environment This book will focus on the application of the decision support system in managing these eight crucial aspects of smart cities The intent in writing this book was also to provide a source that covers the stage by stage integration of the four key areas involving planning physical infrastructure ICT infrastructure and deploying the smart solutions necessary for city transformation With this as the motivation Decision Support Systems for Smart City Applications provides the application of an intelligent decision support system for effectively and efficiently managing the transformation process which can aid various supply chain stakeholders academic researchers and related professionals in building smart cities Various chapters of this book are expected to support practicing managers during the implementation of smart solutions for city transformation Audience This book is aimed at both academics and practitioners alike in the fields of intelligent computing decision support systems the manufacturing industry supply chain managers stakeholders policymakers and other technical and administrative personnel

Advances in Systems, Computing Sciences and Software Engineering Tarek Sobh, Khaled Elleithy, 2006-08-15 The conference proceedings of the International Conference on Systems Computing Sciences and Software Engineering include a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Computer Science Software Engineering Computer Engineering and Systems Engineering and Sciences The International Conference on Systems Computing Sciences and Software Engineering SCSS 2005 was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2005 CISSE 2005 the World's first Engineering Computing and Systems Research E Conference was the first high caliber Research Conference in the world to be completely conducted online in real time via the internet CISSE received 255 research paper submissions and the final program included 140 accepted papers from more than 45 countries The whole concept and format of CISSE 2005 was very exciting and ground breaking The powerpoint presentations final paper manuscripts and time schedule for live presentations over the web had been available for 3 weeks prior to the start of the conference for all registrants so they could pick and choose the presentations they want to attend and think about questions that they might want to ask The live audio presentations were also recorded and are part of the permanent CISSE archive which includes all power point presentations papers and recorded presentations All aspects of the conference were managed on line not only the reviewing submissions and registration processes but also the actual conference Conference participants authors presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office Suffice to say that CISSE received submissions from more than 50 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the

ground conference The CISSE conference audio room provided superb audio even over low speed internet connections the ability to display PowerPoint presentations and cross platform compatibility the conferencing software runs on Windows Mac and any other operating system that supports Java In addition the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session The implemented conferencing technology starting with the submission review system and ending with the online conferencing capability allowed CISSE to conduct a very high quality fulfilling event for all participants

Interdisciplinary Approaches to Information Systems and Software

Engineering Mukherjee, Alok Bhushan, Krishna, Akhouri Pramod, 2019-04-30 It is now more important than ever to implement approaches and methods that can be effective in extracting meaningful information from large data sets Although data sets may be available for different aspects of society we may not assess the intrinsic characteristics of their behavior effectively Additionally frameworks are needed that can store process and represent the data in such a manner that can be of practical significance Interdisciplinary Approaches to Information Systems and Software Engineering is an essential reference publication that assesses the significance of robust information systems in characterizing events of varying nature and dimensions Additionally the book includes studies on the development and application of decision making and prediction modeling frameworks using different approaches such as agent based modeling spatial decision support systems and spatial data mining Covering topics such as management information systems knowledge discovery and mathematical analysis this book is ideal for professionals researchers and academicians in various disciplines including computer science information technology geographical information systems remote sensing and earth system sciences *Computerworld*, 1982-05-10 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network
