Jaakkola,2021-01-04 Information modeling and knowledge bases are important technologies for academic and industrial research that goes beyond the traditional borders of information systems and computer science The amount and complexity of information to be dealt with grows continually as do the levels of abstraction and the size of databases This book presents the proceedings of the 30th International Conference on Information Modelling and Knowledge Bases EJC2020 due to be held in Hamburg Germany on 8 and 9 June 2020 but instead held as a virtual conference on the same dates due to the Corona virus pandemic restrictions The conference provides a research forum for the exchange of scientific results and experiences and brings together experts from different areas of computer science and other disciplines with a common interest in information modeling and knowledge bases The subject touches on many disciplines with philosophy and logic cognitive science knowledge management linguistics and management science as well as the emerging fields of data science

and machine learning all being relevant areas The 23 reviewed selected and upgraded contributions included here are the result of presentations comments and discussions from the conference and reflect the themes of the conference sessions learning and linguistics systems and processes data and knowledge representation models and interfaces formalizations and reasoning models and modeling machine learning models and programming environment and predictions modeling emotion and social networks The book provides an overview of current research and applications and will be of interest to all those working in the field

**Information Modelling and Knowledge Bases XXVI** B. Thalheim,H. Jaakkola,Y. Kiyoki,2014-12-18

Within the last three decades information modelling and knowledge bases have become essential subjects not only for academic communities related to information systems and computer science but also for businesses where information technology is applied This book presents the proceedings of EJC 2014 the 24th International Conference on Information Modelling and Knowledge Bases held in Kiel Germany in June 2014 The main themes of the conference were conceptual modelling including modelling and specification languages domain specific conceptual modelling and validating and communicating conceptual models knowledge and information modelling and discovery including knowledge representation and knowledge management advanced data mining and analysis methods as well as information recognition and information modelling linguistics modelling cross cultural communication and social computing environmental modelling and multimedia data modelling and systems which includes modelling multimedia information and knowledge content based multimedia data management content based multimedia retrieval as well as privacy and context enhancing technologies This book will be of interest to all those who wish to keep abreast of new developments in the field of information modelling and knowledge bases

**Information Modelling and Knowledge Bases XXXI** A. Dahanayake,J. Huiskonen,Y. Kiyoki,2020-01-06 Information modeling and knowledge bases have become an important area of academic and industry research in the 21st century addressing complexities of modeling that reach beyond the traditional borders of information systems and academic computer science research This book presents 32 reviewed selected and updated papers delivered at the 29th International Conference on Information Modeling and Knowledge Bases EJC2019 held in Lappeenranta Finland from 3 to 7 June 2019 In addition two papers based on the keynote presentations and one paper edited from the discussion of the panel session are included in the book The conference provided a forum to exchange scientific results and experience and attracted academics and practitioners working with information and knowledge The papers cover a wide range of topics ranging from knowledge discovery through conceptual and linguistic modeling knowledge and information modeling and discovery cross cultural communication and social computing environmental modeling and engineering and multimedia data modeling and systems to complex scientific problem solving The conference presentation sessions Learning and Linguistics Systems and Processes Data and Knowledge Representation Models and Interface Formalizations and Reasoning Models and Modeling Machine Learning Models and Programming Environment and Predictions and Emotion Modeling and Social Networks reflect the

main themes of the conference The book also includes 2 extended publications of keynote addresses Philosophical Foundations of Conceptual Modeling and Sustainable Solid Waste Management using Life Cycle Modeling for Environmental Impact Assessment as well as additional material covering the discussion and findings of the panel session Providing an overview of current research in the field the book will be of interest to all those working with information systems information modeling and knowledge bases
