Beyond A-levels

Ann Hodgson,Ken Spours,2003-12-16 Since its introduction over 50 years ago the A level has been a constant subject of debate in schools HE and government Sometimes hailed as a gold standard there is now intense speculation about the future of the A level in particular but also about post 14 qualifications in general The furore about quality and standards which accompanies each year s A level results has become an annual fixture in the UK press calendar With the introduction of Curriculum 2000 and an increasing number of calls for Baccalaureate style examinations vocational qualifications and more the need for serious debate and change in this field is clear Based on primary research by two of the leading commentators on the qualifications this book is a wide ranging and critical view of the fundamental approaches of the education system in

Britain today With government action on this subject looking inevitable this will be a challenging and important book for anyone interested in this debate Germany, 1858-1990 Alison Kitson, 2001 Specially written for the AS A2 examinations this book combines extended period cover with detailed focus on exam board selected topics The lively accessible text is supplemented by Spotlights providing detailed study of sources on key issues and topics and Document Exercises which offer opportunities for assessment and exam practice Covering almost 150 years between unification and reunification with a particular emphasis on the interwar years the text encourages students to think for themselves around the issues that have affected German history during this period and to consider important historical debates and controversies
