## **Loft Conversions:**

**Loft Conversions** John Coutts, 2012-12-21 Pressure on space and changes in planning law mean that loft conversions are now at the forefront in the race to improve the performance of Britain's ageing housing stock. Since 1990 roof space conversions have increased UK housing capacity by more than 200 million square feet, a living area equivalent to a medium-sized city without the loss of a single square foot of greenfield land. *Loft Conversions* is the definitive technical guide to the conversion of roof spaces in single family dwellings. It brings together a wealth of practical and regulatory guidance in a form that is easy to read and comprehensively illustrated. This fully revised and updated second edition is intended primarily for architects, builders, surveyors and others professionally involved in the process of loft conversion. The insights it provides are also invaluable to self-builders and to householders wishing to achieve a deeper understanding of what a loft conversion involves.

[Loft Conversions](#) Richard J. Roddewig, 1981 *Roof Construction and Loft Conversion* C. N. Mindham, 2008-04-15 Full of detailed construction drawings, this book covers cut roofs, bolted truss roofs, trussed rafter roofs, trimmed openings and ventilation. A major section deals with loft to attic room conversions, giving guidance on planning procedures as well as dealing with structural matters and specifying conversion work. The Fourth Edition features a new chapter covering the growing number of engineered timber components available in the housebuilding industry. The use of I beams and roof cassettes is detailed for roof and room in the roof construction. The text has been fully updated to current standards and features additional detailed construction drawings. The chapters on attic conversion and construction have been expanded and a new attic conversion decision flow chart added. The book will prove invaluable to architects, house builders, roof carpenters, building control officers, trussed rafter manufacturers and students of building technology. The Author C. N. Mindham BSc has had a wide experience in the construction industry. After three years with TRADA as Eastern Regional Officer, he spent 11 years developing a timber engineering business to become one of the country's largest producers of trussed rafters. He became Managing Director of a company designing and manufacturing trussed rafters, joinery and prefabricated timber buildings, a post he held for eight years. Subsequently, he started his own consultancy for the timber industry, which has led him to his current position as Managing Director for a joinery and engineering company.
