Long Distance Anaphora:

Long Distance Anaphora Jan Koster, 1991-09-12 A collection of original articles on the nature of anaphoric systems in a wide variety of genetically and structurally different languages Long-Distance Dependencies Mihoko Zushi, 2013-10-31 This book investigates the theory of locality within the framework of minimalism with a special focus on restructuring and other related phenomena that exhibit an apparent violation of the strictly local conditions **The Blackwell Companion to Syntax** Martin Everaert, Henk Van Riemsdijk, 2008-04-15 Pre Order The Wiley Blackwell Companion to Syntax second edition publishing December 2017 Find out more at www.companiontosyntax.com This long awaited reference work marks the culmination of numerous years of research and international collaboration by the world's leading syntacticians There exists no other comparable collection of research that documents the development of syntax in this way Under the editorial direction of Martin Everaert and Henk van Riemsdijk this 5 volume set comprises 70 case studies commissioned specifically for this volume The 80 contributors are drawn from an international group of prestigious linguists including Joe Emonds Sandra Chung Susan Rothstein Adriana Belletti Jim Huang Howard Lasnik and Marcel den Dikken among many others A unique collection of 70 newly commissioned case studies offering access to research completed over the last 40 years Brings together the world's leading syntacticians to provide a large and diverse number of case studies in the field Explores a comprehensive range of syntax topics from an historical perspective Investigates empirical domains which have been well documented and which have played a prominent role in theoretical syntax at some stage in the development of generative grammar Serves as a research tool for not only theoretical linguistics but also the various forms of applied linguistics Contains an accessible alphabetical structure with an index integral to each volume featuring keywords and key figures Each multi volume set is also accompanied by a CD Rom of the entire Companion Like the prestigious Blackwell Handbooks in Linguistics series this multi volume work in the new The Wiley Blackwell Companions to Linguistics series can be relied upon to deliver the quality and expertise with which Blackwell Publishing's linguistics list is associated Encyclopedia of Distances Michel Marie Deza, Elena Deza, 2009-05-28 Distance metrics and distances have become an essential tool in many areas of pure and applied Mathematics and this encyclopedia is the first one to treat the subject in full The book appears just as research intensifies into metric spaces and especially distance design for applications These distances are particularly crucial for example in computational biology image analysis speech recognition and information retrieval Here an assessment of the practical questions arising during selection of a good distance function has been left aside in favor of a comprehensive listing of the main available distances a useful tool for the distance design community This reader friendly reference offers both independent introductions and definitions while at the same time making cross referencing easy through hyperlink like boldfaced references to original definitions This high quality publication is a mix of reference resource and coffee table book

The Derivation of Anaphoric Relations Glyn Hicks, 2009 The Derivation of Anaphoric Relations resolves a conspicuous

problem for Minimalist theory the apparently representational nature of the binding conditions Hicks adduces a broad variety of evidence against the binding conditions applying at LF and builds upon the insights of recent proposals by Hornstein Kayne and Reuland by reducing them to the core narrow syntactic operations specifically Agree and Merge Several novel and independently motivated claims about syntactic features and phases are made not only explaining the previously stipulated roles played by c command reference and locality but furnishing the derivational binding theory with sufficient flexibility to capture some long problematic empirical phenomena These include connectivity effects picture noun reflexives in English and anaphor pronoun non complementarity Specific proposals are also made for extending the derivational approach to accommodate structured crosslinguistic variation in binding with thorough expositions and analyses of the Dutch Norwegian and Icelandic pronominal systems

The Syntax-Discourse Interface Petra B. Schumacher, 2005-09-22 This book combines theoretical and experimental aspects of the establishment of dependency It provides an account of dependency relations by focusing on the representation and interpretation of referentially dependent elements particularly regular reflexives logophors and pronouns First the establishment of dependency is discussed within a model of syntax discourse correspondences that predicts an economy based dependency hierarchy contingent on the level of representation at which the dependency is formed as well as the internal structure of the dependent element and its antecedent Secondly the model's predictions are substantiated by a series of experimental studies conducted in English and Dutch providing evidence from three sources of online sentence comprehension reaction time studies Broca's aphasia patient studies and event related brain potential studies The findings show that dependencies are established at distinct levels of linguistic encoding i.e. syntax or discourse determined by the presence or absence of coargumenthood and the representation of the dependency forming elements

Key Issues in Chinese as a Second Language Research Istvan Kecskes, Chaofen Sun, 2017-06-26 Key Issues in Chinese as a Second Language Research presents and discusses research projects that serve as theoretical grounding for improving the teaching and learning of Chinese as a second language CSL in order to help researchers and practitioners better understand the acquisition development and use of CSL With the exception of the first chapter which is state of the art each chapter makes an attempt to bring together theory and practice by focusing on theory building and theory application in practice The book is organized around areas where most future research is needed in CSL phonology semantics grammar and pragmatics Consisting of contributions from an international group of scholars working on cutting edge research this is the ideal text for researchers graduate students and practitioners in the area of Chinese as a second or foreign language

The Wiley Blackwell Companion to Syntax, 8 Volume Set Martin Everaert, Henk Van Riemsdijk, 2017-12-26 An invaluable reference tool for students and researchers in theoretical linguistics The Wiley Blackwell

Companion to Syntax Second Edition has been updated to incorporate the last 10 years of syntactic research and expanded to include a wider array of important case studies in the syntax of a broad array of languages A revised and expanded edition of this invaluable reference tool for students and researchers in linguistics now incorporating the last 10 years of syntactic research Contains over 120 chapters that explain analyze and contextualize important empirical studies within syntax over the last 50 years Charts the development and historiography of syntactic theory with coverage of the most important subdomains of syntax Brings together cutting edge contributions from a global group of linguists under the editorship of two esteemed syntacticians Provides an essential and unparalleled collection of research within the field of syntax available both online and across 8 print volumes This work is also available as an online resource at www.companiontosyntax.com

Syntactic Theory and First Language Acquisition (Vol.1)Barbara Lust,Margarita Suer,John Whitman,(Vol.2)Barbara Lust,Gabriella Hermon,2018-10-24 Universal Grammar UG is a theory of both the fundamental principles for all possible languages and the language faculty in the initial state of the human organism These two volumes approach the study of UG by joint tightly linked studies of both linguistic theory and human competence for language acquisition In particular the volumes collect comparable studies across a number of different languages carefully analyzed by a wide range of international scholars The issues surrounding cross linguistic variation in Heads Projections and Learnability Volume 1 and in Binding Dependencies and Learnability Volume 2 are arguably the most fundamental in UG How can principles of grammar be learned by general learning theory What is biologically programmed in the human species in order to guarantee their learnability What is the true linguistic representation for these areas of language knowledge What universals exist across languages The two volumes summarize the most critical current proposals in each area and offer both theoretical and empirical evidence bearing on them Research on first language acquisition and formal learnability theory is placed at the center of debates relative to linguistic theory in each area The convergence of research across several different disciplines linguistics developmental psychology and computer science represented in these volumes provides a paradigm example of cognitive science

Chinese Reflexives William Xian-fu Yu,2000 This book presents the Chinese reflexivisation system investigating the different types of Chinese reflexive constructions and offering an analysis of these in an attempt to integrate syntactic morphological and discourse related aspects of the phenomena In Chinese two distinct types of reflexive have been widely discussed in the literature simplex reflexive *ziji* self which is a long distance reflexive and complex reflexive pronoun *ziji* such as *taziji* himself which must be locally bound In addition Chinese has a kind of double reflexive construction such as *ziji* *benshen* and reflexive clitics *zi* self and *ziwo* self This book argues that reflexive clitics must be locally bound and that under certain conditions both simplex reflexive *ziji* and complex reflexives can be locally bound long distance bound or even free in an entire sentence This study proposes that every type of reflexive has two structures one is an anaphoric structure while the other is a logophoric structure When a verb assigns an anaphoric theta role the reflexive can have the anaphoric

structure and the head of the reflexive NP is allowed to adjoin the head of the VP at LF If a reflexive cannot receive an anaphoric theta role it can have a logophoric structure In the logophoric structure the head of the reflexive DP must be a pro in order to receive the disjoint theta role from the verb

Advances in formal Slavic linguistics 2017 Franc Marušič, Petra Mišmaš, Rok Žaucer, 2019 Advances in Formal Slavic Linguistics 2017 is a collection of fifteen articles that were prepared on the basis of talks given at the conference Formal Description of Slavic Languages 12 5 which was held on December 7 9 2017 at the University of Nova Gorica The volume covers a wide array of topics such as control verbs instrumental arguments and perduratives in Russian comparatives negation n words negative polarity items and complementizer ellipsis in Czech impersonal se constructions and complementizer doubling in Slovenian prosody and the morphology of multi purpose suffixes in Serbo Croatian and indefinite numerals and the binding properties of dative arguments in Polish Importantly by exploring these phenomena in individual Slavic languages the collection of articles in this volume makes a significant contribution to both Slavic linguistics and to linguistics in general

Morphology and Its Interfaces in Second Language Knowledge Maria-Luise Beck, 1998-01-01 The interface between syntax and morphology forms one of the more challenging aspects of linguistic theory and language acquisition The papers collected here respond to that challenge from the perspective of adult second language L2 acquisition

[The Oxford Handbook of Languages of the Caucasus](#) Maria Polinsky, 2020 This book is an introduction to and overview of the languages of the Caucasus including those of southern Russia Georgia Azerbaijan and Armenia This region of the world exhibits extremely high linguistic diversity and many of the languages spoken in the Caucasus have cross linguistically rare features that are found in few or no other languages This handbook serves as a comprehensive overview with detailed descriptions of languages as well as theoretically oriented chapters

The Oxford Dictionary of Pragmatics Yan Huang, 2012-09-13 A comprehensive guide to the terms concepts and theories of pragmatics the study of language in use from the traditional to the most recent showing how they originated and how they are used A vital resource for students and researchers in linguistics philosophy psychology anthropology and computational linguistics

Syntactic Development William O'Grady, 2007-12-01 Syntactic Development presents a broad critical survey of the research literature on child language development Giving balanced coverage to both theoretical and empirical issues William O Grady constructs an up to date picture of how children acquire the syntax of English Part 1 offers an overview of the developmental data pertaining to a range of syntactic phenomena including word order subject drop embedded clauses wh questions inversion relative clauses passives and anaphora Part 2 considers the various theories that have been advanced to explain the facts of development as well as the learnability problem reporting on work in the mainstream formalist framework but also considering the results of alternative approaches Covering a wide range of perspectives in the modern study of syntactic development this book is an invaluable reference for specialists in the field of language acquisition and provides an excellent introduction to the acquisition of syntax for students and researchers

in psychology linguistics and cognitive science Studies in Comparative Germanic Syntax H. Haider, S. Olsen, S. Vikner, 2013-03-09

COMPARATIVE GERMANIC SYNTAX This volume contains 13 papers that were prepared for the Seventh Workshop on Comparative Germanic Syntax at the University of Stuttgart in November 1991 In defining the theme both of the workshop and of this volume we have taken comparative in comparative Germanic syntax to mean that at least two languages should be analyzed and Germanic to mean that at least one of these languages should be Germanic There was no requirement as such that the research presented should be situated within the framework known as Principles and Parameters Theory previously known as Government and Binding Theory though it probably is no accident that this nevertheless turned out to be the case Within this theory it is seen as highly desirable to be able to account for several differences on the surface by deriving them from fewer underlying differences The reason is that in order to explain the ease with which children acquire language it is assumed that not all knowledge of any given language is the result of learning but that instead children already possess part of this knowledge at birth the innate part of linguistic knowledge will obviously be the same for all human beings and thus this theory also provides an explanation of language universals The fewer real i e

Constraints on Reflexivization in Mandarin Chinese Haihua Pan, 2013-11-26 First Published in 1997 Mandarin *ziji* has challenged many syntacticians to probe for its properties and specifically its relationship to Binding Condition A BCA which dictates that an anaphor must be bound by a syntactically prominent or c commanding noun phrase in a very local domain Governing Category or GC This book argues for the separation of contrastive and non contrastive reflexives This book will also show that *ben ren shen* and their compound forms being inherently contrastive differ from *ziji* and its compound forms in the contexts accessible to them the latter can access linguistic contexts only but the former can also access utterance situations and world knowledge

Prominence and Locality in Grammar Jianhua Hu, 2019-06-06 This book challenges the current consensus on the analysis of *wh* questions and reflexives from the perspective of the syntax semantics interface An integrated approach incorporating analyses of the interaction between different levels of linguistic knowledge is proposed It argues that the derivation and interpretation of *wh* questions and reflexives are not purely syntactic in nature but are regulated by principles operating at the syntax semantics interface Two general principles underlying our knowledge of language and cognition are proposed in this work One is the Principle of Locality and the other is the Principle of Prominence It shows that although *wh* quantification and reflexivization belong to two different domains of study in generative grammar their derivation and interpretation are basically constrained by the complex interaction between prominence and locality in grammar The first part of the book discusses how *wh* questions are formed and interpreted in Chinese and English and shows that the formation and interpretation of *wh* questions are constrained by the interaction between prominence and locality It is shown that in *wh* interpretation prominence is used to define the set generators so as to license other *wh* words in the pair list reading in multiple *wh* questions It also discusses *wh* island effects in English and Chinese and unlike previous

claims made in the literature of Huang 1982a 1982b it argues that the so called wh island effects in English are also observed in Chinese The second part of the book investigates the role that prominence and locality play in reflexive binding It is shown that in reflexive binding the binding domain of the reflexive is defined by prominence It proposes a unified account for both the noncontrastive compound reflexive and the bare reflexive in Chinese and shows that they are constrained by the same reflexive binding condition proposed in this work though they employ different definitions of the most prominent NPs to determine their binding domains Prominence and Locality in Grammar The Syntax and Semantics of Wh Questions and Reflexives is an important theoretical contribution to the syntax semantics interface studies and can serve as a valuable text for graduate students and scholars in the field of Chinese linguistics and cognitive science

Long-distance Anaphora and Multiple Feature Checking Li-Ling Chuang, 1997 This dissertation investigates the interpretation and the distribution of long distance anaphora Within the Minimalist framework Chomsky 1993 1995 I show that long distance anaphora in Chinese type languages can be best accounted for if one assumes multiple Specs Xu 1993 Ura 1994 This is implemented by taking anaphora as being licensed by A movement triggered by multiple thematic feature checking Boskovic Takahashi 1995 Lasnik 1995 Hornstein 1996 Assuming the parametric option of multiple Specs this analysis explains the long standing puzzle of why subject nominative anaphors are possible in Chinese type languages as opposed to English type languages

Adopting the Track of Phrase: An Psychological Symphony within **Long Distance Anaphora**

In some sort of taken by monitors and the ceaseless chatter of fast communication, the melodic beauty and emotional symphony created by the written word frequently disappear into the background, eclipsed by the constant sound and interruptions that permeate our lives. However, located within the pages of **Long Distance Anaphora** a wonderful fictional treasure brimming with organic emotions, lies an immersive symphony waiting to be embraced. Constructed by an outstanding musician of language, this interesting masterpiece conducts visitors on an emotional journey, skillfully unraveling the hidden songs and profound impact resonating within each cautiously crafted phrase. Within the depths of this touching analysis, we shall examine the book is key harmonies, analyze its enthralling writing design, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
