Elementary Science Methods A Constructivist Approach:

Elementary Science Methods David Jerner Martin, 2003 This text's unique approach guides students in learning by doing. Geared to teachers of preschool through sixth grade students it represents the cutting edge of elementary science teaching with investigations into contemporary topics. Access to InfoTrac College Edition will enhance student understanding.

Elementary Science Methods: A Constructivist Approach David Jerner Martin, 2008-01-31 As the groundbreaking text that pioneered a constructivist approach to elementary science teaching, ELEMENTARY SCIENCE METHODS A

CONSTRUCTIVIST APPROACH Fifth Edition is based on two fundamental and complementary ideas: it is more important for children to learn how to do science than to learn about science, and elementary science teachers do not need to know a great deal of science but rather should be co-inquirers with their students. This text features a wealth of exercises including open-ended inquiry activities that help teacher candidates construct their own personal conceptualizations about science content and teaching methods. More than 170 process-oriented open-ended activities organized by grade level are suggested to encourage children to develop and perform their own investigations. The Book Companion DVD available separately provides valuable tools and resources such as additional activities and video clips that students can use both in their college course and later in elementary science classrooms. All activities and much of the text content are clearly linked to National Science Education Standards (NSES) for content, professional development, assessment, and teaching, and they contain suggestions of appropriate children's literature to encourage interdisciplinary learning.
