Resources in Education ,1998 Values-Based Innovation Management Henning Breuer, Florian Lüdeke-Freund, 2017-09-16 Co authored by two leading experts in the field this unique and forward thinking new core textbook shows how innovation in processes products services business models and networks may be managed by what we care about The book combines theoretical insights with a strong practical element featuring a wealth of case studies and tools to help innovators solve societal problems and realise their ideals Readers are encouraged to explore not only sustainability orientation and values of privacy or safety but also their own unique values as relevant drivers for change within and across organisations Accompanied by a strong pedagogical framework the book begins by reviewing the field of innovation management before going on to discuss innovation in processes products and services and finally providing the student with the methods and tools for implementing change This textbook is the ideal companion for advanced undergraduate or postgraduate students studying innovation management or entrepreneurship The book also provides an invaluable resource for entrepreneurs innovation managers and consultants

Waiting for Dead Men's Shoes Donald Chisholm, 2001 This monumental study provides an innovative and powerful means for understanding institutions by applying problem solving theory to the creation and elaboration of formal organizational rules and procedures Based on a meticulously researched historical analysis of the U S Navy s officer personnel system from its beginnings to 1941 the book is informed by developments in cognitive psychology cognitive science operations research and management science It also offers important insights into the development of the American administrative state highlighting broader societal conflicts over equity efficiency and economy Considering the Navy s personnel system as an institution the book shows that changes in that system resulted from a long term process of institutional design in which formal rules and procedures are established and elaborated Institutional design is here understood as a problem solving process comprising day to day efforts of many decision makers to resolve the difficulties that block completion of their tasks The officer personnel system is treated as a problem of organized complexity with many components interacting in systematic intricate ways its structure usually imperfectly understood by the participants Consequently much problem solving entails decomposing the larger problem into smaller more manageable components closing open constraints and balancing competing value premises The author finds that decision makers are unlikely to generate many alternatives since searching for existing solutions elsewhere or inventing new ones is an expensive difficult enterprise Choice is usually a matter of accepting rejecting or modifying a single solution Because time constraints force decisions before problems are

well structured errors are frequently made problem components are at best only partially addressed and the chosen solution may not solve the problem at all and even if it does is likely to generate unanticipated side effects that worsen other problem components In its definitive treatment of a critical but hitherto entirely unresearched dimension of the administration of the U S Navy the book provides full details over time concerning the elaboration of officer grades and titles creation of promotion by selection sea duty requirements graded retirement staff line conflicts the establishment of the Reserve and such unusual subjects as tombstone promotions In the process it transcends the specifics of the personnel system to give a broad picture of the Navy s history over the first century and a half of its development *International Management Behavior* Henry W.
