Hunter, 2016-09-08 *Cult Film as a Guide to Life* investigates the world and experience of cult films from well loved classics to the worst movies ever made Including comprehensive studies of cult phenomena such as trash films exploitation versions cult adaptations and case studies of movies as different as *Showgirls* *Room 237* and *The Lord of the G Strings* this lively provocative and original book shows why cult films may just be the perfect guide to making sense of the contemporary world Using his expertise in two fields I.Q. Hunter also explores the important overlap between cult film and adaptation studies He argues that adaptation studies could learn a great deal from cult and fan studies about the importance of audiences emotional investment not only in texts but also in the relationships between them and how such bonds of caring are structured over time The book's emergent theme is cult film as lived experience With reference mostly to American cinema Hunter explores how cultists with their powerful emotional investment in films care for them over time and across numerous intertexts in relationships of memory nostalgia and anticipation Nine Dimensions of Madness Robert L. Gallon, 2015-11-03 In a book that reframes the mental health debate Robert L. Gallon challenges the widely held notion that mental disorders are medical diseases Drawing on his extensive experience as a psychologist who has worked with thousands of patients he argues that there are no objective indicators of mental disorders and therefore no way of drawing a distinct line between people who have them and people who don't He outlines an alternative to the disease model defined by nine dimensions of dysfunction that encompass the range of human dysfunctions typically classified as mental disorders He explains the origin of these problems not as chemical imbalances and genetic abnormalities but as the complex interaction of biological psychological and social factors called the Biopsychosocial model Gallon explains the history of psychiatry and how it came to develop a medical model that codifies mental disorders in the psychiatric bible the Diagnostic and Statistical Manual of Mental Disorders DSM now in its fifth

edition He demonstrates how in 1950s and 1960s when the miracle psychiatric drugs came on the market it was to the great economic advantage of both pharmaceutical companies and psychiatrists to describe people's problems in the language of medicine His alternative to this disease model suggests descriptive types Reality Misperception Mood Dysfunction Anxiety Cognitive Competence Social Competence Somatoform Dysfunction Substance Dependence Motivation and Impulse Control and Socialization Dysfunction that we can construct to discuss the kinds and severities of problems people experience These are not discrete abnormalities but are sorts of dysfunction that can be placed on dimensions of dysfunction
