Pedlow, 1998 **US Defence Bases in the United Kingdom** Simon Duke, 1986-12-01 **Black Cats of Osan** Rick Bishop, 2023-09-30 The story of the top secret Black Cats who undertook dangerous long duration high altitude missions to

provide intelligence on North Korea during the Cold War. Plying through the darkness at the very limit of the earth's atmosphere, the U-2's extrasensory intelligence gathering sensors quietly intercept and redistribute mountains of information to a highly classified ground site located at Osan Air Base, Korea. From there, the top secret intelligence surveillance and reconnaissance ISR products are distributed to the highest levels of command authority within the United States. Although the Dragon Lady has been in continuous service for nearly 70 years, she has always been considered a National Asset with technology so sophisticated that she outlasted her replacement, the SR-71, decades ago. Lt Col Ret Rick Bishop, a former U-2 pilot, takes the reader deep into the Black World of non-satellite ISR to reveal how a small detachment of 100 hand-selected personnel with only eight pilots and two aircraft became the most reliable and productive air force unit to ever utilize the Dragon Lady during the Cold War, and to this day. As second in command of Detachment 2, Det 2 of the 9th Strategic Reconnaissance Wing during the mid-1980s, Rick kept a detailed journal of the daily operations that routinely launched pilots on high altitude solo missions lasting at least nine hours. Wearing full pressure suits similar to those utilized by the Shuttle astronauts, these missions took a physiological toll on each pilot who upon return had to coax the Lady, universally known for her treacherous landing characteristics, safely back on the ground along with the often priceless intelligence gathering sensors. Although the pilots were the pointy end of the spear, this is also the story of the missions that could not be accomplished without the dedicated effort from enlisted personnel and civilian company tech reps to keep the maintenance intensive platform in the air. Along with Physiological Support Division personnel responsible for keeping the pilot alive in their pressure suit environment during emergency situations, as well as numerous other support troops required for logistical and supply support, the unparalleled success of Det 2 can only be attributed to the professional pride of the close-knit, selectively manned brotherhood known as the Black Cats of Osan.

Prologue, 1996 *50 Years of the U-2* Chris Pocock, 2005

When the U-2 first took off in 1955, no one involved in its top secret project dreamed that this unique reconnaissance aircraft would still be flying today. The long story of the Dragon Lady is amazing and complex; this book tells it all in unprecedented detail, from the early days overflying the Soviet Union under CIA sponsorship to the Cuban Missile Crisis and on to the Vietnam War. The epic missions over Communist China were flown by nationalist pilots from Taiwan. How the U-2 was improved, enlarged, and put back into production twice. It led the real-time reconnaissance revolution with data links and high-tech sensors. Then it played a key role in Desert Storm over Bosnia and Kosovo, and most recently over Afghanistan and Iraq. According to the CIA's own historian, Chris Pocock is the foremost authority on the U-2. To write this book, he flew in the aircraft, conducted 250 interviews, and analysed more than 1,000 declassified documents.
