Living and Working Dogma, 2022-05-24 An argument against the ideology of domesticity that separates work from home lavishly illustrated with architectural proposals for alternate approaches to working and living Despite the increasing numbers of people who now work from home in the popular imagination the home is still understood as the sanctuary of privacy and intimacy Living is conceptually and definitively separated from work This book argues against such a separation countering the prevailing ideology of domesticity with a series of architectural projects that illustrate alternative approaches Less a monograph than a treatise richly illustrated the book combines historical research and design proposals to reenvision home as a cooperative structure in which it is possible to live and work and in which labor is socialized beyond the family freeing inhabitants from the sense of property and the burden of domestic labor The projects aim to move the house beyond the dichotomous logic of male female husband wife breadwinner housewife and private public They include the reinvention of single room occupancy as a new model for affordable housing the reimagining of the simple tower and plinth prototype as host to a multiplicity of work activities and enlivening street life and a plan for a modular adaptable structure meant to house a temporary dweller All of these design projects conceive of the house not as a commodity the form of which is determined by its exchange value but as an infrastructure defined by its use value

The Lofts of SoHo Aaron Shkuda, 2024-06-19 A groundbreaking look at the transformation of SoHo American cities entered a new phase when beginning in the 1950s artists and developers looked upon a decaying industrial zone in Lower Manhattan and saw not blight but opportunity cheap rents lax regulation and wide open spaces Thus SoHo was born From 1960 to 1980 residents transformed the industrial neighborhood into an artist district creating the conditions under which it evolved into an upper income gentrified area Introducing the idea still potent in city planning today that art could be harnessed to drive municipal prosperity SoHo was the forerunner of gentrified districts in cities nationwide spawning the notion of the creative class In *The Lofts of SoHo* Aaron Shkuda studies the transition of the district from industrial space to artists enclave to affluent residential area focusing on the legacy of urban renewal in and around SoHo and the growth of artist led redevelopment Shkuda explores conflicts between residents and property owners and analyzes the city's embrace of the once illegal loft conversion as an urban development strategy As Shkuda explains artists eventually lost control of SoHo's development but over several decades they nonetheless forced scholars policymakers and the general public to take them seriously as critical actors in the twentieth century American city
