should prove most helpful as a how to guide for a man working alone to build a strong yet simple log cabin made to last It can be a log cabin that a man can be proud to call his home or for a getaway home away from home on the weekend I built the 13 by 41 foot cabin shell including cutting down the trees and peeling off the bark in three months while camping out in a tent Cutting down the trees and piling off the bark took more than half of the time in completing the shell of the cabin It was hard work but by using the trees on my property I saved money and it gave me a more satisfying feeling of accomplishment as I lived my dream After about three months work the cabin was up and we moved from our tents into the cabin however the electrical wiring well and plumbing septic system interior walls chimney and 8 by 28 foot add on which are covered in varying details less on the wiring and plumbing in this book were worked on as I got the time and money Overall to complete the cabin it took about four to five months time The 757 square foot cabin was completed in about four months by working long hours six days a week The long camping experience was an ordeal for my wife but my son and I enjoyed it We thank God for His help and guidance through it all The plans contained in this book are designed to allow a man working alone to build a cabin in a short time that will last a life time I include an additional chapter about building a pergola type patio cover out of red cedar 48 pictures are included in this book Happy trails
