## **Logical Learning Theory A Human Teleology And Its Empirical Support:**

Logical Learning Theory Joseph F. Rychlak, 1994-01-01 In 1989 B F Skinner told Joseph Rychlak that the greatest disappointment resulting from the cognitive revolution was the turning of the human organism into a machine Intrigued by this statement Rychlak decided that after many years of formulation it was time to present his fundamentally teleological view of the human being which he calls the logical learning theory LLT In this new theoretical perspective the author re presents such concepts as intention purpose and free will Significant aspects of the mind body issue are explored here Rychlak addresses teleological issues and provides a language for proper conceptualization He uses experimental findings to support the notion of behavior as self directed rather than mechanistic In the process Rychlak places LLT on the side of teleological explanation in which concepts like free will self choice purpose and intention are no longer dismissed Rychlak compares LLT and existing formulations of behavior including classical and operant conditioning social learning theory social constructionism cognitive science gestalt theories and personality theories Extensive research data and thorough discussions support Rychlak s theory A glossary is also included

**History of Psychology in Autobiography** Leendert P. Mos, 2009-06-12 Since the 17th century autobiography has an honorable place in the study of history In 1930 the preeminent historian of psychology Edwin Boring writes that a science separated from its history lacks direction and promises a future of uncertain importance To understand what psychology is and what it is becoming the autobiographies of famous psychologists is history at it best Here we find model inquirers of the science who offer a personalized account of themselves and their vocation in the context of the history of the science What is characteristic of many of those who have contributed to an alternate vision of psychological science is that they never considered themselves or were considered by others as belonging to the mainstream of the discipline In considering an alternative history of psychology in autobiography the editor invited contributors whose research and writings have pushed the discipline in other directions pushed its limits and whose scholarship finds its philosophical framework outside the discipline altogether If these contributors may not be model inquirers their scholarship is very much a matter of consequence for those who wish to understand psychology Among the outliers included here are those who devoted themselves to the writing of psychology examining its history theories research and professional practices and who enthusiastically embraced over the course of their lives the discipline as a human science Their influence has been subtle as has been their appeal to many students who affection for the discipline finds its promise in a discerning self awareness and a critical understanding of others and their worlds This volume is not simply a collection of personal chronologies which might inspire or lend appreciation to a younger generation Our contributors write from their personal and professional experience of course but they write of their thinking and understanding of the psyche as an aspect of human life of psychology as an academic form of human sciences inquiry and so bring to bear their scientific and philosophical imagination to their personal challenges in their chosen vocation as psychologists Our contributors cover a

broad swath of the second half of the 20th century the century of psychology Nurturing the discipline from within various philosophical social political and cultural roots their autobiographies exemplify marginality if not alienation from the mainstream even as their professional and personal lives give expression to engaged scholarship commitment to vocation and straightforwardly and reflectively a love of the heart From Germany Carl Graumann from France Erika Apfelbaum from Canada David Bakan and Kurt Danziger and from the United States Amedeo Giorgi Robert Rieber and Joseph Rychlak relate their lives to the larger contexts of our times Their personal stories are an integral part of the historiography of our discipline Indeed a contribution to historiography of our discipline is constituted in their autobiographical self presentations for their writings attest as much to their lives as model inquirers as they do to the possibility of psychology as a human science

Meaningful Purpose Luis A. Marrero, Daniel E. Persuitte, 2022-05-12 What is my meaning what is my purpose How are they different Why do these matter What can I do to make my life more meaningful Is purpose something we discover or something we create How does meaning play a role in being successful in life Logoteleology also known as Meaningful Purpose Psychology or more simply MP provides the foundation and understanding that are needed to answer these and other life defining questions that we all come across in some way each day in our personal and professional lives Explored throughout this book are the basics of meaning purpose motivation and much more that are the groundwork of MP Marrero and Persuitte lay this out in a way that is useful both to individuals who seek to find and connect to meaning and purpose in life as well as for those who coach and guide others A handy introductory guide to Meaningful Purpose Psychology this text builds on the science first introduced in the award winning book *The Path to a Meaningful Purpose* authored by Luis A Marrero incorporating further insights and concepts from this evolving psychological theory and practice Starting from the central thesis of MP Mankind does not suffer from a lack of answers Rather it suffers despite the answers being available this text includes a fresh perspective and greater clarity to the blocks to meaning we experience as part of this paradox The methodology included in this text shows how we can increase self awareness to these obstructions of reality and truth By using the information and methods explored throughout this text we are on a meaningful journey toward being the best versions of ourselves as communicators leaders partners parents employees coaches teammates friends and members of the communities groups and organizations to which we belong Welcome to the path

**About Psychology** Darryl B. Hill, Michael J. Kral, 2012-02-01 Demonstrating how psychologists use theory philosophy and history to illuminate the subjects they study this book explores both the obstacles and benefits of integrating these perspectives into contemporary Western psychology It offers a timely

survey of current ideas at the crossroads of these disciplines and represents new ideas about how psychology can respond to changes on what it means to be human and on how to further this knowledge The convergence of history theory and philosophy is examined from three perspectives the reconsideration of the importance of context in psychology the argument that psychology is embedded in morality values and politics and the consideration of the practice of such convergence looking at how history theory and philosophy function in psychology This book presents contemporary thinking by noted scholars who have made significant contributions to a re visioning of psychology     *Theory Construction and Model-Building Skills* James Jaccard, Jacob Jacoby, 2020-02-06 This book provides young scientists with tools to assist them in the practical aspects of theory construction We take an informal journey through the cognitive heuristics tricks of the trade and ways of thinking that we have found to be useful in developing theories essentially conceptualizations that can advance knowledge in the social sciences This book is intended to provide the instructor with a useful source for helping students come up with ideas for research and for fine tuning the resultant theories that emerge from such thinking An objective of this book is to move toward a needed balance in the emphases given to theory construction and theory testing     Handbook of Narrative Inquiry D. Jean Clandinin, 2006-12-28 Composed by international researchers the Handbook of Narrative Inquiry Mapping a Methodology is the first comprehensive and interdisciplinary overview of the developing methodology of narrative inquiry The Handbook outlines the historical development and philosophical underpinnings of narrative inquiry as well as describes different forms of narrative inquiry This one of a kind volume offers an emerging map of the field and encourages further dialogue discussion and experimentation as the field continues to develop Key Features Offers coverage of various disciplines and viewpoints from around the world Leading international contributors draw upon narrative inquiry as conceptualized in Anthropology Sociology Psychology and Philosophy Illustrates the range of forms of narrative inquiry Both conceptual and practical in depth descriptions of narrative inquiry are presented Portrays how narrative inquiry is used in research in different professional fields Particular attention is paid to representational issues ethical issues and some of the complexities of narrative inquiry with indigenous and cross cultural participants as well as child participants Intended Audience The Handbook of Narrative Inquiry is a must have resource for narrative methodologists and students of narrative inquiry across the social sciences Individuals in the fields of Nursing Psychology Anthropology Education Social Work Sociology Organizational Studies and Health research will be particularly well served by this masterful work     **Narrative Identities** George Yancy, 2005 The contributors address challenging questions about identity in relation to personality development language and socialisation They demonstrate how their cultural and historical contexts influenced their theoretical approaches to the nature of self and how these ideas in turn shaped how they perceive their personal histories

**Uncovering Critical Personalism** James T. Lamiell, 2021-03-10 This book brings together the central tenets of William Stern s critical personalism Presented for the first time for an English speaking audience this selection of original

translations and essays encapsulates the critical framework of Stern's personalistic psychology. The selected works highlight the philosophical basis of Stern's personalistic views, illustrate their relevance in domains of theoretical and practical importance in psychology, and reveal Stern's critical stance on certain methodological trends that were gaining favor within psychology during his lifetime. Lamiell's own chapters contextualise the translations by providing an overview of the most basic tenets of critical personalism and offering a commentary on paradigmatic commitments within scientific psychology's mainstream that began to impede Stern's efforts prior to his death and that remain obstacles to personalistic thinking in the discipline today. Largely ignored by his contemporaries, this work forms part of an emerging body of scholarship that seeks to reintroduce Stern's thinking into contemporary psychology. The book is intended for academically oriented scholars with interests in historical, theoretical, and philosophical issues in psychology. Dialogicality in Development Ingrid E.

Josephs, 2003-09-30 The crucial nature of developmental theory is the question of relationship between cultural and personal facets of human development. Dialogue is a useful concept to specify this relationship from a process-oriented perspective. In its broadest sense, the notion of dialogue entails the interaction between at least two entities: persons, meanings, perspectives, out of which novelty can but need not emerge. Thus dialogic models are open for developmental questions. These issues are examined in this, the first volume in which the increasingly popular metaphor of dialogue is systematically applied to developmental issues. Dialogue is a multilevel concept and can be understood 1) as a real exchange between two interacting persons, 2) as the interaction between culture at large (e.g., stories and narratives) and the interacting developing person, and 3) as a metaphor for developmental processes in general. In the first part of this international volume, the concept of dialogue is elaborated by researchers from different disciplines. The focus of the second section is on dialogic models in the area of self-development. The third deals with the dialogical co-development of person and culture.
