Interrogative Phrases And The Syntax Semantics Interface:

Interrogative Phrases and the Syntax-Semantics Interface I. Comorovski, 2013-04-17 Interrogative Phrases and the Syntax Semantics Interface starts by analyzing the interpretation of interrogative phrases in single and multiple constituent questions including their interpretation under adverbs of quantification The results are then put to work in a novel approach to some of the constraints on dependencies between fronted interrogative phrases and the associated gaps superiority weak crossover as well as the so called weak islands the WH island the negative island and the Factive Island It is argued that the possibility of fronting an interrogative phrase out of these configurations is determined by a semantic pragmatic condition on questions which requires them to be answerable The analysis is worked out principally on Romanian a language which allows multiple wh fronting The results are then extended to English Audience Researchers and students in syntax semantics and their interface as well as linguists studying the relation between the acceptability of sentences and the larger discourse context

Syntax, Semantics and Acquisition of Multiple Interrogatives Lydia Grebenyova, 2012-10-17 Multiple interrogatives questions with multiple wh phrases e g Who bought what have long presented analytical challenges for linguistic theory This monograph presents a new theoretical and experimental study of this construction The theoretical findings concern the interaction between superiority effects subject auxiliary inversion and the distribution of pair list and single pair readings cross linguistically The author examines multiple interrogatives under sluicing i e clausal ellipsis presenting new arguments for the deletion analysis of sluicing The author also reports the results of several experimental studies on how children acquire the language specific properties of multiple interrogatives in English Russian and Malayalam The results suggest a correlation between the acquisition of multiple interrogatives and the acquisition of contrastive focus which has been independently motivated in the syntactic literature The monograph will be of interest to linguists concerned with syntax semantics and language acquisition as well as readers who are interested in a comprehensive theory of language in general

Existence: Semantics and Syntax Ileana Comorovski, Klaus von

Heusinger, 2008-08-20 This collection of essays grew out of the workshop Existence Semantics and Syntax which was held at the University of Nancy 2 in September 2002 The workshop organized by Ileana Comorovski and Claire Gardent was supported by a grant from the Réseau de Sciences Cognitives du Grand Est Cognitive Science Network of the Greater East which is gratefully acknowledged The rst e tor wishes to thank Claire Gardent Fred Landman and Georges Rebuschi for encouraging her to pursue the publication of a volume based on papers presented at the workshop Among those who participated in the workshop was Klaus von Heusinger who joined Ileana Comorovski in editing this volume Besides papers that developed out of presentations at the workshop the volume contains invited contributions We are grateful to Wayles Browne Fred Landman Paul Portner and Georges Rebuschi for their help with reviewing some of the papers Our thanks go also to a Springer reviewer for the careful reading of the book manuscript We wish to thank all the participants in the workshop not only those whose contributions appear in this volume for making the workshop an int active and constructive event Ileana Comorovski Klaus von Heusinger vii ILEANA COMOROVSKI AND KLAUS VON HEUSINGER INTRODUCTION The notion of existence which we take to have solid intuitive grounding plays a central role in the interpretation of at least three types of linguistic constructions copular clauses existential sentences and in de nite noun phrases The

Syntax□Prosody Interface Giuliano Bocci, 2013-08-13 This book presents an experimental and theoretical investigation of the interplay between information structure word order alternations and prosody in Italian Left right dislocations focus fronting and other reordering phenomena are analyzed taking into account their morphosyntactic and prosodic properties It is argued that a restricted set of discourse related properties are inserted in the numeration as formal features These discourse related features drive the syntactic derivation and the formation of the prosodic representation in compliance with the T model of grammar Based on the cartographic approach this study proposes a model of the syntax prosody interface in which the phonological computation of prosody is fed by syntactically encoded properties of information structure However this computation is also governed by structural requirements intrinsic to the phonological domain and thus a bijective relation between information structure and prosodic representation is not guaranteed The monograph will be of interest to any linguist concerned with syntax information structure and prosody **The Wiley Blackwell Companion to Syntax, 8**

The Grammar of Q Seth Cable, 2010 The Grammar of Q puts forth a novel syntactic and semantic analysis of wh questions based on an in depth study of the Tlingit language an endangered and under documented Native American tongue A major conclusion is that the phenomenon classically dubbed pied piping does not actually exist

Question-orientedness and the Semantics of Clausal Complementation Wataru Uegaki, 2023-01-08 This volume explores the compositional semantics of clausal complementation and proposes a theory in which clause embedding predicates are uniformly question oriented i e they take a set of propositions as their semantic argument This theory opens up new horizons for the study of embedded questions and clausal complementation and presents a successful case study on how lexical semantics interacts with syntax and compositional semantics It offers new perspectives on issues in epistemology and the philosophy of language such as the relationship between know wh and know that and the nature of attitudinal objects in general Cross linguistically attitude predicates such as know tell and surprise can embed both declarative and interrogative clauses Since these clauses are taken to represent different semantic objects like propositions and questions the embedding behavior of these predicates poses puzzles for the compositional semantics of clausal complementation In addition the fact that some verbs select for a certain complement type poses further challenges for compositional semantics This volume addresses these issues based on a uniformly question oriented analysis of attitude predicates and proposes to derive their variable behaviors from their lexical semantics The book is essential reading for linguists working on the syntax and semantics of clausal complementation as well as those interested in the role of lexical semantics in compositional semantics It will also be valuable for philosophers who are interested in applying linguistic tools to address philosophical problems

Who is What and What is Who Issa M. Abdel-Razaq, 2015-02-27 Who is What and What is Who the Morphosyntax of Arabic WH is a comprehensive book that deals with one of the most controversial phenomena in syntax Parametric Variation In particular the book offers an in depth micro parametric analysis of all the strategies used in wh question formation and the variation in these observed in modern Arabic dialects Unlike traditional analyses of this element of Arabic linguistics the approach developed here is based on the morphology syntax interface as well as the syntax phonology interface in addressing parametric variation The findings of the study detailed in this book are also placed in perspective through an examination of the possibilities that Universal Grammar offers languages in terms of building wh dependencies including topicalisation relativization and variable binding Overall the book provides a solid foundation in various aspects of the contemporary syntax of modern Arabic dialects

A Life in Linguistics Gabriela Alboiu, Daniela Isac, Alexandru Nicolae, 2022-01-01 Alexandra Cornilescu is an internationally renowned linguist whose pioneering ideas have been influential in developing generative grammar in Romania Europe and beyond The weightiness of

her contributions to the field is matched only by her talent for disseminating them Ever since 1970 when she started teaching at the University of Bucharest she has continuously played a tireless and inspirational role in the creation of several generations of linguists which the academic world has come to admiringly refer to as The Bucharest School As the initiator of the AICED conference held annually in the English Department at the University of Bucharest she has turned it into one of the leading platforms of generative linguistics in Europe She has published extensively on Romanian and English linguistics and is also the founder and past editor of the journal Bucharest Working Papers in Linguistics On the occasion of her 75th birthday her friends students and colleagues celebrate Alexandra Cornilescu s work with this collection of essays on various topics of current theoretical interest

Contemporary Approaches to Romance Linguistics Julie Auger,J. Questions Veneeta Dayal,2016 This book synthesizes and integrates 40 years of research on the semantics of questions and its interface with pragmatics and syntax conducted within the formal semantics tradition A wide range of topics are covered including weak strong exhaustiveness maximality functional answers single multiple trapped list answers embedding predicates quantificational variability concealed questions weak islands polar and alternative questions negative polarity and non canonical questions The literature on this rich set of topics theoretically diverse and scattered across multiple venues is often hard to assimilate Veneeta Dayal drawing on her own research brings them together for the first time in a coherent concise and well structured whole Each chapter begins with a non technical introduction to the issues discussed semantically sophisticated accounts are then presented incrementally with the major points summarized at the end of each section Written in an accessible style this book provides both a guide to one of the most vibrant areas of research in natural language and an account of how this area of study is developing It will be a unique resource for the novice and expert alike and seeks to appeal to a variety of readers without compromising depth and breadth of coverage

Sluicing: Cross-Linguistic Perspectives Jason Merchant,Andrew Simpson,2012-05-03 This book considers the phenomenon of sluicing Sluicing is the

term applied to sentences in which the ellipsis of a sequence of words following an embedded wh question word appears to occur and hearers must somehow recover the content of missing material as in Someone saw her but I don't know who _

Elliptical constructions of this type are now known to occur widely in the world's languages in some form or another and create interesting problems for linguistic analysis involving complex interactions between syntax semantics and morphology as well as prosody The present volume brings together new research by leading experts who analyse sluicing constructions in English Dutch Frisian Serbo-Croatian Romanian Turkish Malagasy Chinese Japanese Hindi and Bengali The book expands our current understanding of the ways in which languages allow for ellipsis of the sluicing type to occur and shows how sluicing constructions reveal important information about the general architecture of grammar In addition to the nine chapters dedicated to specific languages the volume features an introductory chapter and Haj Ross's original 1969 landmark paper on sluicing

Uttering Trees Norvin Richards, 2010 Here Richards investigates the conditions imposed upon syntax by the need to create syntactic objects that can be interpreted by phonology that is objects that can be pronounced

Headless Relative Clauses in Mesoamerican Languages Ivano Caponigro, Harold Torrence, Roberto Zavala Maldonado, Roberto Zavala, 2021 This volume constitutes the first in-depth systematic study of varieties of headless relative clauses in fifteen languages from five language families all Mesoamerican languages spoken in Mexico and Guatemala and one Chibchan language spoken in Honduras Headless relative clauses are clauses that often resemble interrogative clauses or headed relative clauses in their morpho-syntactic shape but whose meaning brings them close to nominal constructions For the vast majority of the languages in this volume many of which are endangered and all of which are understudied the work presented here represents the only published material on the subject

Multiple Wh-fronting Cedric Boeckx, Kleanthes K. Grohmann, 2003-01-01 Typological differences in the formation of multiple Wh questions are well known One option is fronting all Wh phrases to the sentence periphery The contributions to this volume all explore this option from a number of perspectives Topics covered include finer investigations of the classic multiple Wh fronting languages such as the South Slavic languages Bulgarian and Serbo-Croatian extensions to less well studied languages Basque Malagasy Persian Yiddish explorations for languages that don't obviously fall into this category German Hungarian peripheral effects optionality of fronting Superiority vs Anti-Superiority etc interface issues with semantics pragmatics and phonology and simply theoretical approaches aiming to capture the mechanisms involved in multiple Wh fronting strategies The theoretical framework adopted throughout is the Minimalist Program viewed from different angles This volume brings together some of the leading experts on the syntax of Wh questions and offers up-to-date analyses of the topic It will be indispensable for scholars investigating multiple Wh questions and will find an appropriate audience in advanced students and faculty alike

The Grammar-Pragmatics Interface Nancy Hedberg, Ron Zacharski, 2007-05-15 This collection of papers celebrates the work of Jeanette K Gundel who has contributed to the field of the grammar-pragmatics interface through her publications on the

syntactic realization of topic and comment and the cognitive status of referring expressions as well as by inspiring colleagues to make contributions to the overall field of pragmatics This volume collects together papers from colleagues and former students on pragmatics and syntax pragmatics and reference and pragmatics and social variables The volume includes papers devoted to explicating the grammar pragmatics interface with the focus of the papers ranging from Gricean and post Gricean pragmatics construction grammar and genre theory to formal semantics as well as papers devoted to expanding on Gundel s own original approach to factors such as the cognitive status decisions underlying speakers choice of referring expression and the topic and focus decisions underlying speakers choice of syntactic construction Continuations and Natural Language Chris Barker, Chung-Chieh Shan, 2014 The continuation of an expression is a portion of its surrounding context This book proposes and defends the continuation hypothesis that the meaning of a natural language expression can depend on its own continuation it can denote a function on its surrounding context **Database Systems for Advanced Applications** Hong Gao, Jinho Kim, Yasushi Sakurai, 2016-04-11 This book constitutes the workshop proceedings of the 21st International Conference on Database Systems for Advanced Applications DASFAA 2016 held in Dallas TX USA in April 2016 The volume contains 32 full papers selected from 43 submissions from 4 workshops each focusing on a specific area that contributes to the main themes of DASFAA 2016 The Third International Workshop on Semantic Computing and Personalization SeCoP 2016 the Third International Workshop on Big Data Management and Service BDMS 2016 the First International Workshop on Big Data Quality Management BDQM 2016 and the Second International Workshop on Mobile of Internet MoI 2016 *Annual Workshop on Formal Approaches to Slavic Linguistics* Richard Compton, Magdalena Goledzinowska, Ulyana Savchenko, 2007
