Endogenous Regional Development: Cottage Industries in Tasmanian Agriculture (PhD Thesis) Anna Gralton, 2007-01-01 This PhD study explores a culture industry that of the artisanal food industry in Tasmanian agriculture <https://eprints.utas.edu.au/8039/> Food production and consumption is a highly controversial socio political process whereby diverse values and beliefs levels of resources and interests struggle for survival The resultant manifestation of this struggle in the form of products production methods and actions stand testament to the diversity This thesis demonstrates the politicised nature of food production by examining the paradox of enterprise expansion while retaining a number of identities tags associated with small scale food businesses and their products i.e. cottage industry

artisanality and quality food The implications of these findings for the development of the artisanal food industry are also explored Two phases of data collection were involved in exploring these issues A first phase was a scoping study involving document analysis semi structured interviews with local knowledgeable and a range of cottage industries and initial fieldwork The second phase involved a case study analysis with three small scale agricultural cottage enterprises SACEs and three that had expanded ESACEs The case studies primarily involved in depth semi structured interviews The research found that the cottage industry identity was meaningful as applied to the SACEs but also that many of the defining characteristics of a cottage industry were also applicable to the ESACEs Artisanality was found to be an appropriately assigned label in both the small scale and expanded enterprises with a set of specific characteristics approaches and the principal's role as artisanal entrepreneur authenticating the ESACEs and their products as artisanal It was found that the enterprises under study aligned with Ray's 2003 notion of the cultural approach to Endogenous Regional Development ERD and particular place and space characteristics whilst the short food supply chain a collective form of social action assisted in facilitating the preservation of these associated identities tags In examining the retention of food quality meanings upon expansion the same set of characteristics and qualities that are potentially used and applicable to the SACEs in defining quality were also found to be relevant in the ESACEs In examining the cottage industry artisanal and quality identities this research demonstrated that there are more similarities than differences between the SACEs and ESACEs and that growth can occur without necessarily compromising values and actions all of which enable identity preservation and value adding potentialities Moreover the current use of the short food supply chain holds significant promise for this industry as it assists in building relationships and trust between processors and consumers who share similar values and beliefs surrounding food production and consumption In so doing food products are heavily laden with eco social information which can assist in challenging unsustainable agri-food production and related practice

Speculation, Heresy, and Gnosis in Contemporary Philosophy of Religion Joshua Ramey, Matthew S. Haar Farris, 2016-10-12 Many in continental philosophy of religion aver that we are in a new moment one where the intellectually marginalized and religiously bastardized traditions of mystical intuitive and esoteric apprehensions must be re-articulated and appreciated anew In an era marked by catastrophic events and atrophied cultural institutions what seems to be needed is an affirmation of the human potential to truck with non human or even inhuman forces and intentions at scales of speed slowness or intensity that break with consensual conceptions of human limitations The essays in this volume outline patterns of mind and mortality existence and ecstasy creativity and expression political possibility and religious matrix from a position that takes quite seriously possible relations with the absolute however enigmatic that modernity has denied and postmodernity has obscured in the

name of academic skepticism and humanist reservations Beyond post modernist pastiche and post secular nostalgia these essays explore the potencies of archaic spiritual disciplines as well as the passions driving the mystical heretical and Gnostic intimations riddling contemporary relations with the absolute Human Dignity Peter Bieri,2017-01-12 Dignity is humanity's most prized possession We experience the loss of dignity as a terrible humiliation when we lose our dignity we feel deprived of something without which life no longer seems worth living But what exactly is this trait that we value so highly In this important new book distinguished philosopher Peter Bieri looks afresh at the notion of human dignity In contrast to most traditional views he argues that dignity is not an innate quality of human beings or a right that we possess by virtue of being human Rather dignity is a certain way to lead one's life It is a pattern of thought experience and action in other words a way of living In Bieri's account there are three key dimensions to dignity as a way of living The first is the way I am treated by others they can treat me in a way that leaves my dignity intact or they can destroy my dignity The second dimension concerns the way that I treat other people do I treat them in a way that allows me to live a dignified life The third dimension concerns the view that I have of myself which ways of seeing and treating myself allow me to maintain a sense of dignity In the actual flow of day to day life these three dimensions of dignity are often interwoven and this accounts in part for the complexity of the situations and experiences in which our dignity is at stake So why did we invent dignity and what role does it play in our lives As thinking and acting beings our lives are fragile and constantly under threat A dignified way of living argues Bieri is humanity's way of coping with this threat In our constantly endangered lives it is important to stand our ground with confidence Thus a dignified way of living is not any way of living it is a particular way of responding to the existential experience of being under threat It is also a particular way of answering the question What kind of life do we wish to live This beautifully written reflection on our most cherished human value will be of interest to a wide readership

purchase or someone has given it to you I pray you will read it I promise it will be a blessing to your soul We are told by the Word of God to seek Him diligently Without any denominational pull to my understanding Gods Word I have done so for many years I am sixty five years old and a common man in my walk with Christ I was a little slow in the beginning but now after thirty five years I have been running to catch up with Him Why am I running Time is of great importance No matter how young or old we are we just never know how much time we have in this world Please read what I have learned from the Word of God and the knowledge He will give us You may or may not agree with all my views and opinions After all I am just a common man What I do promise you this book will open your eyes and hearts It will give you an incentive to seek God diligently No matter what religion we may follow we must seek Him diligently
