

7 STEPS OF PROBLEM SOLVING

Step 1: Define The Problem

Without knowing the problem, you can't move further. So, have a clear understanding of the problem for which you're going to find a solution.

Step 2: Analyze The Problem

It helps you understand the nature of the problem and find the possible ways out.

Step 3: Develop Potential Solutions

It's essential to come up with multiple viable solutions to a problem. Because you don't know yet what outcomes the action is going to bring about.

Step 4: Evaluate The Options

This will help you determine the most effective and suitable solution to the problem.

Step 5: Select The Best Option

Select the solution that is best fitted to the organizational cultures and goals, and meets all the criteria that you set for evaluating the options.

Step 6: Implement The Solution

Prepare a work plan putting all the necessary things into it. Ensure that every one of your team understands the plan and their responsibilities to make the plan fruitful.

Step 7: Measure The Results

Keep track to measure the results and make sure the plan is performing well to solve the problem.

Making Pre-Algebra Come Alive Alfred S. Posamentier,2000-07-21 Activities in Pre Algebra is a set of versatile enrichment exercises that covers a very broad range of mathematical topics and applications from the Moebius strip to the googol Several criteria have been used in developing the activities and in selecting the topics that are included All of them bear heavily and equally on our concerns for curriculum goals and classroom management Each activity is presented as a reproducible student investigation It is followed by guidelines and notes for the teacher Each activity is keyed to the National Council of Teachers of Mathematics NCTM Standards Revised This link to the NCTM standards allows teachers to facilitate linking classroom activities to specific state and school district content standards First and foremost the activities are meant to be motivational As much as possible we want this book to achieve the goal of being attractive to people who thought they didn't like mathematics To accomplish this it is necessary for the activities to be quite different from what students encounter in their basal texts different in both substance and form This seems especially critical no matter how excellent a basal text is being used nearly every class experiences the blahs Unfortunately this sort of boredom is often well entrenched long before the teacher and perhaps even the students are aware of it Presenting activities on a regular basis gives the variety and change of pace needed to sustain interest in any subject
