Cohen, 2025-05-06 Immune conditions and autoimmune diseases are on a meteoric rise in our modern day world with the biggest triggers existing all around us. With an environment laden with untested and unregulated chemicals, radiation, and light and noise pollution, these immune-disrupting chemicals (IDCs) trigger our bodies to go haywire and develop chronic conditions. And while variables like age, medication use, and overall health status factor into the performance of one's immune system, doctors are struggling to help their patients find livable solutions for their chronic illness. In *Detoxify*, integrative rheumatologist Dr. Aly Cohen, with over twenty years practicing on the front lines of clinical medicine, proposes a life-saving solution to minimizing immune system triggers and activating the body's natural detoxification systems. Using clear and accessible language, Dr. Cohen demonstrates the surprising ways in which environmental toxins impact our bodies, linking specific symptoms and illnesses to everyday exposures. You'll uncover what's lurking in our water, food, personal care products, and household goods. More importantly, you'll discover simple and affordable steps to lead a more toxin-free life. Dr. Cohen empowers us, no matter our lifestyle or budget, to make small practical shifts that can substantially increase our quality of life and help to thwart future health risks. Featuring Dr. Cohen's 4A's of environmental health navigation, full-body survey to assess toxin risk, as well as a 21-day plan to significantly reduce environmental exposure and enhance your detoxification process, this book is packed with valuable resources, including lab test recommendations, DIY household cleaner, and personal care recipes. Dr. Cohen's *Detoxify Food Pyramid* and over two dozen delicious detoxifying recipes. *Detoxify* is your ultimate guide for making easy and practical lifestyle changes that can alleviate chronic illness, strengthen your immune system, and ultimately extend your lifespan. **Poisoned for Profit** Philip Shabecoff, Alice Shabecoff, 2010 Originally

How to Sell a Poison Elena Conis,2022-04-12 The story of an infamous poison that left toxic bodies and decimated wildlife in its wake is also a cautionary tale about how corporations stoke the flames of science denialism for profit The chemical compound DDT first earned fame during World War II by wiping out insects that caused disease and boosting Allied forces to victory Americans granted it a hero s homecoming spraying it on everything from crops and livestock to cupboards and curtains Then in 1972 it was banned in the US But decades after that a cry arose to demand its return This is the sweeping narrative of generations of Americans who struggled to make sense of the notorious chemical s risks and benefits Historian Elena Conis follows DDT from postwar farms factories and suburban enclaves to the floors of Congress and tony social clubs where industry barons met with Madison Avenue brain trusts to figure out how to sell the idea that a little poison in our food and bodies was nothing to worry about In an age of spreading misinformation on issues including pesticides vaccines and climate change Conis shows that we need new ways of communicating about science as a constantly evolving discipline not an immutable collection of facts before it s too late

Reproductive Labor and Innovation Jennifer Denbow,2024-09-27 In Reproductive Labor and Innovation Jennifer Denbow examines how the push toward technoscientific innovation in contemporary American life often comes at the expense of the care work and reproductive labor that is necessary for society to function Noting that the gutting of social welfare programs has shifted the burden of solving problems to individuals Denbow argues that the aggrandizement of innovation and the degradation of reproductive labor are intertwined facets of neoliberalism She shows that the construction of innovation as a panacea to social ills justifies the accumulation of wealth for corporate innovators and the impoverishment of those feminized and racialized people who do the bulk of reproductive labor Moreover even innovative technology aimed at reproduction such as digital care work platforms and noninvasive prenatal testing obscure structural injustices and further devalue reproductive labor By drawing connections between innovation discourse the rise of neoliberalism financialized capitalism and the social and political degradation of reproductive labor Denbow illustrates what needs to be done to destabilize the overvaluation of innovation and to offer collective support for reproduction
