Internationalizing Media Theory Vol 14 Transition Power Culture:

Media in Process Sai Felicia Krishna-Hensel, 2016-09-19 The post communist development of media systems has been uneven in the countries of the region Television and newspapers together with the emergence of social media have had great influence on the political debate in various countries Ownership of the media has been a factor in many instances The integration of traditionally isolated Central Eastern Europe into larger worldwide trends has fundamentally changed the way we look at the media in this region This volume proposes to address the transition of the media and communication industries in the contemporary period The contributions discuss among other things the obstacles that still remain for the media to play an effective watchdog role in the new democracies and whether the advent of the Internet and social media has helped or hindered the transformation to a powerful independent media The discussion further examines whether advertising agencies have targeted post communist citizens differently than those in Western European countries and if the media markets in the post communist region are fundamentally different than in Western Europe and North America A second focus of the volume is the media coverage of social issues like domestic violence which is intended to draw attention to these issues and influence policy in a more aware and open society This establishes the trend of post communist media following the example of western media practice The implications of the Central European media transformation for the newly transforming media markets in the post Soviet space suggest a new phase in the development of the medium The impact of global influences on regional expression is an important aspect of the political and social changes that are underway This volume makes an important interdisciplinary contribution in examining the development of the media *International Media Studies* Divya McMillin, 2009-02-04 *International Media Studies* is a bold introduction to the field that focuses on a de centering of media epistemology to represent a more thorough world view A comprehensive textbook exploring the current state of media studies as it is being practised across the world Takes discussions about media studies beyond other textbooks by situating the subject firmly in an international context appropriate to the globalized 21st century Surveys our reception of a wide variety of media content and formats including television magazines fiction newspapers and popular music Considers both theoretical and much needed ethnographic perspectives on media studies Showcases global and local media patterns in a variety of countries around the world including examples from Asia Africa and Latin America **News Media and Power in Russia** Olessia Koltsova, 2006-09-27 The end of communist rule in the Soviet Union brought with it a brave new world of media and commerce Formerly state owned enterprises were transformed often through private ownership and new corporations sprung up overnight to take advantage of the new atmosphere of freedom Until now most research on media and news production in Russia has focused on the scope of government control and comparisons with the communist era However extra governmental controls and the challenges of operating in a newly capitalist environment have been just as important if not more so in the formation of the new media climate Filling the gap in the literature this book examines the various agents

who make the news and discusses the fierce struggle among the various agents of power involved Drawing on existing theories and scholarship the book provides a wealth of detail on the actual daily practices of news production in Russia Original research is combined with compelling first hand accounts of news production and dissemination to provide an incisive look at the issues and power structures Russian journalists face on a daily basis **The Global and the National** Terhi Rantanen,2002 This original book explores the development of post Soviet media and communications in Russia a newly globalized environment following radical social change Unique empirical research on new communications technologies news agencies television and advertising in Russia shows how the experience and effects of globalization which initially played a liberating role in the downfall of communism are being transformed by the reassertion of the national The Global and the National challenges conventional assumptions about globalization and contributes to a better understanding of its theoretical base as well as its effects on non Western countries *East European Cinemas* Anikó Imre,2005-09-14 Eastern Europe has produced rich and varied film cultures Czech Hungarian and Serbian among them whose histories have been intimately tied to the transition from Soviet domination to the complexities of post Communist life This latest volume in the AFI Film Readers series presents a long overdue reassessment of East European cinemas from theoretical psychoanalytic and gender perspectives moving the subject beyond the traditional area studies approach to the region s films This ambitious collection situating Eastern Europe s many cinemas within global paradigms of film study will be an essential work for all students of cinema and for anyone interested in the relation of film to culture and society **The SAGE Handbook of Human Rights** Anja Mihr,Mark Gibney,2014-07-21 The SAGE Handbook of Human Rights will comprise a two volume set consisting of more than 50 original chapters that clarify and analyze human rights issues of both contemporary and future importance The Handbook will take an inter disciplinary approach combining work in such traditional fields as law political science and philosophy with such non traditional subjects as climate change demography economics geography urban studies mass communication and business and marketing In addition one of the aspects of mainstreaming is the manner in which human rights has come to play a prominent role in popular culture and there will be a section on human rights in art film music and literature Not only will the Handbook provide a state of the art analysis of the discipline that addresses the history and development of human rights standards and its movements mechanisms and institutions but it will seek to go beyond this and produce a book that will help lead to prospective thinking *Dangerous Alliances* Lise Garon,2003-06 This study of Magreb s highly erratic encounter with democratization illuminates the complex and diverse encounters between civil society and the authorities in Tunisia Algeria and Morocco As opposition has built up in each society those in power have confronted the pressures for democratization The author examines the role of the media in particular both within these countries and internationally as contested but often compliant terrain between governments and dissidents She uses a dynamic systems model incorporating the existence of fundamental conflict to show how democratic institutions can become institutionalized

and the constant possibility of any democratic transition being reversed **Tech Giants, Artificial Intelligence, and the Future of Journalism** Jason Paul Whittaker, 2019-02-11 This book examines the impact of the Big Five technology companies Apple Alphabet Google Amazon Facebook and Microsoft on journalism and the media industries It looks at the current role of algorithms and artificial intelligence in curating how we consume media and their increasing influence on the production of the news Exploring the changes that the technology industry and automation have made in the past decade to the production distribution and consumption of news globally the book considers what happens to journalism once it is produced and enters the media ecosystems of the internet tech giants and the impact of social media and AI on such things as fake news in the post truth age The audience for this book are students and researchers working in the field of digital media and journalism studies or media studies more generally It will also be useful to those who are looking for extended case studies of the role taken by tech giants such as Facebook and Google in the fake news scandal or the role of Jeff Bezos in transforming The Washington Post The Open Access version of this book available at <https://doi.org/10.4324/9781351013758> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
