Bielanska, 2019-10 **Handbook of Clinical Behavior Therapy with the Elderly Client** Patricia A. Wisocki, 2013-11-21

Although we speak of the elderly as if there were one body of people with common characteristics older adults are more heterogeneous than any other population. People over the age of 65 are also the fastest growing segment of the population in the United States currently numbering 25 million. The majority of older adults reside in their communities; a small fraction of them are cared for in institutions. Most may expect to experience some kind of physical impairment. Approximately a quarter of the population may expect to suffer a mental health impairment. While traditional therapies have not been especially effective for older adults, behavior therapy has shown exceptional promise as a treatment modality. This book presents a comprehensive explication of the relatively new field of behavioral gerontology. It was written for the clinician interested in the interaction of medical, environmental, and psychological variables and their effects on treatment of elderly clients and for the researcher who will be looking to extend knowledge about interventions with this population. It will be useful for the graduate student in clinical psychology as well as the experienced clinician who will want to include the elderly in his or her therapeutic population. *Handbook of Clinical Behavior Therapy with the Elderly Client* Patricia A. Handbook of Behavioral and Cognitive Therapies with Older Adults Dolores Gallagher Thompson, Ann

Steffen, Larry W. Thompson, 2007-10-12. It gives me great pleasure to witness continued growth in the application of cognitive and behavioral theories and therapies to more diverse populations including in this volume their application to the mental health problems of later life. Evidence continues to accumulate demonstrating that these are effective in treating a broad range of elderly patient groups. This is the first book to examine a number of these evidence-based interventions currently in use with older adults. The editors have assembled chapters developed in many of the leading clinical and clinical research programs focusing on elderly patients both in this country and in the UK. Since the emphasis of this volume is primarily on clinical application, each author group was asked to discuss the empirical data for the treatment strategies it is using with the specific patient group selected. Typically this was followed by a detailed description of treatment procedures that were then illustrated by one or more clinical examples. The book begins by examining the treatment of depressive and anxiety disorders and then moves on to more complicated and/or serious disorders including schizophrenia and other psychoses, suicidal behavior, personality disorders, bipolar disorders, dementia, and complicated bereavement. A chapter on the problems and issues in training therapists to use evidence-based interventions effectively is also included along with a chapter discussing the implications of Medicare policies and guidelines for service delivery. *Handbook of Social Work in Health and Aging* Barbara Berkman, 2006-02-09. The Handbook of Social Work in Health and Aging is the first reference to combine the fields of

health care aging and social work in a single authoritative volume These areas are too often treated as discrete entities while the reality is that all social workers deal with issues in health and aging on a daily basis regardless of practice specialization As the baby boomers age the impact on practice in health and aging will be dramatic and social workers need more specialized knowledge about aging health care and the resources available to best serve older adults and their families The volume s 102 original chapters and 13 overviews written by the most experienced and prominent gerontological health care scholars in the United States and across the world provide social work practitioners and educators with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and their families new models for intervention in both community based practice and institutional care and knowledge of significant policy and research issues in health and aging A truly monumental resource this handbook represents the best research on health and aging available to social workers today
