Human Reproduction Principles Practices Policies:

Reproducing Persons Laura M. Purdy, 2018-09-05 The essays next look at abortion from a variety of angles One contends that killing fetuses is not murder others emphasize the moral importance of access to abortion Purdy considers the conflicting interests of women and men regarding abortion and argues against requiring a husband's consent The book concludes with a consideration of new reproductive technologies and arrangements including the controversial issue of surrogacy or contract pregnancy Throughout Purdy combines traditional utilitarianism with some of the most powerful insights of contemporary feminist ethics Her provocative essays create guidelines for approaching new topics and inspire fresh thinking about old ones

Law, Policy and Reproductive Autonomy Erin Nelson, 2014-07-18 Reproductive choices are at once the most private and intimate decisions we make in our lives and undeniably also among the most public Reproductive decision making takes place in a web of overlapping concerns political and ideological socio economic health and health care all of which engage the public and involve strongly held opinions and attitudes about appropriate conduct on the part of individuals and the state Law Policy and Reproductive Autonomy examines the idea of reproductive autonomy noting that in attempting to look closely at the contours of the concept we begin to see some uncertainty about its meaning and legal implications about how to understand reproductive autonomy and how to value it Both mainstream and feminist literature about autonomy contribute valuable insights into the meaning and implications of reproductive autonomy The developing feminist literature on relational autonomy provides a useful starting point for a contextualised conception of reproductive autonomy that creates the opportunity for meaningful exercise of reproductive choice With a contextualised approach to reproductive autonomy as a backdrop the book traces aspects of the regulation of reproduction in Canadian English US and Australian law and policy arguing that not all reproductive decisions necessarily demand the same level of deference in law and policy and making recommendations for reform

Ectogenesis Scott Gelfand, John R. Shook, 2006 This book raises many moral legal social and political questions related to possible development in the near future of an artificial womb for human use Is ectogenesis ever morally permissible If so under what circumstances Will ectogenesis enhance or diminish women's reproductive rights and or their economic opportunities These are some of the difficult and crucial questions this anthology addresses and attempts to answer

Human Reproduction Christine Overall, 1993 Who owns frozen human embryos Are surrogate motherhood arrangements dangerous for women Should access to in vitro fertilization be limited or increased With the development of complex reproductive technologies and the ensuing controversies in reproductive ethics there is an urgent need for more careful examination of moral principles current practices and social policies pertaining to reproduction The issues examined in this collection of nine papers focusing of the Canadian experience include abortion the cryopreservation of embryos the selective termination of fetuses within multiple pregnancies social policy for gestational surrogacy and the regulation of in vitro fertilization Adopting a feminist perspective

the book places reproductive autonomy at the center of debates about the control of reproduction

Reproductions of Reproduction Judith Roof, 2014-07-10 Reproductions of Reproduction is about the loss of the paternal metaphor and how the ensuing scramble to relocate it has set off a series of representational crises Examining the sudden popularity of such figures as cyborgs bodybuilders and vampires shifts in legislation about abortion paternity and copyright the transition to a digital based society the emergence of lesbian and gay studies the growing infatuation with hyper realistic patterns in television this book argues that each of these manifestations represents an attempt to resituate the paternal metaphor While this shift affects our understandings of everything from narratives to law to time it also suggests a point of potential political intervention allowing us to identify the full implications of these changes *Ethics and Emerging Technologies* Ronald Sandler, 2016-04-30 First and only undergraduate textbook that addresses the social and ethical issues associated with a wide array of emerging technologies including genetic modification human enhancement geoengineering robotics virtual reality artificial meat neurotechnologies information technologies nanotechnology sex selection and more Encyclopedia Of Reproductive Technologies Annette Burfoot, 2019-08-19 This collection of encyclopedic entries provides a broad based appreciation of new reproductive technologies that includes accessible technological descriptions and their historical and social contexts The collection is divided into five thematic areas Theories of Reproduction Ancient to Contemporary Early Reproductive Technologies Post War De The Fragmenting Family Brenda Almond, 2008-08-28 Brenda Almond throws down a timely challenge to liberal consensus about personal relationships She maintains that the traditional family is fragmenting in Western societies and that this fragmentation is a cause of serious social problems She urges that we reconsider our attitudes to sex and reproduction in order to strengthen our most important social institution the family which is the key to ensuring healthy relationships between parents and children and a secure upbringing for the citizens of the future Anyone who is concerned about how the framework of society is changing anyone who has to face difficult personal decisions about parenthood or family relationships will find this book compelling It may disturb deep convictions or offer an unwelcome message but it is compassionate as well as controversial Exposing Privatization Pat Armstrong, Carol Amaratunga, Jocelyne Bernier, 2001-01-01 This book begins with the international context for health care reform and then moves from coast to coast setting out what is known about the reforms in health care privatization that are underway and about their impact on women

Motherhood - Philosophy for Everyone Sheila Lintott, 2011-03-14

MOTHERHOOD PHILOSOPHY FOR EVERYONE If you have ever wondered what makes a good or a bad mother or if mothers are always right in thinking their babies are beautiful or indeed whether mother always knows best look no further Without a single nag Motherhood Philosophy for Everyone covers these salient philosophical issues and more including The anticipation of impending parenthood compared with the reality Should we tell the occasional lie to our children What does the Bible actually say about the virgin birth If we were able to turn our children off would and should we be tempted by this option The

experience of lesbian mothering The unexpected challenges and complications of being a mother As in any group of thinkers some mothers are more ambitiously reflective than others either out of temperamental thoughtfulness moral and political concerns or most often because they have serious problems with their children However maternal thinking is no rarity Maternal work itself demands that mothers think From Maternal Thinking Toward A Politics of Peace Sara Ruddick **Our Bodies, Whose Property?** Anne Phillips,2013-07-21 An argument against treating our bodies as commodities No one wants to be treated like an object regarded as an item of property or put up for sale Yet many people frame personal autonomy in terms of self ownership representing themselves as property owners with the right to do as they wish with their bodies Others do not use the language of property but are similarly insistent on the rights of free individuals to decide for themselves whether to engage in commercial transactions for sex reproduction or organ sales Drawing on analyses of rape surrogacy and markets in human organs Our Bodies Whose Property challenges notions of freedom based on ownership of our bodies and argues against the normalization of markets in bodily services and parts Anne Phillips explores the risks associated with metaphors of property and the reasons why the commodification of the body remains problematic What she asks is wrong with thinking of oneself as the owner of one's body What is wrong with making our bodies available for rent or sale What if anything is the difference between markets in sex reproduction or human body parts and the other markets we commonly applaud Phillips contends that body markets occupy the outer edges of a continuum that is in some way a feature of all labor markets But she also emphasizes that we all have bodies and considers the implications of this otherwise banal fact for equality Bodies remind us of shared vulnerability alerting us to the common experience of living as embodied beings in the same world Examining the complex issue of body exceptionalism Our Bodies Whose Property demonstrates that treating the body as property makes human equality harder to comprehend **Long Term Safety of Assisted**

Reproduction Arianna D'Angelo,Kenny A. Rodriguez-Wallberg,Daniela Nogueira,2022-03-28 A much needed overview of the available information now accumulating to indicate that assisted reproductive technologies are generally safe for both babies and mothers However the literature abounds with reports of a higher risk of obstetric and perinatal complications regarding the long term outcomes for both women and children the data are still scarce The chapters summarized in this book review the current knowledge on long term safety of assisted reproduction and indicate the need for continued research to cover the lack of data in some specific patient groups and for recently developed treatments that only have a short period of follow up

The Oxford Handbook of Practical Ethics Hugh LaFollette,2005-09-15 This is a guide to contemporary thought on ethical issues in all areas of human activity personal medical sexual social political judicial and international from the natural world to the world of business **Rights, Duties and the Body** Rosamund Scott,2002-08-05 If a pregnant woman refuses medical treatment needed by the fetus for instance for religious reasons or conducts some aspect of her life in a way which risks fetal harm there may arise an instance of maternal fetal conflict This is an unfortunate term since pregnant women are

generally renowned for their self sacrificing behaviour but it may well reflect the reality of certain maternal choices and actions Should a pregnant woman have the legal right to refuse medical treatment needed by the fetus or should she owe it a legal duty of care which precludes her acting in ways which may harm it Does the debate hinge simply upon the appropriateness or otherwise of legally compelling presumed moral obligations or is it more complex than this Indeed what are a pregnant woman's moral obligations towards her fetus In England and in some US states courts have held that a pregnant woman has the right to refuse medical treatment needed by the fetus In similar fashion the idea of a general maternal legal duty of care toward the fetus has been rejected most recently in Canada The cases however leave the impression of an uncomfortable split between the ethics and the law as if the problem were entirely one of not legally enforcing presumed moral duties The effect is both puzzling and polarising puzzling in that the cases leave unanswered as largely they must the huge question of a pregnant woman's moral rights and duties polarising in that the cases leave troubling tensions about a pregnant woman's rights in the face of fetal harm or death The tendency is to deny these by ever more strongly asserting a woman's rights In turn this encourages a reaction in favour of fetal rights one which is unlikely to attend to a woman's interests and difficulties in pregnancy This could have serious legal repercussions for various instances of maternal fetal conflict including in those US states or other jurisdictions which have yet to address these issues It might also increase the pressures on the issue of abortion This book which seeks a way between these polarised positions tries to explain and justify a woman's moral and legal rights in pregnancy and at the same time to explore the extent of her moral duties toward the fetus The aim is to resolve as far as possible the ethical legal and social tensions which undoubtedly surround this area Innovatively in work on this issue and unusually in the field of medical law and ethics the author adopts a joint philosophical and legal approach directed to issues both of principle and policy revealing strong conceptual links between the ethics and the law In addition to an ethical exploration of the maternal fetal relationship the author explores and analyses the relevant English American Canadian and sometimes Australian arguments from the law of treatment refusal abortion tort and rescue as well as relevant jurisprudence from the European Court of Human Rights This important book breaks new ground and will be of great interest to academics in law and philosophy lawyers health professionals policy makers and students of medical law and ethics It is rare to find a book which so skilfully combines legal and moral analysis of a controversial medical issue Rosamund Scott has produced what is undoubtedly one of the finest pieces of medico legal writing of recent years This is a clever human and immensely readable work Alexander McCall Smith Professor of Medical Law University of Edinburgh This book concerns one of the most personally agonizing and morally complex issues in medical ethics It is a work of great philosophical sophistication combining breadth of vision with acute sensitivity to the nuances of women's experiences It will soon become the standard work in philosophical legal and political debate on maternal fetal conflicts Roger Crisp Uehiro Fellow and Tutor in Philosophy St Anne's College Oxford

Reproductive Issues in America

Janna Merrick, Robert H. Blank, 2003-08-06 A balanced and thoughtful analysis of human reproduction issues in the United States with emphasis on the ethical and policy implications of cutting edge reproductive technologies Few subjects are as divisive and partisan as the issues surrounding the propagation of the human species This thorough examination covers the full scope of the debates and offers an up to the minute survey of the controversial technologies that are at the heart of reproductive rights in the United States The areas explored range from abortion and sterilization to fetal research and human cloning The moral societal and public policy implications of each subject are examined thoroughly with emphasis on those areas where cutting edge technology has raced ahead of public policy thereby creating new concerns for ethicists and policy makers Legislative oversight or the freedom to pursue reproductive technologies at any cost this debate is far from over

A Feminist I Christine Overall, 1998-10-29 Our universities are the locus of ongoing debates over the politics of gender of class of disadvantage and disability and over the issue of political correctness In *A Feminist I* Christine Overall offers wide ranging reflections from a first person point of view on these issues and on the politics of the modern university itself In doing so she continually returns to underlying epistemological concerns What are our assumptions about the ways in which knowledge is constructed To what degree are our perceptions shaped by our social roles and identities In the past generation feminists have led the way in recognising the importance of such questions and recognising too the ways in which personal experience may be an invaluable reference point in academic theory and practice But reliance on personal experience is fraught with problems how is one to deal with tensions between the autobiographical and the analytic This book points the way to resolving some of those tensions and to fruitfully sustaining others It is a book of considerable insight warm humanity and genuine importance

Minds of Our Own Wendy Robbins, Meg Luxton, Margrit Eichler, Francine Descarries, 2009-08-02 This book of personal essays by over forty women and men who founded women s studies in Canada and Quebec explores feminist activism on campus in the pivotal decade of 1966-76 The essays document the emergence of women s studies as a new way of understanding women men and society and they challenge some current preconceptions about second wave feminist academics The contributors explain how the intellectual and political revolution begun by small groups of academics often young untenured women at universities across Canada contributed to social progress and profoundly affected the way we think speak behave understand equality and conceptualize the academy and an academic career A contextualizing essay documents the social economic political and educational climate of the time and a concluding chapter highlights the essays recurring themes and assesses the intellectual and social transformation that their authors helped set in motion The essays document the appalling sexism and racism some women encounter in seeking admission to doctoral studies in hiring in pay and in establishing the legitimacy of feminist perspectives in the academy They reveal sources of resistance too not only from colleagues and administrators but from family members and from within the self In so doing they provide inspiring examples of sisterly support and lifelong friendship
