## Hunger 2001 Hunger:

*The challenge of hunger: Global Hunger Index: Facts, determinants, and trends* Doris Wiesmann, Lioba Weingärtner, Iris Schöninger, Changing Welfare Rachel A. Gordon, Herbert J. Walberg, 2012-12-06 Changing Welfare is concerned with the sweeping changes that took place in public assistance programs at the end of the 20th century and the way in which the original and reformed versions of these programs relate to the well being of children and their families The authors critically review the original conceptualizations and the new directions of programs offering cash assistance food assistance health insurance and child protection services to low income and disabled children and their families thus changes in the welfare programs themselves And throughout their concern is with whether and how these programs alter the opportunities for the development of the children targeted by these programs thus changes in the welfare of children and their families The objective of each chapter of the book is to rigorously highlight key theoretical and research issues including the identification of major empirical findings and unanswered questions Wherever relevant the chapters connect theory and research to policy and practice pointing to recommendations and challenges for the future including alternative approaches for research policy and practice

**The New Famines** Stephen Devereux, 2006-11-22 The recent occurrences of famine in Ethiopia and Southern Africa have propelled this key issue back into the public arena for the first time since 1984 as once again it becomes a priority not only for lesser developed countries but also for the international community Exploring the paradox that is the persistence of famine in the contemporary world this book looks at the way the nature of famine is changing in the face of globalization and shifting geo political forces The book challenges perceived wisdom about the causes of famine and analyzes the worst cases of recent years including close analysis of food scarcity in North Korea Ethiopia Sudan and Malawi and less well known cases in Madagascar Iraq and Bosnia With fresh conceptual frameworks and analytical tools major theoretical constructs which have previously been applied to analyze famines such as the democracy ends famine argument Sen's entitlement approach and the complex political emergency framework are confronted This volume assembles an international team of contributors including Marcus Noland Alex de Waal and Dan Maxwell an impressive roster which helps make this book an important resource for those in the fields of development studies and political economics

*America's Children ,2003 At Risk* Piers Blaikie, Terry Cannon, Ian Davis, Ben Wisner, 2014-01-21 The term natural disaster is often used to refer to natural events such as earthquakes hurricanes or floods However the phrase natural disaster suggests an uncritical acceptance of a deeply engrained ideological and cultural myth At Risk questions this myth and argues that

extreme natural events are not disasters until a vulnerable group of people is exposed The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration but as a signal failure of mainstream development Two analytical models are provided as tools for understanding vulnerability One links remote and distant root causes to unsafe conditions in a progression of vulnerability The other uses the concepts of access

and livelihood to understand why some households are more vulnerable than others Examining key natural events and incorporating strategies to create a safer world this revised edition is an important resource for those involved in the fields of environment and development studies   **Official Gazette of the United States Patent and Trademark Office** ,2003
