Politics as Usual Thomas W. Pogge, 2013-04-24

Worldwide human lives are rapidly improving Education health care technology and political participation are becoming ever more universal empowering human beings everywhere to enjoy security economic sufficiency equal citizenship and a life in dignity To be sure there are some specially difficult areas disfavoured by climate geography local diseases unenlightened cultures or political tyranny Here progress is slow and there may be set backs But the affluent states and many international organizations are working steadily to extend the blessings of modernity through trade and generous development assistance and it won't be long until the last pockets of severe oppression and poverty are gone Heavily promoted by Western governments and media this comforting view of the world is widely shared at least among the affluent Pogge's new book presents an alternative view Poverty and oppression persist on a massive scale political and economic inequalities are rising dramatically both intra nationally and globally The affluent states and the international organizations they control knowingly contribute greatly to these evils selfishly promoting rules and policies harmful to the poor while hypocritically pretending to set and promote ambitious development goals Pogge's case studies include the 1 day poverty measurement exercise the cosmetic statistics behind the first Millennium Development Goal the War on Terror and the proposed relaxation of the constraints on humanitarian intervention A powerful moral analysis that shows what Western states would do if they really cared about the values they profess

*Poverty in Transition and Transition in Poverty* Yogesh Atal, 1999-03 Poverty is an issue facing countries around the globe yet it is a multi dimensional phenomenon caused by a variety of factors differing from context with no linear chain of cause and effect The occurrence and persistence of poverty is influenced by an interrelated web of economic social psychological cultural and political factors Focusing on countries in transition belonging to the former Soviet bloc where the existence of poverty was officially denied until the collapse of the Soviet Union this volume examines the ways in which each country is dealing with its newly acknowledged and rapidly increasing poverty The transition from socialism to democracy and market economies has proved more difficult and costly than anyone imagined

Scholars from the six countries examined here profile and evaluate current social policies and programs on poverty eradication and provide a comparative perspective that ensures that culturally specific solutions can be found in place of borrowed solutions from abroad solutions which have thus far ignored the cultural factor and have thus failed to deliver

**Human Development and Global Institutions** Richard Ponzio, Arunabha Ghosh, 2016-02-05 This book provides a timely and accessible introduction to the foundational ideas associated with the human development school of thought It examines its conceptual evolution during the post colonial era and discusses how various institutions of the UN system have tried to engage with this issue both in terms of intellectual and technical advance and operationally Showing that human development has had a profound impact on shaping the policy agenda and programming priorities of global institutions it argues that human development has helped to preserve the continued vitality of major multilateral development programs funds and agencies It also details how human development faces new risks and threats caused by political economic social and environmental forces which are highlighted in a series of engaging case studies on trade water energy the environment democracy human rights and peacebuilding The book also makes the case for why human development remains relevant in an increasingly globalized world while asking whether global institutions will be able to sustain political and moral support from their member states and powerful non state actors It argues that fresh new perspectives on human development are now urgently needed to fill critical gaps across borders and entire regions A positive forward looking agenda for the future of global governance would have to engage with new issues such as the Sustainable Development Goals energy transitions resource scarcity and expansion of democratic governance within and between nations Redefining the overall nature and specific characteristics of what constitutes human progress in an increasingly integrated and interdependent world this book serves as a primer for scholars and graduate students of international relations and development It is also relevant to scholars of economics political science history sociology and women s studies

**Rent-Seeking, Institutions and Reforms in Africa** Pius Fischer, 2007-12-03 This book identifies rent seeking behaviour as one of the main causes of poor economic performance observed among other places in many countries of Africa Rent seeking describes the ability to capture incomes without producing output or making a productive contribution Since rent seekers are often an integral part of an ailing economy and resist the adoption of reforms understanding and anticipating rent seeking behaviour is crucial for designing more adequate and effective policy reforms Following a comprehensive theoretical elaboration of the causes properties and consequences of rents and rent seeking strategies in the context of economic reforms and development cooperation this book presents a detailed case study on rent seeking within the civil service parastatal sector and business community It demonstrates how rent seekers in Tanzania have systematically

delayed or undermined reforms such as tax reforms trade liberalisation privatisation or any reforms that aim to restrain corruption and embezzlement The case study quantifies and evaluates the rent seeking behaviour of more than 300 parastatal companies considering their profits and losses the quality and timeliness of their accounting and the magnitude of support they obtained from 16 different sources *Gender, Generation and Poverty* Sylvia H. Chant, 2007-01-01 The feminisation of poverty is viewed as a global trend and of particular concern in developing regions Yet although popularisation of the term may have raised women's visibility in development discourses and gone some way to encourage gender policies for poverty reduction the construct is only weakly substantiated This work covers this topic *The Uncertain Promise of Southern Africa* York W. *Exclusion and Poverty in India and Central Asia* Chittaranjan Senapati, 2016-09-09 The early years of 1990s economic reform and change has neglected social sectors both in India and Central Asia As a result poverty has also increased in India and Central Asian countries The economic political and social situation has worsened in all Central Asian states due to transition from command economy to market economy The early 1990s political decision has been dominated by a narrowly conceived version of economic policy for both India and Central Asia As a result the quality and the structure of social protection changed in a negative way Indeed in some cases the pursuit of a strict economic orthodoxy has left various sections of the community marginalized and alienated Both the societies confront a number of challenges that is as profound as the economic changes of the past The process of globalization and technical change has influenced economy and society in complex ways including raising expectations of consumption and remuneration for skilled knowledge workers creating greater demand for some information skills and services causing unemployment amongst those with few qualifications and destabilizing some traditional ways of life and increasing social exclusion It detaches groups and individuals from social relations and institutions and prevents them from full participation in the normal activities of the society In India and Central Asia communities face social exclusion on the basis of their identity as ethnic groups socio economic groups religious community and gender Inclusive development therefore is essential and it should be the top priority in development programs of India and Central Asia Research in this area has not been touched upon so far Since Central Asian countries are relatively new and trying to establish their democratic institutions this piece of work will be helpful for their nation building processes So far as the mutual benefit for both the regions is concerned India is an old democracy and its inclusive policy can be lessons for Central Asian countries On the other hand the experience of Central Asias policy implementation can be a lesson for India This piece of work has potential impulses to policy makers academicians and researchers of these five Central Asian countries and India This work can make a distinction than the conventional researcher in India by focusing on development studies social exclusion inclusive policies and comparative studies in international developments Key words social exclusion poverty deprivation development diversity India Central Asia Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan
