Hungarian With Ease And:

Hungarian with Ease Georges Kassai, Tamás Szende, 1996 This book aims to take users from scratch to having a solid base in Hungarian within six months and to feel comfortable with the language in as little as three months In only half an hour a day users will move ahead naturally until they are at ease with all the basic structures needed for communication and become familiar with the basic words and grammar of Hungarian The method comprises two phases the passive phase in which users simply repeat what they hear and read and the active phase in which users begin to create sentences and imagine themselves in a variety of everyday situations *Nationalist Politics and Everyday Ethnicity in a Transylvanian Town* Rogers Brubaker, Margit Feischmidt, Jon Fox, Liana Grancea, 2018-06-05 Situated on the geographic margins of two nations yet imagined as central to each Transylvania has long been a site of nationalist struggles Since the fall of communism these struggles have been particularly intense in Cluj Transylvania s cultural and political center Yet heated nationalist rhetoric has evoked only muted popular response The citizens of Cluj the Romanian speaking majority and the Hungarian speaking minority have been largely indifferent to the nationalist claims made in their names Based on seven years of field research this book examines not only the sharply polarized fields of nationalist politics in Cluj Transylvania and the wider region but also the more fluid terrain on which ethnicity and nationhood are experienced enacted and understood in everyday life In doing so the book addresses fundamental questions about ethnicity where it is when it matters and how it works Bridging conventional divisions of academic labor Rogers Brubaker and his collaborators employ perspectives seldom found together historical and ethnographic institutional and interactional political and experiential Further developing the argument of Brubaker s groundbreaking *Ethnicity without Groups* the book demonstrates that it is ultimately in and through everyday experience as much as in political contestation or cultural articulation that ethnicity and nationhood are produced and reproduced as basic categories of social and political life **The Jewish Encyclopedia** ,1925 **Social Justice**

Feminists in the United States and Germany Kathryn Kish Sklar, Anja Schöler, Susan Strasser, 2018-10-18 Women reformers in the United States and Germany maintained a brisk dialogue between 1885 and 1933 Drawing on one another s expertise they sought to alleviate a wide array of social injustices generated by industrial capitalism such as child labor and the exploitation of women in the workplace This book presents and interprets documents from that exchange most previously unknown to historians which show how these interactions reflected the political cultures of the two nations On both sides of the Atlantic women reformers pursued social justice strategies The documents discussed here reveal the influence of German factory legislation on debates in the United States point out the differing contexts of the suffrage movement compare pacifist and antipacifist reactions of women to World War I and trace shifts in the feminist movements of both countries after the war **Social Justice Feminists in the United States and Germany** provides insight into the efforts of American and German women over half a century of profound social change Through their dialogue these women explicate their larger political cultures

and the place they occupied in them The Nazis' Last Victims Randolph L. Braham, 2002-05-01 The Nazis Last Victims articulates and historically scrutinizes both the uniqueness and the universality of the Holocaust in Hungary a topic often minimized in general works on the Holocaust The result of the 1994 conference at the United States Holocaust Memorial Museum on the fiftieth anniversary of the deportation of Hungarian Jewry this anthology examines the effects on Hungary as the last country to be invaded by the Germans The Nazis Last Victims questions what Hungarians knew of their impending fate and examines the heightened sense of tension and haunting drama in Hungary where the largest single killing process of the Holocaust period occurred in the shortest amount of time Through the combination of two vital components of history writing the analytical and the recollective The Nazis Last Victims probes the destruction of the last remnant of European Jewry in the Holocaust *Bartók and His World* Peter Laki, 2020-10-06 Béla Bartók who died in New York fifty years ago this September is one of the most frequently performed twentieth century composers He is also the subject of a rapidly growing critical and analytical literature Bartók was born in Hungary and made his home there for all but his last five years when he resided in the United States As a result many aspects of his life and work have been accessible only to readers of Hungarian The main goal of this volume is to provide English speaking audiences with new insights into the life and reception of this musician especially in Hungary Part I begins with an essay by Leon Botstein that places Bartók in a large historical and cultural context László Somfai reports on the catalog of Bartók's works that is currently in progress Peter Laki shows the extremes of the composer's reception in Hungary while Tibor Tallián surveys the often mixed reviews from the American years The essays of Carl Leafstedt and Vera Lampert deal with his librettists Béla Balázs and Melchior Lengyel respectively David Schneider addresses the artistic relationship between Bartók and Stravinsky Most of the letters and interviews in Part II concern Bartók's travels and emigration as they reflected on his personal life and artistic evolution Part III presents early critical assessments of Bartók's work as well as literary and poetic responses to his music and personality The Jewish Encyclopedia Isidore Singer, Cyrus Adler, 1916 **The First World War, Second Edition** Martin Gilbert, 2004-03 All the ways Mr Gilbert's The First World War brings the conflict home to people at the end of the twentieth century render it one of the first books that anyone should read in beginning to try to understand this war and this century John Milton Cooper Jr The New York Times Book Review 80 photos 31 maps *Agents of the Revolution* Kevin Morgan, 2005 Using Comintern archives oral interviews and a wide range of other sources this collection presents a sample of some of the exciting new work currently being produced in the field of communist biography Geographically the contributions take in North America and New Zealand as well as a range of European countries Some chapters focus on individuals like Clara Zetkin William Z Foster Umberto Terracini William Gallacher or József Pogany Others adopt a collective approach to explore communist cultures in rural Austria or the Netherlands or the impact of institutions like the International Lenin School There are also chapters on communist institutional biographies the role of general secretaries and the significance of generations and family links

New Outlook, 1903 Women of All Nations Thomas Athol Joyce, Northcote Whitridge Thomas, 1912 Biennial Report of the State Board of Fisheries and Game Connecticut. State Board of Fisheries and Game, 1908 **East Central European Crisis Discourses in the Twentieth Century** Balázs Trencsényi, Lucija Balikić, Una Blagojević, Isidora Grubački, 2024-08-20

The term crisis with its complex history has emerged as one of the pivotal notions of political modernity. As such, reconstructing the ways the discourse of crisis functioned in various contexts and historical moments gives us a unique insight not only into a series of conceptual transformations but also into the underlying logic of key political and intellectual controversies of the last two centuries. Studying the ways crisis was experienced, conceptualized, and negotiated can contribute to the understanding of how various visions of time and history shape political thinking and conversely how political and social reconfigurations frame our assumptions about temporality and spatiality. A historical region wedged in between various competing imperial centers, East Central Europe has been an area often associated with crisis phenomena by both internal and external observers. Seeking to employ the regional gaze as a vantage point to reflect on issues which are relevant well beyond those countries between the Baltic and the Adriatic, this project is also in dialogue with a number of recent transnational attempts to rethink political and intellectual history with regard to the recurrent epistemological frames that structure the political and cultural debate. This book will thus be useful both for researchers from the field of intellectual history and numerous adjacent fields and graduate university students alike.

John von Neumann: The Scientific Genius Who Pioneered the Modern Computer, Game Theory, Nuclear Deterrence, and Much More Norman Macrae, 2019-07-31

John von Neumann was a Jewish refugee from Hungary, considered a genius like fellow Hungarians Leo Szilard, Eugene Wigner, and Edward Teller, who played key roles developing the A bomb at Los Alamos during World War II. As a mathematician at Princeton's Institute for Advanced Study, where Einstein was also a professor, von Neumann was a leader in the development of early computers. Later, he developed the new field of game theory in economics and became a top nuclear arms policy adviser to the Truman and Eisenhower administrations. I always thought von Neumann's brain indicated that he belonged to a new species, an evolution beyond man. Macrae shows us in a lively way how this brain was nurtured and then left its great imprint on the world.

Hans A. Bethe, Cornell University: The book makes for utterly captivating reading. Von Neumann was, of course, one of this century's geniuses, and it is surprising that we have had to wait so long for a fully fleshed and sympathetic biography of the man. But now happily we have one. Macrae nicely delineates the cultural, familial, and educational environment from which von Neumann sprang and sketches the mathematical and scientific environment in which he flourished. It's no small task to render a genius like von Neumann in ordinary language, yet Macrae manages the trick, providing more than a glimpse of what von Neumann accomplished intellectually without expecting the reader to have a Ph.D. in mathematics. Beyond that, he captures von Neumann's qualities of temperament, mind, and personality, including his effortless wit and humor. And Macrae frames and accounts for von Neumann's politics in ways that even critics of them

among whom I include myself will find provocative and illuminating Daniel J Kevles California Institute of Technology A lively portrait of the hugely consequential nonmathematician physicist et al whose genius has left an enduring impress on our thought technology society and culture A double salute to Steve White who started this grand book designed for us avid nonmathematical readers and to Norman Macrae who brought it to a triumphant conclusion Robert K Merton Columbia University The first full scale biography of this polymath who was born Jewish in Hungary in 1903 and died Roman Catholic in the United States at the age of 53 And Mr Macrae has some great stories to tell Mr Macrae s biography has rescued a lot of good science gossip from probable extinction and has introduced many of us to the life story of a man we ought to know better Ed Regis The New York Times A nice and fascinating picture of a genius who was active in so many domains Zentralblatt MATH Biographer Macrae takes a viewspaperman approach which stresses the context and personalities associated with von Neumann s remarkable life rather than attempting to give a detailed scholarly analysis of von Neumann s papers The resulting book is a highly entertaining account that is difficult to put down Journal of Mathematical Psychology A full and intimate biography of the man who consciously and deliberately set mankind moving along the road that led us into the Age of Computers Freeman Dyson Princeton NJ It is good to have a biography of one of the most important mathematicians of the twentieth century even if it is a biography that focuses much more on the man than on the mathematics Fernando Q Gouv a Mathematical Association of America Based on much research his own and that of others especially of Stephen White Macrae has written a valuable biography of this remarkable genius of our century without the opacity of technical mathematical dimensions that are part of the hero s intellectual contributions to humanity Interesting informative illuminating and insightful Choice Review Macrae paints a highly readable humanizing portrait of a man whose legacy still influences and shapes modern science and knowledge Resonance Journal of Science Education In this affectionate humanizing biography former Economist editor Macrae limns a prescient pragmatist who actively fought against fascism and who advocated a policy of nuclear deterrence because he foresaw that Stalin s Soviet Union would rapidly acquire the bomb and develop rocketry Macrae makes von Neumann s contributions accessible to the lay reader and also discusses von Neumann s relationships with two long suffering wives his political differences with Einstein and the cancer that killed him Publishers Weekly Macrae s life of the great mathematician shows dramatically what proper care and feeding can do for an unusually capacious mind John Wilkes Los Angeles Times
