students in the areas of spatio temporal databases and geographical information systems For anyone thinking of doing research in this field or who is developing a system based on spatio temporal data this text is essential reading Mike Worboys U Maine Orono ME USA The high level semantic model presented and validated in this book provides essential guidance to researchers and implementers when improving the capabilities of data systems to serve the actual needs of applications and their users in the temporal and spatial domains that are so prevalent today Gio Wiederhold Stanford U CA USA
