Non-consensual Image-based Sexual Offending Dean Fido, Craig A. Harper, 2020-11-02 This book presents a timely analysis of the psychological influences underpinnings and predictors of non consensual image based sexual offending NCIBSO such as revenge pornography cyber flashing deepfake media production and upskirting In this rapidly expanding field this book offers a novel perspective that encompasses both a forensic psychoanalytic analysis of offending behaviours and an examination of the influence of our use of online environments and digital platforms on these behaviours The authors begin by outlining the historical and legal context before moving on to a critique of previously posited motivating factors Rather than conceptualising NCIBSO in purely gendered terms they demonstrate the potential for a psychological framework to facilitate a better understanding of how and why people engage in a range of non consensual sexual image offences In doing so it will provide fresh insights for policymakers and clinicians in addition to scholars from across the fields of

*Intimacy* Martin Fisher,2012-12-06 Intimacy is a complex and heterogeneous concept that has generated a variety of definitions theories and philosophies over the years Although there is much disagreement about the essential meaning of the term there seems to be a consensus that intimacy whatever it may be is of central importance in human relationships and specifically in the theory and practice of psychotherapy One approach to intimacy focuses on an intrapsychic conception Intimacy occurs when an individual achieves full self knowledge and is fully in touch with his or her feelings and wishes From this viewpoint an intimate act occurs when a person is willing to share these feelings and wishes with another so that self disclosure becomes an important index of intimacy This definition also implies that intimacy need not be reciprocal so that a therapeutic relationship can achieve a good deal of intimacy without the therapist engaging in self disclosure An alternate approach to intimacy stresses the interpersonal nature of the concept Intimacy is seen as the product of an interaction and can only occur between people Each one is able to touch something meaningful in the other whether at a conscious behavioral level or an unconscious and inferential level Therapists seeking intimacy in these terms would probably be a good deal more active and consider it more important to reveal something of the substance of their own persons if not the facts of their lives
